- On substrate with a minimum density of 558 kg/m^3 and with an A1 or A2-s1,d0 reaction to fire classification or on a plaster board substrate.
- Glued on the substrate with the glue referenced OVALIT T M (METYLAN) and with a rate of 200 g/m^2 to 275 g/m^2 and with a drying time greater than or equal to the drying time recommended for this glue.

5. LIMITATIONS

This classification document does not represent type approval or certification of the product.

"The classification assigned to the product in this report is appropriate to a declaration of conformity by the manufacturer within the context of system 3 attestation of conformity and CE marking under the Construction Products Regulation.
The manufacturer has made a declaration, which is held on file. This confirms that the products design requires no specific processes, procedures or stages (e.g. no addition of flame-retardants, limitation of organic content, or addition of fillers) that are aimed at enhancing the fire performance in order to obtain the classification achieved. As a consequence the manufacturer has concluded that system 3 attestation is appropriate.
The test laboratory has, therefore, played no part in sampling the product for the test, although it holds appropriate references, supplied by the manufacturer, to provide for traceability of the samples tested."
