Effective separation of dirt and magnetite

The Hydrun Separator Dirt/Magnetite (HY-S-DM-25-S) is a partial flow separator for hydronic , primarily designed to protect devices such as HY-D and HY-PD from dirt and magnetite.

It effectively separates both particles and magnetite and is designed for easy installation and convenient flushing - for more stable operation and less maintenance.

The product is sold as a mandatory accessory for HY-D and HY-PD.

Energy Saving

Save energy by continuously reducing the amount of dirt and magnetite in the system.

Ensures longevity

Protect vulnerable components in the units from dirt and magnetite, thereby ensuring their service life.

360° installation

Can be installed vertically and horizontally, to facilitate installation and save space.

Easy and quick cleaning

The separator and magnet can be cleaned without being removed from the system.

penable filter housing

Facilitates cleaning and servicing.

Warranty requirements

This product, or an equivalent approved by Hydrun, is required for the HY-D and HY-PD warranties to be valid.

Model name	HY-S-DM-25-S
Previous name	MP2 Dirt and magnetite separator
Previous item no.	HL11089
Gauss	11,000
Filtration	800 Micron
Max operating pressure	6 bar
perating t emperature	0-70°C
Connection	DN20
Installation	Vertical and horizontal
Media	Water, glycol
