OUR COCKTAIL-STORY AND THE OPEN WORLD FAMILY

Our cocktail menu is all about creativity, curiosity and the joy of experimenting. We combine flavours, explore contrasts and continuously refine our recipes – until an idea becomes a drink that not only tastes great, but truly feels like Open World.

Every cocktail on this menu carries our signature: thoughtfully mixed, full of character and made for the moment. No unnecessary complexity – just creations designed to surprise and, above all, to be enjoyed.

Our signature is complemented by selected partners who share our values. Together with Red Bull, we create drinks that bring energy, excitement and new flavour combinations to the glass.

With Copperstone Spirits, we share a passion for gaming and storytelling. The brand was born from a spirit of experimentation and the idea of bringing together video game worlds, storytelling and premium distilling craftsmanship. The result is a collection of distinctive premium gins – created by gamers for gamers, and by storytellers for those who appreciate both a great story and great taste.

For selected wine and spritz creations, we trust H.u.M. Hofer Organic Winery from the southern Weinviertel region. Their vineyards have been cultivated organically for many years – with respect for nature, origin and the ambition to bring an authentic piece of the region into every glass.

For us, a great bar is about more than what's poured into your glass. It's a place for meeting people, sharing conversations, playing games together and creating new memories. Take your time, explore our creations and discover your personal favourite.

Cheers to creativity, courage and a true signature in every glass.

– Kathy
