

AMSOIL MICROFIBER DETAIL TOWEL 2-PACK

Product Code: G3912-EA

Product Description

AMSOIL Microfiber Detail Towel 2-Pack delivers a scratch-free, streak-free finish on any surface, inside or out. This is a simple, well-made detailing towel that does exactly what it should without leaving lint, swirl marks, or residue behind.

Even the best wax, spray detailer, or ceramic coating can look terrible if you're wiping it off with the wrong towel. Cheap microfiber sheds lint, drags contaminants across clear coat, and leaves streaks that force you to make extra passes. The towel matters more than most people think, especially on dark paint or gloss-black interior trim where every imperfection shows.

BORDERLESS, PLUSH DESIGN PREVENTS SCRATCHING

Traditional microfiber towels with sewn or serrated edges can catch on surfaces, leaving fine scratches on paint, glass, and piano-black trim pieces. The AMSOIL Microfiber Detail Towel uses a completely borderless construction, eliminating hard edges that could mar delicate finishes. At 350 GSM, the plush pile is dense enough to trap dirt and polish residue within the fibers rather than grinding it across the surface.

HIGH ABSORBENCY WITH FEWER PASSES

A towel that just pushes liquid around wastes time and creates streaks. This microfiber detail towel absorbs quickly, picking up spray detailer, waterless wash solution, or drying water in fewer wipes. That means less contact time with the surface and a cleaner result, particularly on coated or waxed paint where streaking is most visible.

VERSATILE FOR INTERIOR AND EXTERIOR USE

The lint-free construction makes this towel effective on glass, dashboard surfaces, infotainment screens, leather, and exterior paint. One towel works across multiple detailing tasks without switching materials. The 16" x 16" size is large enough for efficient panel coverage but manageable enough for tight interior spaces and detailed work around emblems or trim.

MACHINE WASHABLE AND REUSABLE

Microfiber towels only perform well when they're clean. These are machine washable in warm water with a mild, dye-free, fragrance-free liquid detergent. Avoid fabric softener and chlorine bleach, both of which coat or degrade microfiber and kill its ability to grab dirt and absorb liquid. Tumble dry on low or air dry in a dust-free space. Washing before first use is recommended for optimal softness and performance.

SPECIFICATIONS AND CARE NOTES

Size: 16" x 16" Weight: 350 GSM Borderless plush construction Lint-free and streak-free Sold as a convenient 2-pack Wash with like colors; some color bleeding may occur Do not use fabric softener, chlorine bleach, or dryer sheets Wash only with other non-linting materials to preserve dirt-gripping properties Use an extra rinse cycle if available to fully remove soap and contaminants

Frequently Asked Questions

Q1: What vehicles and equipment can I use the AMSOIL Microfiber Detail Towel 2-Pack on?

The AMSOIL Microfiber Detail Towel 2-Pack (G3912-EA) is versatile enough for use across a wide range of vehicles and equipment, including cars, light trucks, motorcycles, ATVs, UTVs, snowmobiles, marine outboards, PWCs, heavy-duty on-road and off-road vehicles, and agricultural equipment. It is designed for both interior and exterior detailing surfaces, making it a universal detailing accessory for virtually any vehicle type.

Q2: Does the AMSOIL Microfiber Detail Towel leave streaks or scratches on paint?

No. The AMSOIL Microfiber Detail Towel features an ultra-soft, lint-free, borderless plush design specifically engineered to deliver a streak-free finish without scratching surfaces. Its high absorbency reduces streaks and requires fewer passes compared to standard towels, making it ideal for achieving a clean, polished result on both interior and exterior surfaces.

Q3: What are the dimensions and GSM weight of the AMSOIL Microfiber Detail Towel?

Each AMSOIL Microfiber Detail Towel measures 16" x 16" and has a weight of 350 GSM (grams per square meter). The 350 GSM rating indicates a dense, plush microfiber construction that provides high absorbency and effective dirt-gripping properties. The product is sold as a convenient 2-pack.

Q4: How does the AMSOIL Microfiber Detail Towel compare to regular microfiber towels with sewn borders?

Unlike standard microfiber towels that have sewn or bound edges, the AMSOIL Microfiber Detail Towel features a borderless plush design. This eliminates the risk of sewn edges scratching or marring delicate surfaces like clear coats, glass, or interior trim. Combined with its ultra-soft, lint-free construction and 350 GSM density, it is purpose-built for scratch-free detailing that regular bordered towels may not safely provide.

Q5: How should I wash and care for the AMSOIL Microfiber Detail Towel to maintain performance?

Wash the AMSOIL Microfiber Detail Towel prior to first use for best results. Machine wash warm with a mild liquid detergent that is free of dyes, fragrances, bleach, and softeners. Do not use fabric softener or chlorine bleach, and wash only with other non-linting materials to maintain the towel's dirt-gripping properties. If your washer has an extra rinse cycle, use it to remove residual contamination and soap. Tumble dry on low or air dry in a dust-free space, and do not iron.

Q6: Is the AMSOIL Microfiber Detail Towel safe for use on interior surfaces like dashboards and touchscreens?

Yes. The AMSOIL Microfiber Detail Towel is designed for versatile application on both exterior and interior surfaces. Its ultra-soft, lint-free, scratch-free borderless construction makes it safe for delicate interior components such as dashboards, consoles, and other sensitive surfaces. Proper care following the recommended washing instructions will help maintain its gentle, non-abrasive properties over time.
