

SUBLUE Mix 2026

UNDERWATER SCOOTER

Glide Beyond

SUBLUE

The SUBLUE Mix is a lightweight, agile underwater scooter designed for unforgettable underwater experiences, with a speed of 5.8 km/h. Perfect for users of all ages, from fourteen upwards, it offers 45 minutes of autonomy and diving to depths of up to 40 meters. This model is extremely easy to handle, ideal for snorkeling or diving, and its excellent power-to-size ratio makes it highly prized for deep-sea exploration. With its removable battery, it can also be transported by plane.

1st

The world's first dual-motor underwater scooter

80+

Sales network in 80+ countries and regions worldwide

200,000+

Delivered 200,000+ underwater scooters

The World's First

Speed 1.6 m/s (3.58 mph)

Detachable Battery

User-Friendly

Waterproof Down to 40 m (131 ft)

Action Camera Mount

Underwater Lighting Mount

Removable Buoyancy Chamber

Weighing just 3.5 kg, the compact and portable Mix has a special removable buoyancy chamber to suit different needs. When the buoyancy chamber is attached, it floats safely. Take it off, and you can switch to mini mode, which comes with a safety tether, so you don't have to worry about losing the Mix.

Dual Battery Protection

The battery is sealed to withstand depths of 40 m. Once installed, the battery cover provides secondary protection, preventing damage from compression or impact during use. Battery replacement is easy, allowing for double the runtime in just 10 seconds.

Dual Propulsion Power

The world's first underwater scooter with dual-propulsion systems, with power distributed on both sides for an instant speed experience. With three technical iterations and improvements, it offers high performance and reliability.

BMS Power Management System

Equipped with a Battery Management System (BMS) for battery safety, it includes multiple protection mechanisms.

Compatible with Action Cameras

Supports various action cameras to capture exciting moments; optional extension pole available for selfie functionality.

Speed Up to 1.6m/s

Powerful performance that rivals the women's 100 m breaststroke world record.

Lightweight and Portable, Battery Compliant with Aviation Standards

Only 20% the size and weight of traditional DPV underwater scooters.
