Controlled mixing and easy filling

The Hydrun Mixing Vessel (HY-M) is a ready-to-use mixing vessel with an integrated pump designed for easy handling of antifreeze in heating and cooling systems. It provides controlled mixing and smooth filling—a practical solution that simplifies service and commissioning.

Consistent dosing

Ensures even and proper distribution of antifreeze throughout the system.

System fluids

The vessels are well suited for systems containing glycol and ethanol.

Smooth refilling process

Fast and safe filling process using an integrated pump.

Conversion

Helps convert pure water into a liquid containing antifreeze.

Manufactured in Töcksfors

Swedish manufacturing with traceable quality, short lead times, and quick access to spare parts.
