

Zentro Expand

S-013

Product code: 2019040-1

PRODUCT DESCRIPTION

Zentro Expand S-013 is an extension module communicating via the RS485 serial interface (Modbus RTU). The module is a simple and inexpensive method of extending your project by additional inputs & outputs.

The Zentro Expand S-013 combines a higher number of digital inputs and relay outputs, making it suitable for a wide range of applications.

FEATURES

Inputs/outputs

- 1 RS485 Modbus RTU with galv. isolation
- 12 digital input (incl. pulse counter)
- 13 relay output

Other features

- Special functions
 - Configurable user LEDs
 - Direct Switch – automatic response to input value change
 - MasterWatchdog – switches outputs to a safe mode if communication with the PLC is interrupted
- Durable aluminium chassis (IP20)
- Available in OEM variant
