

Hydrachek® Conversion Kit

Two-way shock absorbing system that controls leveler lip descent for more productive leveler placement.

Hydrachek underneath mechanical leveler.

Yieldable lip on hydrachek system.

Hydrachek shock absorbers.

Increased Productivity

- » Hydrachek system helps reduce manual processes associated with recycling the leveler multiple times with accurate lip placement the first time.
- » Longer-lasting parts and less required maintenance needs helps reduce equipment downtime.

Universal Kit

Universally accepted on competitive and Rite-Hite® mechanical levelers.

Industry Leading Warranty

Rite-Hite Hydrachek conversion kit offers a standard warranty of 1-year parts and labor.

Help Improve Safe Leveler Placement

Hydrachek system helps deliver smooth, controlled leveler lip descent, helping to mitigate unsafe manual positioning practices and exposure to pinch points.

Lower Lifetime Ownership Costs

Dual shock absorbers help prolong the life of a leveler by providing a gentle, controlled extension and descent of the lip during operation.

Help Protect Equipment

The yieldable lip helps to protect the leveler and lip by absorbing the impact if accidentally struck by a backing trailer. If impacted, the leveler lip yields downward, helping to prevent damage to the trailer and leveler.
