

CASE STUDY

# AdventHealth Reduces Compliance Testing Costs by 55%

AdventHealth is a leading non-profit, faith-based healthcare network spanning nine states. With a dispersed footprint and limited manpower, two Florida facilities automated time-consuming manual testing with Hexmodal's smart compliance system.

Starting with 897 Hexmodal Smart Emergency Lights and Exit Signs across multiple sites, AdventHealth Fish Memorial and DeLand have already achieved:

**55% Reduction**  
in Annual Testing Costs

**0.9 FTEs Reclaimed**  
For PMs and Critical Work

**1,790+ Hours Saved Annually**  
by Eliminating Manual Compliance Testing

"We went from days of manual testing to just pulling up Hexmodal's dashboard.  
**It was that simple."**

Jeffery Bates, Executive Director of Facilities

## The Challenge: Thousands of Labor Hours Spent on Compliance

Before partnering with Hexmodal, AdventHealth faced a resource-heavy process for testing and documenting compliance across multiple facilities.

**897** Fixtures Tested Manually

**13** Buildings in Different Cities

**2+** Past Surveys with AHJ Citations

## Hexmodal's Solution

AdventHealth streamlined operations by acquiring 897 Smart Emergency Lights and Exit Signs, effectively eliminating the manual compliance burden.

### Automated NFPA 101 Tests

No more manual walkthroughs to perform monthly 30-second and annual 90-minute tests.

### Real-Time Visibility

Immediate alerts for failed tests and corrective actions needed, all in one dashboard.

### Survey-Ready CMS Reports

Digital documentation eliminates binder-based tracking, human error and pencil-whipping risks.

### Time Back For Work Orders

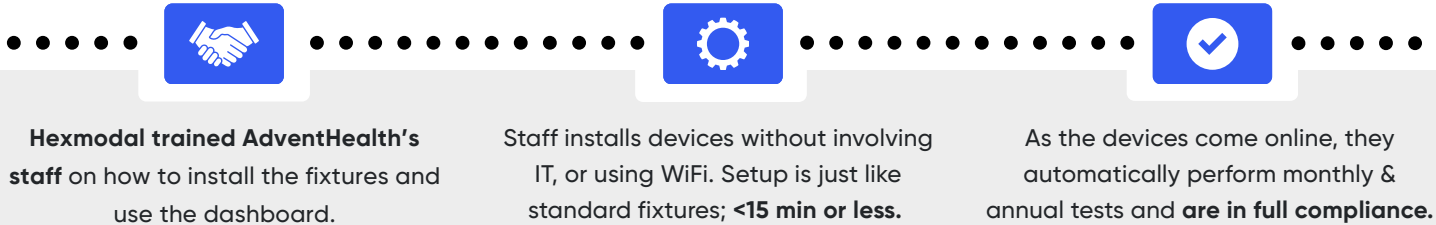

Additional bandwidth for daily maintenance work with better use of the team's resources.

## How the No-IT Deployment Works: Go Live in Days, Not Months

Day 1 Training & Onboarding

Day 2+ No-IT Installation

Day ∞ Automatically In Compliance

## Hexmodal Can Help Automate Other Compliance Tests

AdventHealth's success shows compliance needn't be a manual burden. Hexmodal's devices automate CMS and NFPA standards for simpler, more efficient facility-wide compliance.

### Emergency Lights & Exit Signs:

NFPA 101-compliant testing and reporting.

### Fire Extinguisher Inspections:

NFPA 10-compliant monthly inspections with documentation.

### Room Pressure Monitoring:

Continuous CMS-compliant tracking for critical spaces.

### Temperature Monitoring:

Automated reporting for medical refrigerators and freezers.
