AMSOIL MUDSLINGER(R) MUD AND DIRT REPELLENT

Product Code: AMSSC-EA

Protect and restore your off-road gear with a non-stick barrier that repels mud, dirt, and snow for fast, easy cleanup and UV defense.

Product Description

AMSOIL Mudslinger Mud and Dirt Repellent creates a non-stick protective barrier on ATVs, UTVs, dirt bikes and other off-road equipment, making post-ride cleanup dramatically faster while shielding surfaces from UV damage.

Mud, dirt and snow don't just make your machine look rough. They pack into fender wells, cake onto plastics and undercarriages, and bake on under the sun until they're almost impossible to remove without aggressive scrubbing. Over time, UV exposure fades and degrades plastic and painted surfaces, accelerating the worn-out look that kills resale value and makes maintenance harder than it needs to be.

REPELS MUD, DIRT AND SNOW BEFORE THEY STICK

Mudslinger lays down a non-stick layer that prevents mud, dirt and snow from bonding to surfaces. Instead of grinding away at caked-on trail debris, you can rinse it off with low-pressure water. For riders who hit muddy trails, snowy conditions or dusty desert terrain, that means the difference between a 5-minute rinse and a 45-minute scrub session. Leave the product wet after application (without wiping) for an even heavier barrier in extreme mud and snow conditions.

RESTORES AND PROTECTS PLASTIC, FIBERGLASS AND PAINTED SURFACES

Faded plastics and dull paint make any machine look older than it is. Mudslinger cleans, restores and shines plastic, fiberglass and painted surfaces in one step. It also provides a protective layer against UV rays, helping prevent the kind of fading and chalking that hits ATV fenders, UTV roofs and dirt bike shrouds after repeated sun exposure. Buff it with a lint-free microfiber towel after the 15-minute dry time for a glossy, showroom-quality finish.

VERSATILE ENOUGH FOR MORE THAN JUST OFF-ROAD MACHINES

While Mudslinger is formulated with ATVs, UTVs and dirt bikes in mind, it works on any plastic, fiberglass or painted surface that takes a beating from the elements. Under-hood plastic engine covers, chainsaws, race car bodywork, supermoto underbodies. Anywhere dirt, dust or grime accumulates and UV exposure takes its toll, Mudslinger provides both a protective barrier and a clean, restored appearance. The pleasant cherry scent is a bonus over the chemical smell most competing products leave behind.

APPLICATION AND COMPATIBILITY

Mudslinger works on plastic, fiberglass and painted surfaces. Surfaces must be clean and dry before application. Spray evenly and liberally, then allow 15 minutes to dry. Wipe off excess with a lint-free microfiber towel for a brilliant shine, or leave wet for maximum mud and snow repellency. Do not spray on pedals, seats, brakes or brake assemblies. Note that when left wet, the product may attract dust between rides.

Available in 12-ounce spray cans.

Frequently Asked Questions

Q1: What vehicles and equipment can I use AMSOIL Mudslinger Mud and Dirt Repellent on?

AMSOIL Mudslinger Mud and Dirt Repellent is designed for a wide range of vehicles and equipment, including ATVs, UTVs, dirt bikes, motorcycles, snowmobiles, personal watercraft, marine outboards, auto/light trucks, and heavy-duty on-road and off-road equipment, as well as agricultural machinery. It works on plastic, fiberglass, and painted surfaces. Verified users have also reported success using it on chainsaws, race cars, supermotos, and under-hood surfaces.

Q2: How does AMSOIL Mudslinger protect against mud, dirt, and UV damage?

AMSOIL Mudslinger creates a protective, non-stick layer of armor on surfaces that prevents the accumulation of mud, dirt, and snow. This barrier also counteracts the damaging effects of UV rays, helping keep equipment looking pristine. In addition to protection, it restores, cleans, and shines plastic, fiberglass, and painted surfaces, giving them a renewed appearance.

Q3: What size does AMSOIL Mudslinger Mud and Dirt Repellent come in?

AMSOIL Mudslinger is available in 12-ounce spray cans, sold individually (product code AMSSC-EA) or in cases of 12 (product code AMSSC-CA). It is an aerosol product and should be disposed of in accordance with all federal, state/provincial, and local regulations. Note that AMSOIL Mudslinger is not available in Canada.

Q4: How does AMSOIL Mudslinger compare to regular detailing sprays for off-road equipment?

Unlike general-purpose detailing sprays, AMSOIL Mudslinger is purpose-built to create a non-stick protective barrier specifically against mud, dirt, and snow accumulation on off-road vehicles. After application, mud and dirt can be easily removed with just low-pressure water, dramatically easing post-ride cleanup. The product carries a 4.9-star rating based on 92 verified reviews, with users calling it the best product they've ever used for repelling dust and mud.

Q5: How do I apply AMSOIL Mudslinger and how often should I reapply it?

Start with clean, dry surfaces, shake the can well, and spray evenly and liberally on desired areas -- do not spray on pedals, seats, brakes, or brake assemblies. Allow it to dry for 15 minutes, then wipe off excess with a lint-free microfiber towel for a brilliant shine. For an extra barrier against mud and snow, leave the product wet without wiping, though note that when left wet it may attract dust. Reapply before each ride or as needed after washing.

Q6: Is AMSOIL Mudslinger safe for plastic, fiberglass, and painted surfaces on my ATV or UTV?

Yes, AMSOIL Mudslinger is specifically formulated to be safe for plastic, fiberglass, and painted surfaces. It restores, cleans, and shines these materials while providing a protective non-stick layer. However, it should never be sprayed on pedals, seats, brakes, or brake assemblies, as the non-stick properties could create a safety hazard on those components.
