

HYDRUN

Expansion, Open Vessel
HY-E-OV
200/300/500 liters

→ 1-3 days delivery

→ 1-3 hours start-up

Description

Simple and cost-effective expansion

Hydrun's open expansion vessels are available in three sizes to meet different expansion volume requirements.

The vessels are designed for easy installation and have been tested in a laboratory environment at RISE, where it has been verified that the expansion vessels do not add oxygen to the system.

Features

Easy installation

Easily connects to HY-P and HY-PD with flexible hoses.

Easy-to-install lightweight

Lightweight and handy format, facilitates both transport and installation.

Corrosion-free

The vessels are produced on site and therefore run no risk of corrosion.

Environmentally friendly choice

Hydrun PE containers are made from recyclable material. An environmentally friendly choice with a long service life.

Impact resistant and durable

The containers are impact-resistant and can withstand temperatures up to 70°C.

Tested by RISE

Function and performance verified in independent tests by Research Institutes of Sweden.
