ABOUT US

Founded by Alex Handley in 2018, Accurate Plumbing Group has quickly grown into a leading provider of comprehensive plumbing solutions, bringing together a highly skilled team that delivers projects across Australia. Guided by core values of teamwork, safety, and a strong work ethic, we are dedicated to creating health-conscious and safe work environments on every job.

Our expertise spans a broad range of plumbing systems, informed by experience working with diverse authorities and local regulations across the country. In 2023, we achieved ISO certification, underscoring our commitment to exceptional service quality and consistent project delivery. With a focus on excellence, our team is equipped to handle all aspects of plumbing, from large-scale commercial installations to specialised systems.

PROJECTS

OUR SERVICES

COMPREHENSIVE PLUMBING SOLUTIONS

From initial design to completion maintenance programs, we provide end-to-end plumbing solutions tailored to meet your project needs.

Specifically, our services include:

- Design budgeting
- Design engineering
- Civil construction
- Site excavation
- Sanitary drainage
- Water services
- Gas services
- Fire services
- Fire tanks and pumps
- Water tanks and pumps
- Water filtration
- Storm water drainage

CIVIL SERVICES

Our civil plumbing team delivers complete in-ground infrastructure for commercial, industrial, and government developments, ensuring efficient, compliant delivery from excavation through to final commissioning.

- Stormwater, sewer & wastewater infrastructure
- Trenching, pipeline installation & backfilling
- Pump systems, pits & connection works
- Testing, commissioning & authority sign-offs

HYDRAULIC SERVICES

We provide end-to-end hydraulic installations for commercial, healthcare, education, and aged care projects. Our team ensures every above-ground system is installed, tested, and commissioned to the highest standards.

- Hot & cold water reticulation systems
- Sanitary plumbing & trade waste systems
- Roof drainage & rainwater harvesting
- System testing, commissioning & compliance

FIRE SERVICES

We deliver complete fire service installations for commercial, education, healthcare, and government developments, ensuring every system is coordinated, compliant, and ready for seamless project delivery.

- > Fire hydrant & hose reel systems
- > Fire water tanks & pump sets
- > In-ground & above-ground fire services
- > Testing, commissioning & compliance certification

DESIGN

Our in-house design team works alongside builders, consultants and engineers to develop compliant civil, fire and hydraulic solutions, including Regulation 126 design and certification capabilities. This improves constructability, reduces on-site clashes and streamlines project delivery.

- > Regulation 126 design and certification
- > Hydraulic, civil and fire services design
- > BIM coordination and shop drawings
- > Value engineering and design reviews
- > As-built documentation & authority coordination

SIPHONIC DRAINAGE

We deliver engineered siphonic drainage systems for commercial, industrial, and institutional projects, providing efficient roof water management while reducing pipework, underground infrastructure, and construction complexity.

- > Siphonic roof drainage systems
- > Engineered installation & commissioning
- > System testing & performance verification
- > Stormwater integration & ongoing maintenance

CAPABILITIES

At Accurate Plumbing Group, we redefine industry standards by ensuring excellence in every project. We deliver projects on time, consistently meeting and often accelerating building programs without compromising on quality. Our high standards are reflected in our meticulous Inspection and Test Plans (ITPs) and thorough handover documentation, ensuring a smooth project transition for every client.

We offer comprehensive, in-house solutions, covering all aspects of plumbing from design, budgeting, and surveying to excavation, cartage, and material delivery. This integrated approach allows us to maintain full control over quality and timelines, providing added value and cost efficiency at every stage.

From cutting-edge research facilities to Modern aged care residences and community spaces, each project we undertake showcases our dedication to excellence. With over 20 years of experience, we remain the trusted choice for reliable and professional plumbing solutions.

SAFETY

As an ISO-certified company, we adhere to rigorous safety standards to ensure a safe and secure work environment for our team and clients alike. We maintain a dedicated, in-house trained OH&S officer on each site who oversees all safety protocols and conducts weekly site toolbox meetings to address specific on-site requirements.

Our commitment to safety goes beyond compliance; we continuously invest in upskilling our staff, providing regular training to keep our team informed on the latest safety practices. In addition, we conduct quarterly off-site company-wide toolbox meetings to review and strengthen our safety culture across all levels of the organization. This proactive approach ensures that every project is executed with the highest standards of health and safety.
