AMSOIL WHEEL + TIRE CLEANER

Product Code: WTCCN-EA

Effortlessly remove brake dust, road grime, and tire blooming with this pH-balanced cleaner, safe for all wheel finishes and easy to use.

Product Description

AMSOIL Wheel + Tire Cleaner is a pH-balanced, two-in-one formula built to strip away brake dust, road grime, and tire blooming without damaging your wheel finish. It works on every wheel type, from factory alloys to polished chrome to matte black aftermarket rims.

Wheels take a beating that most people underestimate. Brake dust is metallic particulate that bonds to wheel surfaces at high temperatures, and if left to sit, it can etch into clear coats and finishes permanently. Road grime, tar, and the brown discoloration from tire blooming compound the problem, making wheels look neglected even on a recently washed vehicle. A standard car wash soap is not formulated to deal with these specific contaminants.

PH-BALANCED FORMULA SAFE FOR ALL WHEEL FINISHES

Aggressive wheel cleaners often rely on strong acids or high-alkalinity formulas that can strip coatings, dull anodized finishes, or corrode bare aluminum. AMSOIL Wheel + Tire Cleaner uses a pH-balanced formulation that breaks down stubborn brake dust and road contaminants without attacking the underlying surface. That makes it safe for clear-coated alloy wheels, chrome, painted wheels, powder-coated finishes, and polished aluminum alike.

REMOVES STUBBORN BRAKE DUST AND ROAD GRIME

Brake dust from semi-metallic and ceramic pads contains iron particles, adhesive residue, and carbon fibers that bond aggressively to hot wheel surfaces. This cleaner uses a specialized surfactant blend engineered to penetrate and lift these bonded contaminants on contact. A quick agitation with a wheel brush and a rinse is all it takes. Working one wheel at a time prevents the product from drying on the surface, which keeps results consistent across all four corners.

ELIMINATES TIRE BLOOMING

That brown, streaky discoloration on tire sidewalls is called blooming. It happens when antiozonant compounds in the rubber migrate to the surface and oxidize. Standard soaps do not remove it effectively because the residue is chemically different from typical dirt. AMSOIL Wheel + Tire Cleaner is specifically blended to cut through tire blooming, restoring sidewalls to a clean, dark appearance and preparing the surface for a tire dressing like AMSOIL Tire + Trim Protectant.

LUBRICATES WHEEL FACES DURING CLEANING

The surfactant package in this formula does more than just clean. It lubricates the wheel face as you work, reducing the chance of micro-scratching from agitation with a brush. This is particularly important on wheels with delicate finishes, including factory clear-coated alloys on vehicles like BMW 3 Series, Mercedes C-Class, Ford Mustang GT, and Ram 1500 sport wheels where

cosmetic condition directly impacts resale value.

EASY, ONE-PRODUCT APPLICATION

Instead of needing a separate wheel cleaner and a dedicated tire cleaner, this two-in-one formula handles both surfaces in a single step. Rinse the wheel and tire, spray for full coverage, agitate with a brush, and rinse again. The citrus scent is a practical bonus over the harsh chemical smell typical of acid-based wheel cleaners. For best results, follow up with AMSOIL Tire + Trim Protectant to add UV protection and a satin or gloss finish to the sidewalls between washes.

Application Notes

Park the vehicle in a cool, shaded area and make sure wheel surfaces are cool to the touch before applying. Hot wheels can cause the product to flash dry, reducing cleaning effectiveness. Work one wheel at a time and do not allow the product to dry on any surface. Rinse thoroughly after agitation. Available in a 16 oz. spray bottle for convenient, controlled application.

Frequently Asked Questions

Q1: What vehicles and equipment can I use AMSOIL Wheel + Tire Cleaner on?

AMSOIL Wheel + Tire Cleaner (WTCCN-EA) is designed for a wide range of vehicles and equipment, including auto/light trucks, motorcycles, ATVs, UTVs, snowmobiles, marine outboard vessels, PWCs, heavy-duty on-road and off-road vehicles, and agriculture equipment. It is formulated to safely clean wheels and tires across all of these application categories.

Q2: How does AMSOIL Wheel + Tire Cleaner remove brake dust and road grime?

AMSOIL Wheel + Tire Cleaner uses a PH-balanced formula that safely breaks down and removes stubborn brake dust and road grime without harming wheels or tires. It also contains a special blend of surfactants that quickly penetrates to remove tire blooming, ensuring an effective and thorough clean on both wheel and tire surfaces.

Q3: Is AMSOIL Wheel + Tire Cleaner PH-balanced and what does that mean for my wheels?

Yes, AMSOIL Wheel + Tire Cleaner features a PH-balanced formula. This means it is designed to clean effectively without being too acidic or too alkaline, which ensures it safely breaks down contaminants like brake dust and road grime without causing damage, etching, or discoloration to your wheel finishes or tire surfaces.

Q4: How does AMSOIL Wheel + Tire Cleaner compare to regular car wash soap for cleaning wheels?

Unlike general-purpose car wash soaps, AMSOIL Wheel + Tire Cleaner is specifically formulated with a special blend of surfactants that quickly penetrate and remove stubborn brake dust, road grime, and tire blooming. Its PH-balanced formula is purpose-built for wheel and tire surfaces, ensuring a more effective clean on these heavily contaminated areas without causing harm to the wheels or tires.

Q5: How do I properly use AMSOIL Wheel + Tire Cleaner for the best results?

Park your vehicle in a cool, shaded area and ensure surfaces are cool to the touch. Shake the bottle well, then work one wheel at a time: rinse heavy contaminants off with a hose or pressure washer, spray AMSOIL Wheel + Tire Cleaner for complete coverage while avoiding overspray on other components, agitate with a wheel brush for best results, and rinse well immediately. Do not allow the product to dry onto any wheel surface. For optimum results, follow up with AMSOIL Tire + Trim Protectant between treatments.

Q6: Is AMSOIL Wheel + Tire Cleaner safe for all types of wheels and tires?

AMSOIL Wheel + Tire Cleaner is formulated with a PH-balanced formula designed to ensure an effective clean without harming wheels or tires. However, you should avoid overspray on other vehicle components and never allow the product to dry onto any wheel surface. Always rinse well immediately after application to prevent any potential residue buildup.
