# AMSOIL ATV/UTV KITS FOR POLARIS(R) VEHICLES

Product Code: PKATVUTV

*Simplify Polaris ATV/UTV oil changes with all-in-one kits--premium protection, easy fit, and year-round performance for tough rides.*

## Product Description

AMSOIL ATV/UTV Kits for Polaris Vehicles take the guesswork out of oil changes by bundling the correct amount of AMSOIL 5W-50 Synthetic ATV/UTV Motor Oil with a matched oil filter for your specific Polaris model, all in one box.

Polaris ATVs and UTVs run hard. Trail rides through mud and creek crossings, long days of ranch work, and high-RPM desert runs all push engines, transmissions, and clutches to their limits. These machines also sit for weeks or months between uses, exposing internals to moisture and corrosion. A single oil has to handle all of it, and the oil change itself needs to be straightforward so it actually gets done on schedule.

### ALL-SEASON PROTECTION IN EXTREME HEAT AND COLD

AMSOIL 5W-50 Synthetic ATV/UTV Motor Oil covers a wide viscosity range, flowing quickly at cold startup temperatures while maintaining a thick, stable film under intense summer heat. Whether you are riding frozen trails in Minnesota or crawling rocky washes in Arizona, the oil stays in its protective grade. That broad operating window means one formula handles your Polaris Sportsman, RZR, Ranger, or General across every season without swapping viscosities.

### BUILT FOR DEMANDING CHORES AND TOUGH TERRAIN

Polaris powertrains share oil between the engine and transmission, which means the lubricant has to protect gears and clutch packs at the same time it protects pistons, bearings, and cams. AMSOIL 5W-50 is formulated specifically for this shared-sump design, resisting shear and maintaining viscosity even under the high loads generated by aggressive trail riding, towing, plowing, and hauling. It fights rust and corrosion during extended storage periods, so your machine is ready to go when you are.

### ONE KIT, ZERO GUESSWORK

Each kit is matched to a specific group of Polaris models. PK1 covers the ACE 900, General 1000, 2013-and-newer Ranger 900 and 1000, and 2013-and-newer RZR 900 and 1000 (non-turbo). PK2 fits the Sportsman 300 through 1000, Scrambler 500 through 1000, ATP 330 and 500, Magnum 325 through 500, Trail Blazer 330, Trail Boss 325 and 330, Hawkeye 300 and 400, Ranger 400, 2016-and-earlier Ranger 500, and Xplorer 500. PK3 covers the ACE 500 and 570, 2017-and-newer Ranger 500, Ranger 570 through 800, RZR 570 and 800, and Sportsman 600 through 800. PK4 is designed for the RZR 1000 Turbo. Each kit ships with the correct quantity of oil (2, 2.5, or 3 quarts depending on the kit) and one oil filter that meets or exceeds Polaris OEM filter standards.

### SKIP THE DEALER LINE

Waiting at a dealer for a routine oil change costs time and money. These kits put everything you need in one package so you can handle it in your own garage or shop. No hunting for the right filter part number, no buying an extra quart you won't use. Plug your machine into the AMSOIL vehicle lookup tool, order the correct kit, and have it shipped to your door.

## COMPATIBILITY AND FITMENT

AMSOIL ATV/UTV Kits are currently available for Polaris models only. The 5W-50 Synthetic ATV/UTV Motor Oil included in each kit is compatible with Polaris-recommended oil specifications for the models listed above. The included oil filter uses cellulose media and meets or exceeds Polaris OEM filter standards. Non-turbo and turbo applications are separated into different kits to account for oil capacity and filtration differences, so confirm your model before ordering.

## Frequently Asked Questions

### Q1: What Polaris ATV and UTV models fit the AMSOIL ATV/UTV Oil Change Kits?

AMSOIL ATV/UTV Kits for Polaris Vehicles are available in four configurations covering a wide range of models. PK1 fits the ACE 900, GENERAL 1000, 2013+ RANGER 900 & 1000, and 2013+ RZR 900 & 1000 (excluding turbo models). PK2 covers numerous models including Sportsman 300-1000, Scrambler 500-1000, Magnum 325-500, Trail Blazer 330, Trail Boss 325/330, and RANGER 400/500 (2016 and previous). PK3 fits ACE 500/570, 2017+ RANGER 500, RANGER 570-800, RZR 570/800, and Sportsman 600-800. PK4 is specifically for the RZR 1000 Turbo.

### Q2: How does AMSOIL 5W-50 Synthetic ATV/UTV Motor Oil in the Polaris kits protect engines in extreme conditions?

The AMSOIL ATV/UTV Kits for Polaris Vehicles include AMSOIL 5W-50 Synthetic ATV/UTV Motor Oil, which is an all-season formula designed to perform in both extreme heat and cold. It provides protection for demanding chores and tough terrain, and it fights rust and corrosion to help preserve engine internals during harsh operating conditions typical of off-road riding.

### Q3: What oil viscosity and filter are included in the AMSOIL Polaris ATV/UTV oil change kits?

Each AMSOIL ATV/UTV Kit for Polaris Vehicles includes AMSOIL 5W-50 Synthetic ATV/UTV Motor Oil and one oil filter. Depending on the kit selected (PK1, PK2, PK3, or PK4), the oil quantity is 2, 2.5, or 3 quarts. The included oil filter is made from cellulose media and meets or exceeds Polaris OEM filter standards.

### Q4: How does the AMSOIL Polaris ATV/UTV kit compare to buying oil and a filter separately?

The AMSOIL ATV/UTV Kits for Polaris Vehicles combine everything needed to perform an AMSOIL oil change on the most popular Polaris ATV/UTV models in one convenient package, starting at \$44.25. This eliminates the guesswork of selecting the correct oil quantity and filter individually. Verified buyers have noted the kits even include extras like gloves and a paper funnel, making the oil change process simple and mess-free.

### Q5: How much oil do I need for an AMSOIL oil change on my Polaris Sportsman or RZR?

The amount of AMSOIL 5W-50 Synthetic ATV/UTV Motor Oil included varies by kit. PK2 covers Sportsman models from 300 to 1000 and PK3 covers Sportsman 600-800, while RZR 900/1000 non-turbo models use PK1 and RZR 570/800 models use PK3. Each kit comes pre-packaged with 2, 2.5, or 3 quarts depending on the specific kit, so selecting the correct kit number ensures you receive the right amount of oil for your model.

### Q6: Is the AMSOIL ATV/UTV oil change kit safe for Polaris RZR turbo models?

The PK1 kit explicitly does not fit turbo models, so owners of turbocharged RZR 900 or 1000 variants should not use PK1. However, AMSOIL offers the PK4 kit specifically designed for the RZR 1000 Turbo. It is important to select the correct kit number to ensure proper fitment, oil quantity, and filter compatibility for your specific Polaris model.
