

## Cleaners &amp; Protectants

# AMSOIL FIREARM CLEANER AND PROTECTANT

Product Code: FCPSC-EA

*Clean and protect your firearms with a powerful formula that removes residue, prevents corrosion, and ensures reliable performance.*

## Product Description

AMSOIL Firearm Cleaner and Protectant strips fouling and powder residue from rifles, handguns, shotguns, and black powder guns while leaving behind a protective layer that guards against corrosion during storage.

Carbon buildup, unburned powder, and copper fouling accumulate in barrels, bolt assemblies, trigger mechanisms, and other tight-tolerance components every time you pull the trigger. Left unaddressed, that residue leads to feeding failures, misfires, and accuracy degradation. Moisture exposure compounds the problem. A shotgun sitting in a duck blind all morning or a deer rifle stored through the off-season can develop surface corrosion that pits metal and compromises both function and value.

### PENETRATES HARD-TO-REACH COMPONENTS

Actions, bolt carriers, firing pin channels, and trigger groups have tight clearances where fouling loves to hide. AMSOIL Firearm Cleaner is formulated to penetrate deep into those areas, loosening and dissolving carbon and powder residue so it can be wiped or brushed away. Range testing across multiple firearm platforms confirmed its ability to effectively clean bore surfaces after heavy use. A shotgun barrel tested after firing 100 rounds showed complete removal of powder residue, leaving a clean, smooth bore.

### REDUCES MISFIRES AND IMPROVES RELIABILITY

Fouling buildup on critical surfaces like the bolt face, chamber, and extractor can cause failures to feed, extract, or fire. AMSOIL Firearm Cleaner effectively removes that fouling from all firearm surfaces, reducing the likelihood of malfunctions. For competition shooters running high round counts at PRS matches or recreational shooters putting rounds downrange all day, consistent cleaning with a product that actually dissolves residue rather than just pushing it around makes a measurable difference in reliability.

### PROTECTS AGAINST CORROSION DURING STORAGE

This is not just a cleaner. AMSOIL Firearm Cleaner also deposits a protective barrier that guards metal surfaces against rust and corrosion. In ASTM D1748 humidity testing and ASTM B117 salt fog testing, AMSOIL Firearm Cleaner showed no corrosion on treated surfaces. A leading competitor's product failed both tests. That corrosion protection matters for firearms stored in safes, cases, or environments with fluctuating humidity. It preserves both the mechanical function and the long-term value of your guns.

### SAFE ON ALL FIREARM MATERIALS

Many cleaners and solvents are harsh enough to damage wood stocks, polymer frames, rubber grips, and composite furniture. AMSOIL Firearm Cleaner is safe to use on all metals, woods, composites, and rubbers commonly found in firearms. You can clean an AR-15 with a polymer lower, a walnut-stocked bolt action, or a Cerakote-finished handgun without worrying about material compatibility.

## Applications

AMSOIL Firearm Cleaner and Protectant is designed for use on rifles, handguns, shotguns, and black powder guns. Apply to cleaning patches, bore brushes, or directly to surfaces to be cleaned. Wipe with a clean, lint-free cloth. Reapply and brush as necessary. For firearms going into storage, wipe exterior surfaces with a cloth dampened with Firearm Cleaner to leave a thin protective layer.

## Availability

Available in 5-ounce spray cans and 8-ounce bottles. Firearm Cleaner is not available in Canada. Spray cans are not available in California.

## Frequently Asked Questions

### Q1: What is AMSOIL Firearm Cleaner and Protectant designed to be used on?

AMSOIL Firearm Cleaner and Protectant (FCPCN) is designed for use on all firearm surfaces, including all metals, woods, composites, and rubbers commonly found in firearms. It penetrates deep into hard-to-reach components to clean fouling and powder residue. Verified users have successfully used it on AR-15s, precision long-range PRS rifles, and various other firearm actions and finishes.

### Q2: How does AMSOIL Firearm Cleaner and Protectant help prevent misfires and improve reliability?

AMSOIL Firearm Cleaner and Protectant effectively cleans fouling and powder residue from all firearm surfaces, which helps prevent malfunctions and reduces misfires. By penetrating deep into hard-to-reach components where residue accumulates, it removes buildup that can interfere with the firearm's action and cycling, increasing overall reliability and providing dependability when you need it most.

### Q3: What sizes and packaging options are available for AMSOIL Firearm Cleaner and Protectant?

AMSOIL Firearm Cleaner and Protectant is available in two package sizes: a 5-ounce spray can (FCPSC) and an 8-ounce bottle (FCPCN). Both sizes can be purchased individually or in cases of 12. Note that AMSOIL Firearm Cleaner is not available in Canada, and the 5-ounce spray cans are not available in California.

### Q4: How does AMSOIL Firearm Cleaner and Protectant compare to using separate gun cleaners and corrosion protectants?

AMSOIL Firearm Cleaner and Protectant serves as a dual-purpose product that both cleans fouling and powder residue and protects against corrosion in a single application. This eliminates the need for separate cleaning solvents and protective coatings. It is rated 4.9 out of 5 stars based on 83 verified buyer reviews, with users noting it cleans well, is easy to apply, doesn't leak, and that a little goes a long way.

### Q5: How should I use AMSOIL Firearm Cleaner and Protectant for long-term gun storage?

AMSOIL Firearm Cleaner and Protectant is formulated to protect stored firearms from corrosion, allowing for safe long-term storage while preserving performance, reliability, and value. Apply it to all firearm surfaces after cleaning to create a protective barrier against moisture and corrosion. The product is designed to help keep firearms reliable for generations when used as part of regular maintenance and storage preparation.

### Q6: Is AMSOIL Firearm Cleaner and Protectant safe for wood stocks and rubber grips on guns?

Yes, AMSOIL Firearm Cleaner and Protectant is specifically formulated to be safe for use on all metals, woods, composites, and rubbers commonly found in firearms. It will not harm finishes on these materials. Verified buyers have confirmed it works well with all actions and is a great cleaner that will not harm the finish on their firearms.

## Available Product Codes

Product Code	Package Size	Unit of Measure
FCPSC-EA	5 oz. Spray Can	Each
FCPSC-CA	5 oz. Spray Can	Case of 12
FCPCN-EA	8 oz. Bottle	Each
FCPCN-CA	8 oz. Bottle	Case of 12
