

Th!nk E

Th!nk E is a forward-thinking company committed to a fair, sustainable, and resilient energy transition in Europe and beyond. Founded in 2011, it has since grown into a leading Belgian SME, based in Leuven, and has become a reference in the field of energy transition, both in Belgium and at the European level.

Our expertise spans technical innovations, social and human sciences, and legal and policy frameworks, enabling us to take a holistic approach to energy challenges. Through collaboration and knowledge-driven strategies, Th!nk E transforms complex energy issues into practical, sustainable solutions for (energy) communities, companies, and policymakers.

Th!nk E initiates and participates in national and international innovation projects, working with academic and industrial partners. Additionally, we actively engage in local initiatives, leveraging our expertise to drive sustainable and impactful change.

CORE VALUES

Through multidisciplinary and multicultural collaboration, we bring together expertise from various fields and diverse perspectives, allowing us to approach complex energy transition challenges holistically.

Our approach is factual and research-driven. We aim not only to develop concepts but also to test and validate them in practice, ensuring their effectiveness and real-world applicability.

We maintain a strong focus on quality and excellence, setting high standards in everything we do—from project development and implementation to evaluation and scaling up.

Th!nk E is committed to fostering an inclusive working environment and providing equal opportunities to all employees, regardless of gender, background, or origin. We uphold respect for human rights in every aspect of our operations.

PROCESS OPTIMISATION

The management team has a clear vision of the strategy to be followed, and the organisational structure required to achieve it. In developing and implementing general policy, we strive to create an organisation where quality is synonymous with customer satisfaction.

The customer and their needs are always at the centre of our approach. Our organisation is dedicated to providing service, advice, and proactive cost savings while maintaining the personal touch every customer deserves.

Meeting high-quality and customer requirements is ensured through the ISO 9001 quality management system. All employees work according to the established procedures within this system. They are expected to meet set standards and requirements, uphold high quality, and actively contribute to continuous improvement. To ensure ongoing enhancements, the organisation undergoes regular internal and external audits and management reviews.

Don't think twice, talk to us.
