SUBLUE NAVBOW

Underwater Scooter

High Power, Long Duration
One Means All

DESIGN
AWARD

The SUBLUE Navbow is a top-of-the-range underwater scooter designed for speed and agility, with three speed settings reaching 7.2 km/h. Equipped with an OLED display for real-time tracking and a waterproof design down to 40 meters, it's ideal for professional diving. Lightweight and equipped with a smartphone app for a connected experience, the Navbow promises power and ease of use. It's ideal for long rides, with 1h autonomy. It comes with a carrying case compatible with airplane cabins.

3 Gears Speed Switch

Switch gears by pushing the button to experience the thrill of 'riding' easily and quickly in the sea.

Free model: 1 m/s (2.24 mph)

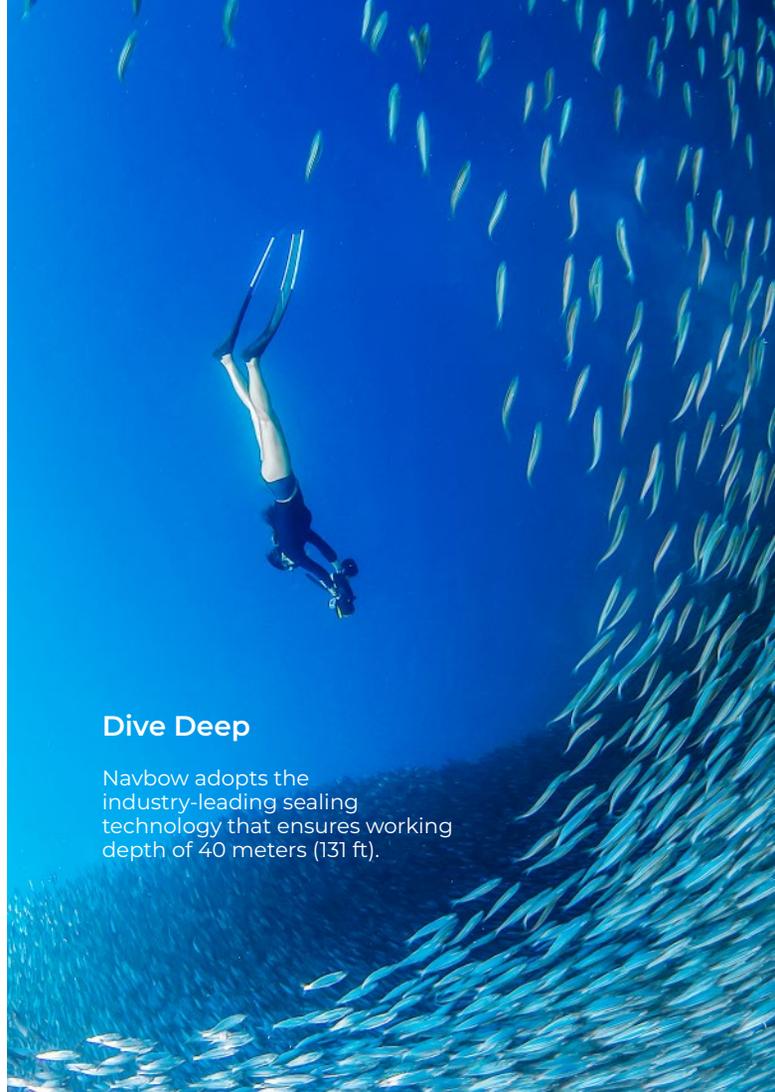

Sport model: 1.5 m/s (3.36 mph)

Turbo model: 2 m/s (4.47 mph)

60 Minutes Battery Life

Battery life lasts for 60 minutes in regular use.

Dive Deep

Navbow adopts the industry-leading sealing technology that ensures working depth of 40 meters (131 ft).

One-Handed Operation

The one-handed operation mode provides the opportunity to professionals who can dive deeper with a D-ring buckle and a single hand operation lanyard to connect the body to the Navbow.

OLED Display

The OLED screen displays the speed gear, battery life and hand operation mode.

Customize Your Photographic Base Plate

Navbow is able to mount a base plate where you can customize your professional equipment, such as action cameras, waterproof LED light, float arm, etc.

Low Battery Alert

Navbow will vibrate when the battery declines to 30%.

* The rated speed is the result of product test results and may be affected by user, user's swimwear and equipment, water conditions, etc.

* Battery life is for reference and based on product test data. It is the average value of the maximum time that the user can operate the scooter according to general usage (discontinuous operation) when the battery is fully charged.

* The scooter is designed for users 16+ years old. Minors must be accompanied by a parent or guardian while using the scooter.

A diver is shown underwater, holding a camera. The diver is wearing a mask and fins. The water is clear and blue. The diver's body is visible, and they are holding the camera with both hands. The camera is a professional DSLR with a lens. The diver is looking towards the camera. The background shows the surface of the water and some reflections.
