

## CASE STUDY

# Eden Medical Center Implements Real Time Monitoring for Clean Rooms, Fridges & Freezers Without Involving IT

## Client Overview

**Eden Medical Center** is a 130-bed acute care hospital serving the Castro Valley region, where the facilities team must maintain strict CMS and state compliance across the campus, including:

**41 fridges & freezers** in need of temperature monitoring

**25 clean rooms** in need of pressure, temperature, & humidity monitoring

**230,000+** square feet of real estate

**Joint Commission compliance risk:** Inconsistent records put compliance at risk.

“

If readings are out of range, we instantly know because the shop phone would ring. It's terrific to be able to bring up the web browser daily, and when there's a problem, we can send someone straight out to the room.

John Groen, Eden Medical Center, Engineering Plant Operations

## Eden Medical Center's Goals

**Standardize testing and documentation**  
inconsistent records put compliance at risk

**Accurate Monitoring with real time alerts**  
and free NIST-traceable certification

**Get CMS survey-ready reporting** with online history readings and excursion events

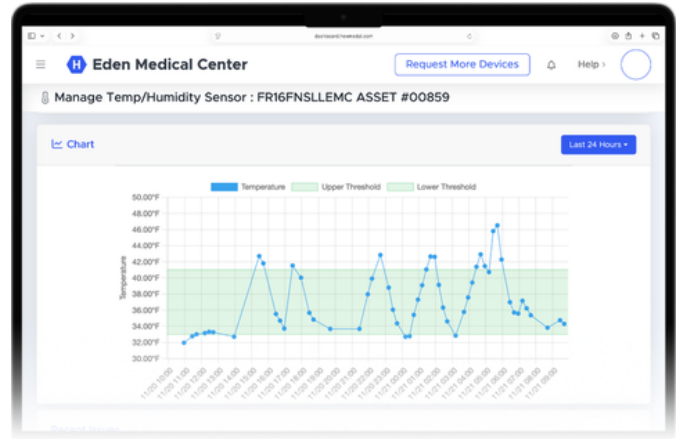

**No IT,** fast implementation without hardwiring or the need for outside contractor installation

## Hexmodal's Solution

Eden engineering gained full control with **Smart Temperature, Pressure and Humidity monitors that run checks automatically** and connect to one dashboard.

**Real-time visibility** across every facility and device.

**Automated testing and reporting** that keep you survey-ready.

## Eden Medical Center's Success

### 143 Smart Devices

Temperature, pressure and humidity monitors with custom temperature ranges & escalations.

### No IT Setup

Less than 1 week to install. No hardwiring. No 3rd-party labor needed.

### Only Pay For Testing

\$240 per device/ year fee includes everything to automate your compliance busywork.

### No Nuisance Alerts

Alert the right staff at the right time. Avoid escalations if an issue can be solved on-site.

### Automated CMS Reports

Record Keeping & Reports less busywork & no pencil-whipping.

### Free Recalibration & Parts

Recalibration, replacements, batteries, & more included.

## Hexmodal Can Help Automate Other Compliance Tests

Eden Medical Center's results highlight the power of automating compliance tasks. **Hexmodal's smart devices** help facilities meet CMS and NFPA standards across a wide range of needs, delivering compliance with less effort and greater consistency.

### Emergency Lights & Exit Signs:

NFPA 101-compliant testing and reporting.

### Fire Extinguisher Inspections:

NFPA 10-compliant monthly inspections with documentation.

### Room Pressure Monitoring:

Continuous CMS-compliant tracking for critical spaces.

### Temperature Monitoring:

Automated reporting for medical refrigerators and freezers.
