Tech Village Call for Speaker Guidelines

📅 1–3 September 2026 | 🌐 Tempelhof Airport, Berlin | ▀ A Hsubject Brand

About Tech Village

The Tech Village is the technical stage at icnc26. Alongside the main stages, which set out the industry's direction, it is the space for deep technical detail, built for engineers, technical experts, and product people. This brief covers what the Tech Village is, what to present, and how to apply for a speaking slot.

The Tech Village at last years icnc25.

About Tech Village

About

First held in 2024, the Tech Village returns for its third edition at icnc26. It is a deliberately intimate space. A small stage with a silent, headphone-based listening setup means the audience is genuinely tuned in and focused on the detail. Alongside the stage sit a demo and testing area and a dedicated truck area, where Hsubject runs live demonstrations and testing with partners across all three days, spanning passenger, fleet, and heavy-duty charging.

This year's sessions sit under the icnc26 theme:

"COLLABORATION AT SCALE: ESTABLISHING THE OPEN SMART CHARGING ECOSYSTEM"

and the Tech Village is where that theme is explored in technical depth, in front of a focused, attentive audience.

Speaking slot format

Each slot is 15 minutes: a Ted Talk style presentation followed by a short Q&A.

Speaking slots are limited. The speaking slots will be allocated to one of the three days with a specific time slot. Those that win the time slots will be notified on 3rd August with the actual day and time.

Sessions will be recorded and shared on YouTube after the event, so a presentation reaches an audience well beyond the room.

15 min

PRESENTATION

What to present

Suggested topics include building an open smart charging ecosystem, interoperability, smart charging, ISO 15118-20, and Plug&Charge. Speakers are welcome to propose their own angle, as long as it speaks to the technical audience and this year's theme.

SMART CHARGING

OPEN ECOSYSTEM

INTEROPERABILITY

ISO 15118-20

PLUG&CHARGE

...

Application

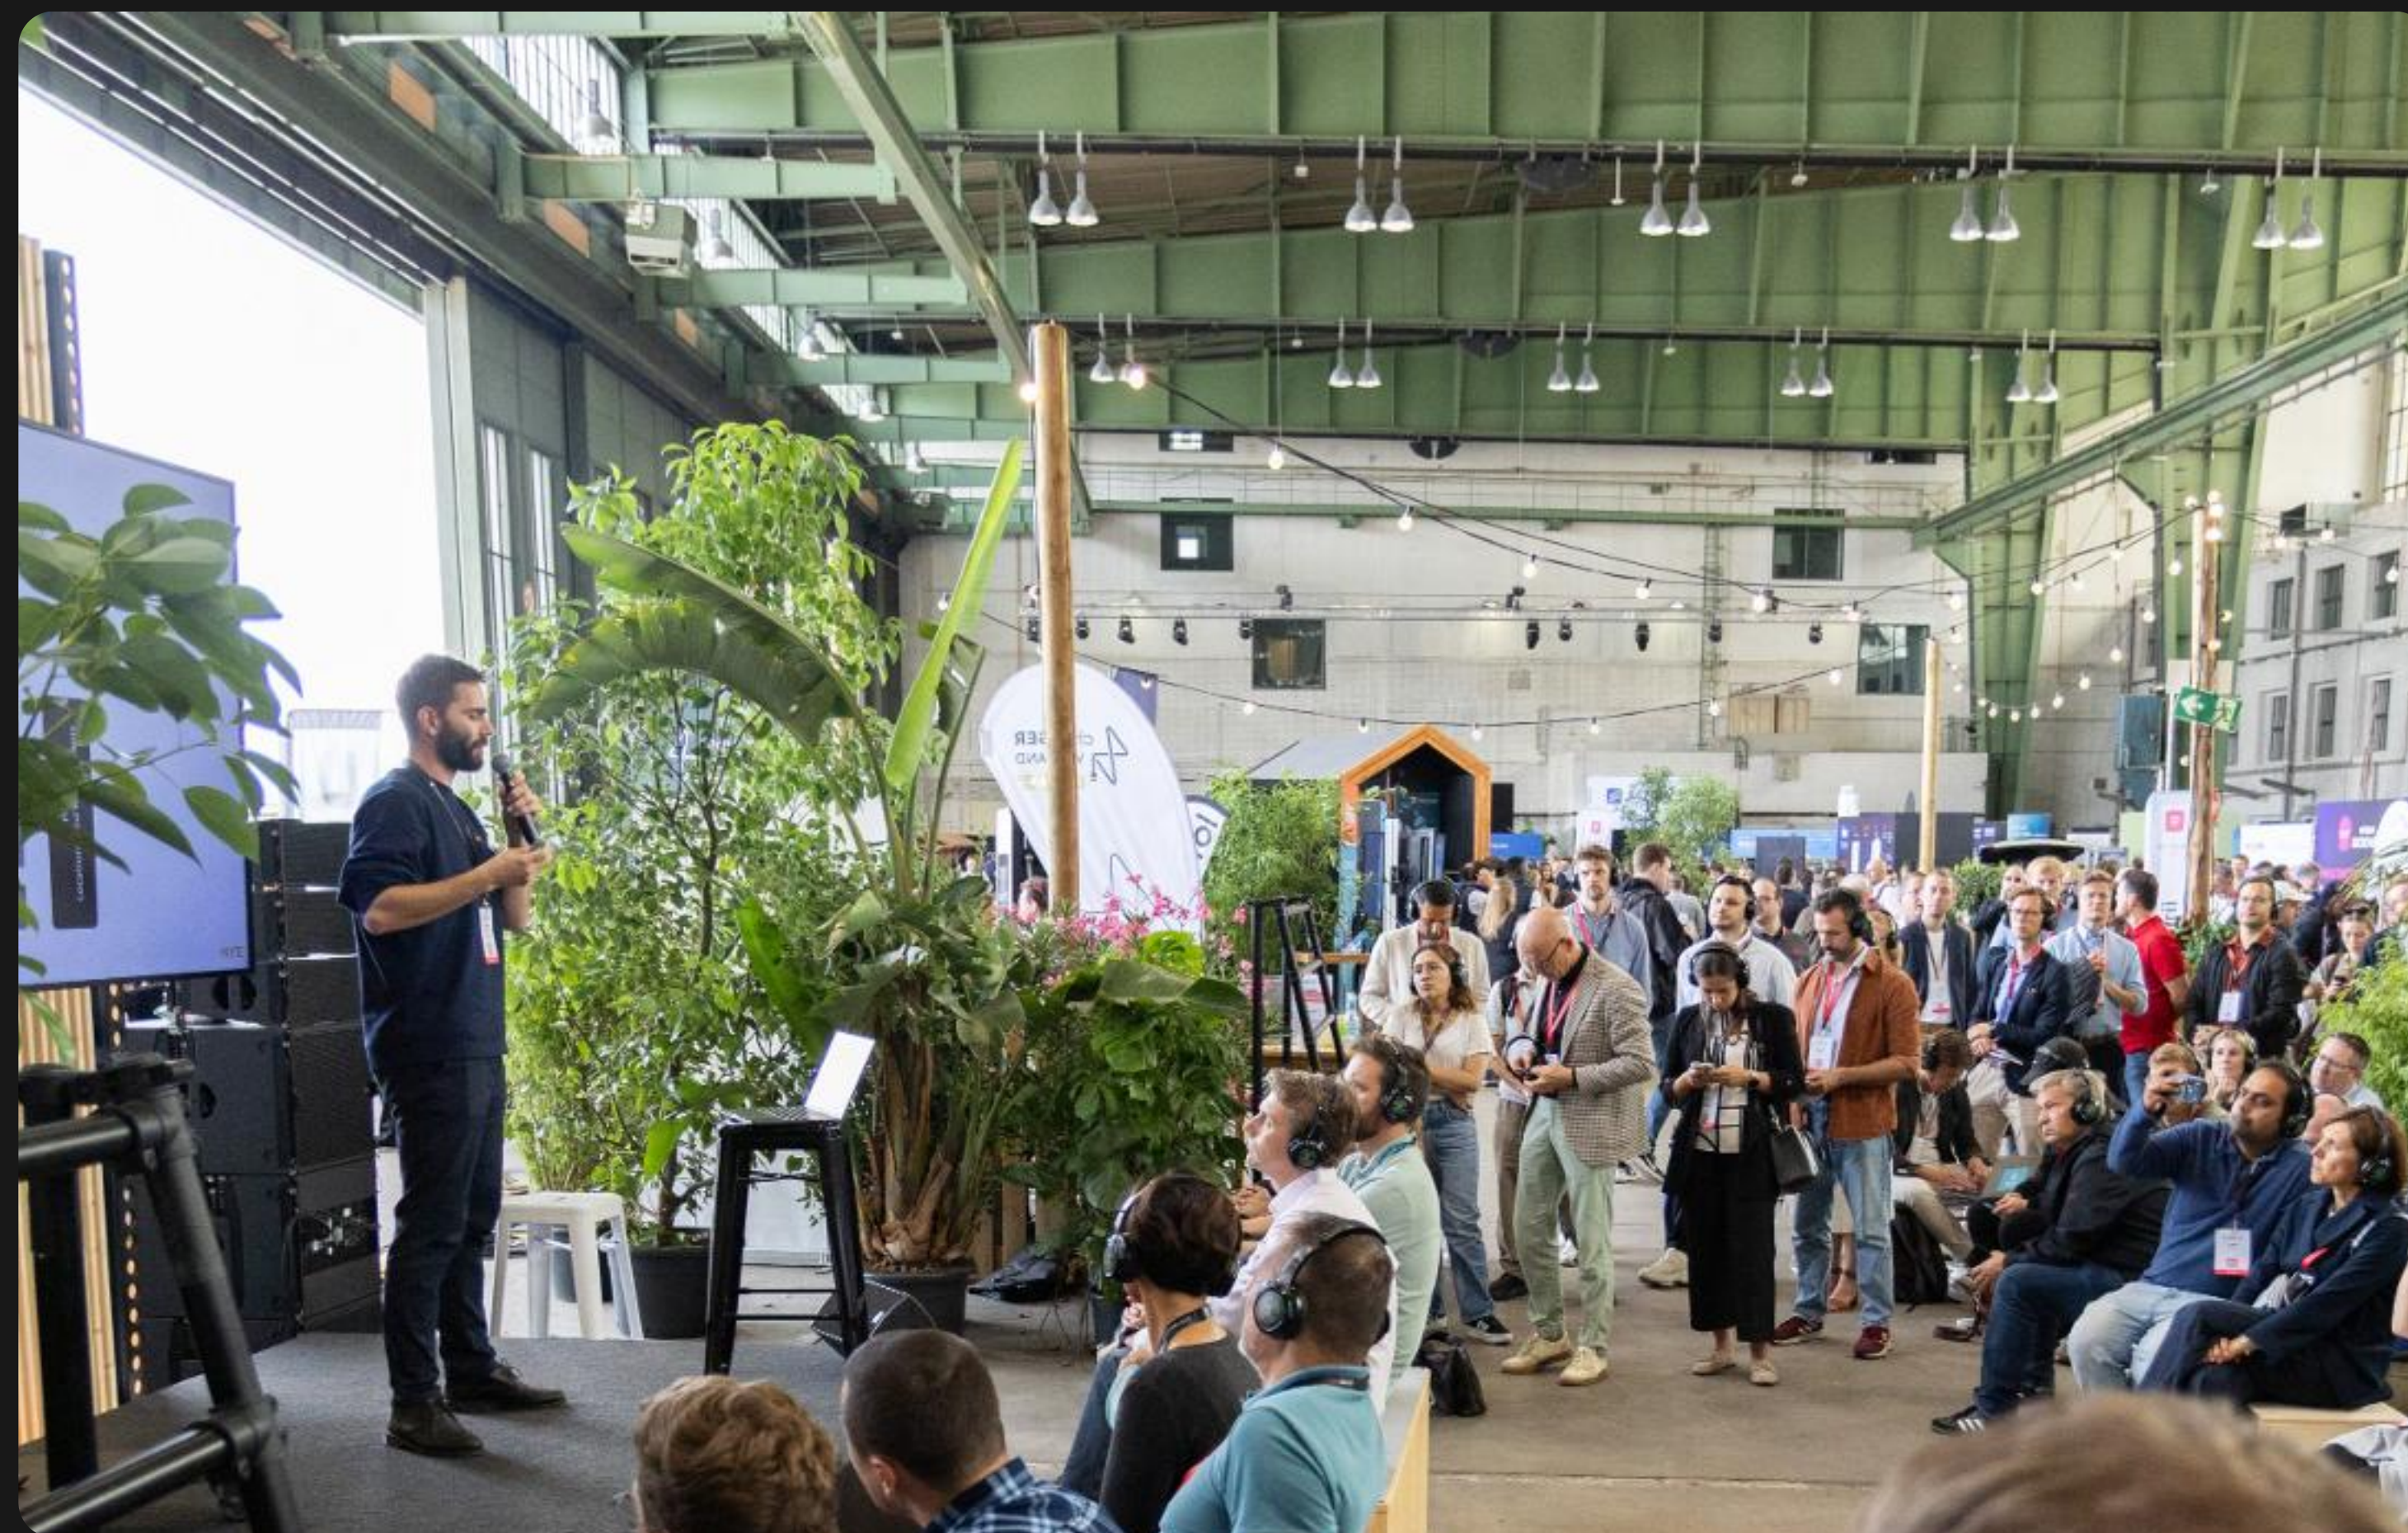

How to apply?

Submit the following to
tech-village@intercharge-network-conference.com
by 20th July 2026:

- Speaker name and job title
- Company name
- Session presentation title
- A short description of the session, including how it connects to the icnc26 theme: "Collaboration at Scale: Establishing the Open Smart Charging Ecosystem"
- A short bio covering the company and what it works on

All applicants including those that win one of the speaking slots will be contacted after submissions close, by 3rd August 2026.
