What is this product?

TYPE

The product is a sub-fund of BCI AM SICAV, an Undertaking for Collective Investment in Transferable Securities (UCITS) incorporated as a variable capital investment company (SICAV) under the laws of Luxembourg.

TERM

The Fund is established for an unlimited duration. However the Board of Directors may decide to close this product under certain circumstances.

OBJECTIVES

The Fund's objective is to seek capital appreciation and income in the mid to long-term by investing in debt instruments of issuers domiciled in, or exercising significant part of their economic activity in, Latin America (the LatAm Issuers).

There is no guarantee that the Investment Objective of the Fund will be achieved.

The Fund will invest a minimum of 70% of its assets in short duration corporate bonds of LatAm Issuers. The Fund's exposure to non-investment grade debt instruments (i.e. securities rated BB- or higher) will be limited to 40% of the Fund's NAV. The Fund will normally seek to maintain an average portfolio duration of between 1 and 3 years.

The Fund may invest up to 5% of its net assets in Contingent Convertible Bonds.

The remaining will be invested in cash and cash equivalents, and/or in bonds below investment grade rating. For the avoidance of doubt, the Investment Manager will not solely or mechanically rely on credit ratings issued by credit rating agencies and will apply its own analysis of the creditworthiness of issuers, in particular it will apply a fundamental credit analysis approach along its investment process to assess the credit quality of the issuers and issues in which the Fund invests.

The Fund will be actively managed without reference to a benchmark. The Fund will not invest in Defaulted Debt Securities or Distressed Debt Securities.

On an ancillary basis and under normal market conditions, the Fund will not hold more than 20% of its net assets in cash (i.e. bank deposits at sight). If the Investment Manager considers it to be in the best interest of the Shareholders under exceptional market circumstances, the Fund may hold up to 100% of its net assets in cash or cash equivalents (cash deposits, money market UCIs and Money Market Instruments), on a temporary basis and for defensive purposes.

The Fund will not use leverage. The Fund will not use SFT and financial derivative instruments (including TRS).

Please refer to the Prospectus for more information about the Sustainable Finance Disclosure Regulation ("SFDR") classification of the Fund.

The recommended holding period of this product is determined to allow sufficient time for this product to reach its objectives and avoiding short term market fluctuations.

The return of the product is determined using the net asset value calculated by the Central administration.

This return depends mainly on the market value fluctuations of the underlying investments.

In principle, capital gains and other income of the Fund will be re-invested and no dividend will generally be payable to shareholders.

INTENDED RETAIL INVESTOR

The product is reserved for institutional investors. The product is compatible with investors who may bear capital losses and who do not need capital guarantee. The product is compatible with clients looking for growing their capital and who wish to hold their investment over 3 years.

What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes you keep the product for 3 years.

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

The essential risks of the investment fund lie in the possibility of depreciation of the securities in which the fund is invested.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable proxy over the last 10 years. Markets could develop very differently in the future.

Recommended holding period:		3 years

What happens if FundSight S.A. is unable to pay out?

FundSight S.A. is not making any payment to you in relation to this Fund and you would still be paid in case of a default from FundSight S.A.

The Fund's assets are held with UBS Europe SE, Luxembourg Branch and are segregated from the assets of other sub-funds of the Company. The assets of the Fund cannot be used to pay the debts of other sub-funds of the Company.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- USD 10 000 is invested.

Investment of USD 10 000	If you exit after 1 year	If you exit after 3 years
Total costs	USD 640	USD 789
Annual cost impact (*)	6.4%	2.4% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 5.3% before costs and 2.9% after costs.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	Up to 3.00% of the amount you pay in when entering this investment.	Up to USD 300
Exit costs	Up to 3.00% of your investment before it is paid out to you.	Up to USD 309
