Frequently Asked Questions

Is my drug on the MedOne formulary?

MedOne's drug look-up tool allows you to view medications that are on your formulary along with formulary alternatives.

- Go to medone-rx.com/members/drug-lookup
- Enter in the Rx GROUP ID (located on your ID card)
- If you are currently taking one of the non-covered medications, please contact your physician and request a new prescription for one of the covered alternatives to be filled on or after your plan effective date.
- If you or your physician have questions about a medication or available alternatives, please call MedOne for assistance.

Will I need a prior authorization for my medication?

Your prescription benefit plan may include clinical programs and plan edits for specific medications or therapy classes. Prior authorization (otherwise known as pre-approval) may be needed to ensure safe and effective medication therapies are provided while keeping healthcare costs low for you and the plan. In some cases, certain medications may not be covered under your plan and lower-costing equivalent or alternative medications are made available.

We encourage you or your pharmacist to call MedOne at **866-335-9057** if you are prescribed a new medication in order to determine coverage status.

What do I do if I have issues filling my prescription on or after the plan effective date?

Your plan has chosen programs and edits on select medications or therapy classes, however a rejection at the pharmacy does not necessarily mean your medication is not covered. Rather, your medication may be subject to review and approval. If your pharmacist advises there is an issue, please ask them to call MedOne at **866-335-9057** to speak to one of our Member Advocates. Our Member Advocates will work quickly to resolve any issues. This number is also located on your prescription ID card.

How do I go about filling my specialty medication?

Specialty medications are administered through the RxAlly program. Members can contact a Patient Care Coordinator at **877-794-2218** to help them receive their specialty medication.
