

EPA MINING SPARES

CYLINDER SERVICE EXCHANGE PROGRAM

We offer a comprehensive Component Service Exchange Program designed to minimize downtime and keep your mining operations running efficiently. Through this service, customers can exchange worn or failed components for fully rebuilt, ready-to-install replacements from our inventory. Each component is rebuilt to OEM equivalent standards, tested for performance, and backed by warranty. This approach reduces repair lead times, lowers operational risk, and ensures reliable, cost-effective equipment availability when it matters most.

OUR STOCK

We stock a reliable range of Caterpillar and Komatsu components that support the core systems of heavy equipment. Our inventory is built on genuine quality and OEM specifications, ensuring each component integrates seamlessly and performs reliably under pressure. Meeting the demands of heavy-duty operations, these parts help maintain machine uptime and support longevity.
