AMSOIL QUICK DETAILER

Product Code: QDSCN-EA

Product Description

AMSOIL Quick Detailer is a spray-on, wipe-off detail spray that removes light dust and debris from painted and plastic surfaces, delivering a streak-free finish between full washes. It is built for anyone who wants to keep their vehicle looking sharp without the time commitment of a traditional wash.

Daily driving puts a constant layer of light contamination on exterior surfaces. Road dust, pollen, fingerprints around door handles, and light water spots all dull the finish over time. Dragging a dry towel across these contaminants without lubrication can introduce fine scratches and swirl marks into clear coats. A proper quick detailer provides the lubrication and cleaning action needed to safely lift and wipe away that surface film.

LUBRICATES SURFACES TO PREVENT MICRO-SCRATCHING

The blend of surfactants and cleaning agents in AMSOIL Quick Detailer lubricates the surface as you wipe, reducing the friction between contaminants, the microfiber towel, and your paint. This is the difference between safely removing dust and grinding it into the clear coat. The formulation is safe for clear coats and ceramic coatings alike, so it works on everything from a daily driver to a freshly coated show car.

LIFTS AND REMOVES LIGHT DUST AND DEBRIS

Rather than smearing surface contamination around, the surfactant package is designed to lift dust and light debris away from the paint so it can be captured in the microfiber towel. This makes AMSOIL Quick Detailer effective for quick touch-ups at car shows, after a short drive, or between weekend washes. Mist it on, wipe it off, and the surface is clean.

STREAK-FREE, RESIDUE-FREE FINISH

Nobody wants to trade dust for streaks. The residue-free surfactant formulation wipes clean without leaving haze or film behind. This is particularly important on dark-colored vehicles where any residue or streaking is immediately visible. The result is a clean, enhanced appearance with minimal effort.

ANTI-STATIC PROPERTIES HELP REPEL DUST

Static charge on painted surfaces attracts airborne dust and keeps it clinging to the finish. AMSOIL Quick Detailer includes anti-static properties that help repel dust and light debris after application, keeping the surface cleaner for longer after detailing.

SIMPLE APPLICATION

Park in a cool, shaded area. Shake the bottle, mist the product over exterior surfaces one panel at a time, and wipe away with a clean, high-quality microfiber towel. Replace the towel once it becomes saturated. The process takes minutes and works well as a maintenance step between full washes using AMSOIL High-Foam Car Shampoo or as a standalone touch-up. The strawberry melon

scent is a welcome change from the chemical smell of many competing detail sprays.

COMPATIBILITY

AMSOIL Quick Detailer is safe for use on all exterior painted surfaces, clear coats, ceramic coatings, and plastic trim. It pairs well with other products in the AMSOIL Car Care line, including AMSOIL Ceramic Spray for longer-term protection and AMSOIL Miracle Wash for waterless cleaning situations. Available in a 16-ounce spray bottle or by the case.

Frequently Asked Questions

Q1: What vehicles and equipment can I use AMSOIL Quick Detailer on?

AMSOIL Quick Detailer (QDSCN-EA) is designed for use across a wide range of vehicles and equipment, including auto/light trucks, motorcycles, ATVs, UTVs, snowmobiles, marine outboards, PWCs, heavy-duty on-road and off-road vehicles, agriculture equipment, and powersports machines. It works on painted and plastic exterior surfaces, making it a versatile detailing solution for virtually any vehicle you own.

Q2: How does AMSOIL Quick Detailer protect and improve the look of my vehicle's paint?

AMSOIL Quick Detailer uses a specially formulated combination of surfactants and cleaning agents that lubricate painted and plastic surfaces while lifting away light dust and debris. The spray-and-wipe application delivers a streak-free finish, allowing you to maintain a clean, detailed appearance between full washes quickly and effectively.

Q3: What is in AMSOIL Quick Detailer and how does its formula work?

AMSOIL Quick Detailer is formulated with a combination of surfactants and cleaning agents specifically designed to lubricate exterior surfaces and lift away light dust and debris. The surfactants encapsulate contaminants so they can be wiped away without scratching, while the cleaning agents leave behind a streak-free finish on both painted and plastic surfaces.

Q4: How does AMSOIL Quick Detailer compare to doing a full car wash?

AMSOIL Quick Detailer is not a replacement for a full wash but is designed as a quick and effective detail between washes. Its spray-and-wipe application makes it ideal for removing light dust and debris when you don't have time for a complete wash. For heavily soiled vehicles, a full wash is still recommended before using the Quick Detailer for finishing touches.

Q5: How do I properly apply AMSOIL Quick Detailer for the best results?

For optimal results, park your vehicle in a cool, shaded area and shake the bottle well before use. Mist the product over exterior vehicle surfaces, then wipe away with a high-quality microfiber towel for a streak-free finish. Replace the microfiber towel if it becomes saturated to maintain effectiveness and avoid streaking.

Q6: Is AMSOIL Quick Detailer safe to use on plastic surfaces and painted finishes?

Yes, AMSOIL Quick Detailer is specifically formulated to be safe for both painted and plastic exterior surfaces. Its surfactants lubricate the surface during application, helping to lift dust and debris without scratching or damaging the finish. It is designed for use on the exterior surfaces of cars, trucks, motorcycles, powersports vehicles, and more.
