Imaging For ZERO

The cost of medical imaging in the U.S. varies wildly depending on where you go. We've seen the same type of MRI have a cost range from over \$40K down to less than \$500. That's a crazy difference!

No matter the price, it's usually you, the patient, who gets stuck with a big chunk of that cost.

Medical imaging can be critical to getting the right diagnosis and assuring the correct treatment. **With the ZERO benefit your employer has provided, you pay \$0.** Cost will never be a barrier to getting it right.

X-Rays, CT Scans, Ultrasounds & MRIs at over 1,500 locations

If your doctor orders imaging for you, visit my.zero.health to call or chat with a Personal Health Assistant
