

Make safer products, faster.

Genista

The operating system for product safety.

The problem. Testing hasn't kept up with production.

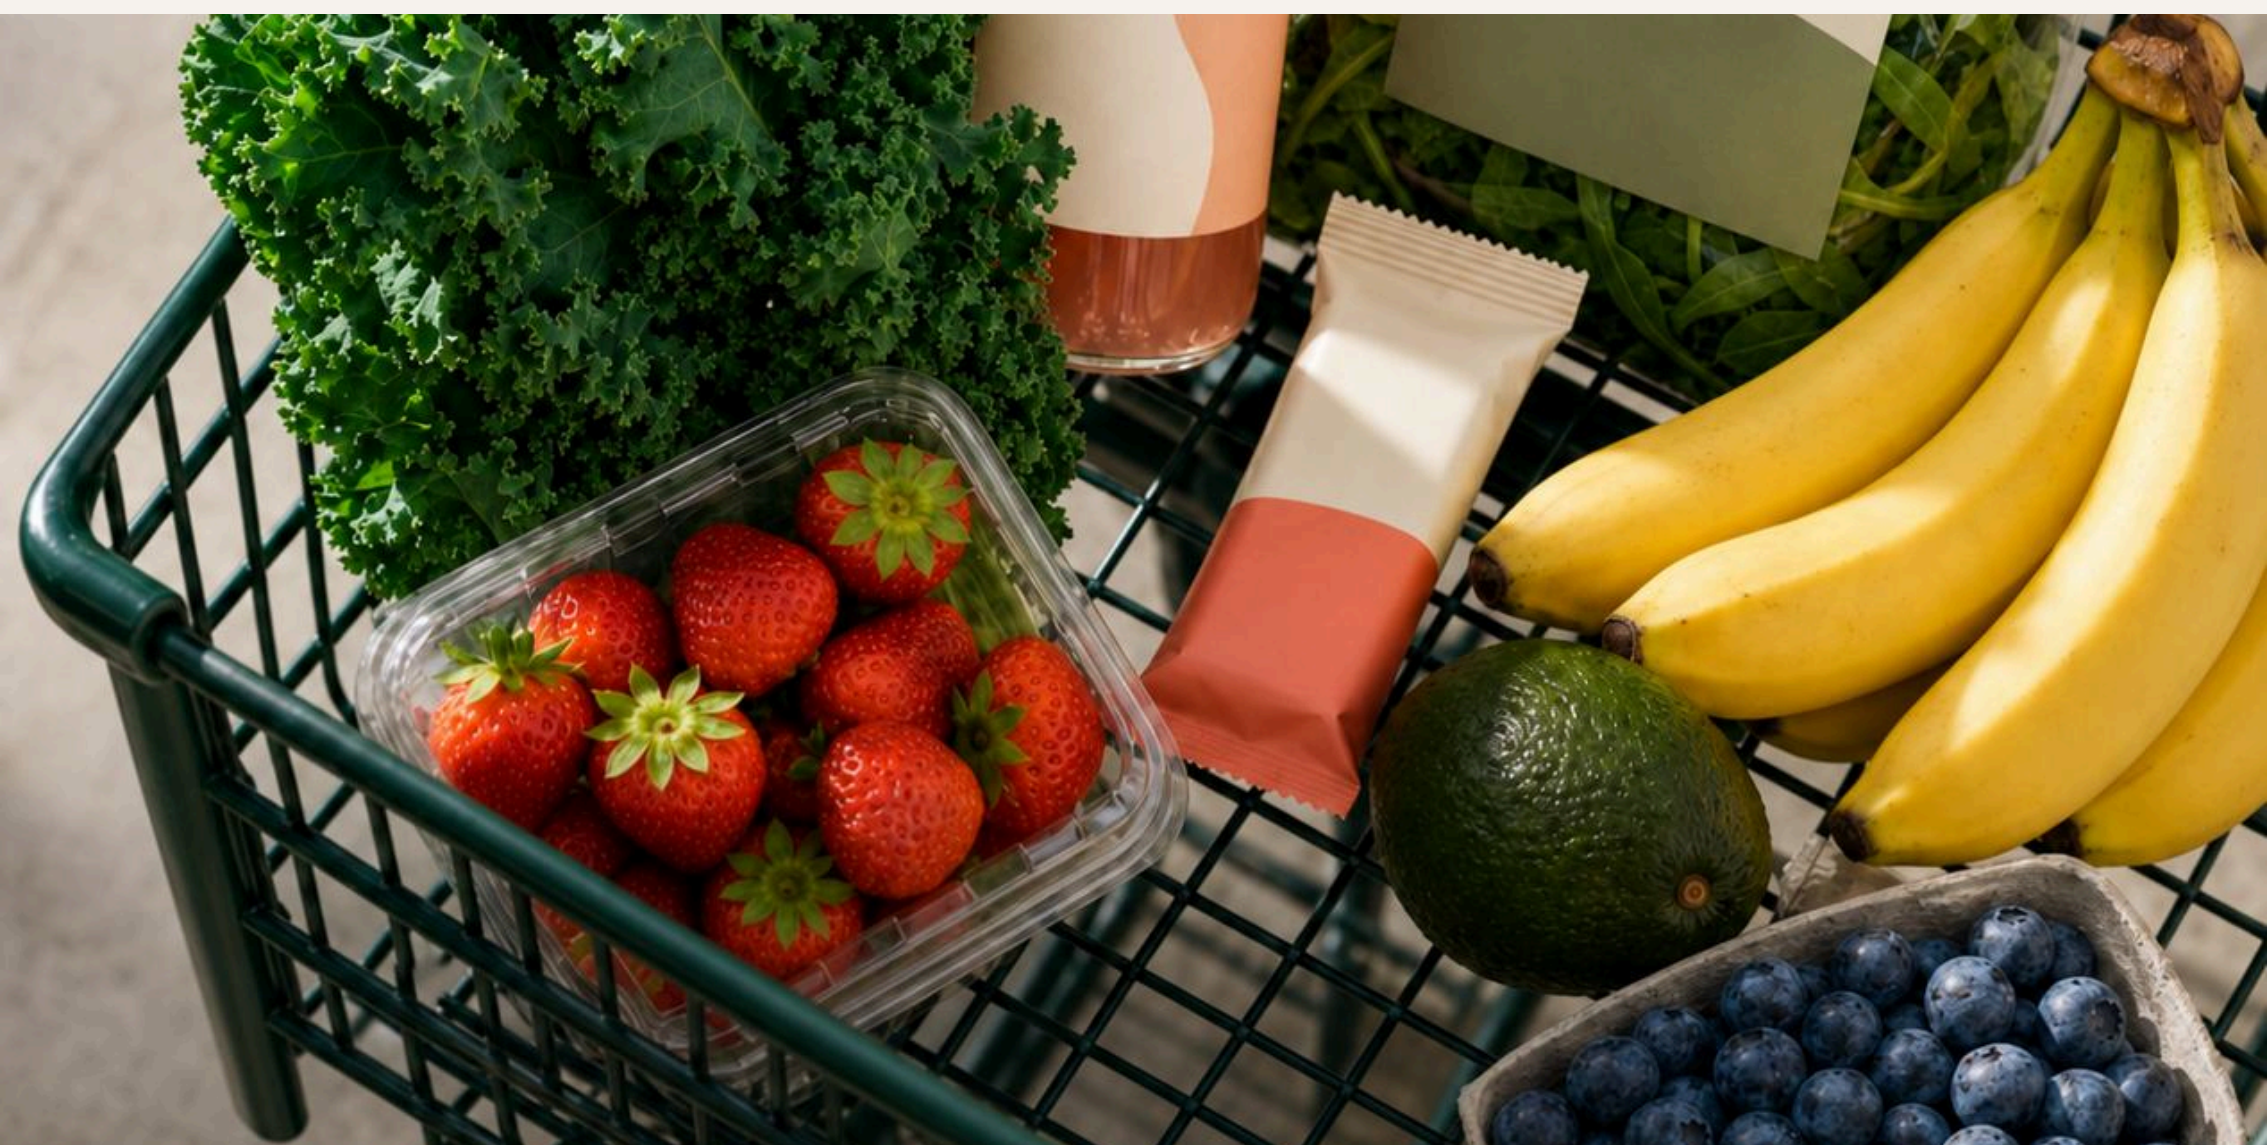

Most quality teams are running samples through several labs, a portal for each one, and a spreadsheet to hold it together. Batch release waits on all of it.

The Usual Setup

- Several labs, several portals
- Results in three to five days
- Spreadsheets between systems
- Chain of custody rebuilt by hand
- Per-test invoices

With Genista

- One platform, one record
- Next-day turnaround on most tests
- Real-time status on every sample
- Chain of custody captured for you
- One subscription scaled to throughput

What you get.

Four capabilities, one closed loop.

Your testing, workflows, data, and services run as one system, so results, data, and documentation stay connected from sample to sign-off.

6 Disciplines

- Contaminants
- Wet Chemistry
- Specialty
- Microbiology
- Vitamins
- Sensory

SAFER OUTCOMES

Accredited Testing

- ISO-17025 aligned.
- Defensible, validated results.
- Fully meets regulatory standards.
- Full chain of custody, always audit-ready.

FASTER CYCLES

Lab Robotics

- 24 hour turnaround, no expediting fees.
- Precision at scale, no manual steps.
- Fewer errors and false positives.
- Consistent, repeatable results.

SMARTER DECISIONS

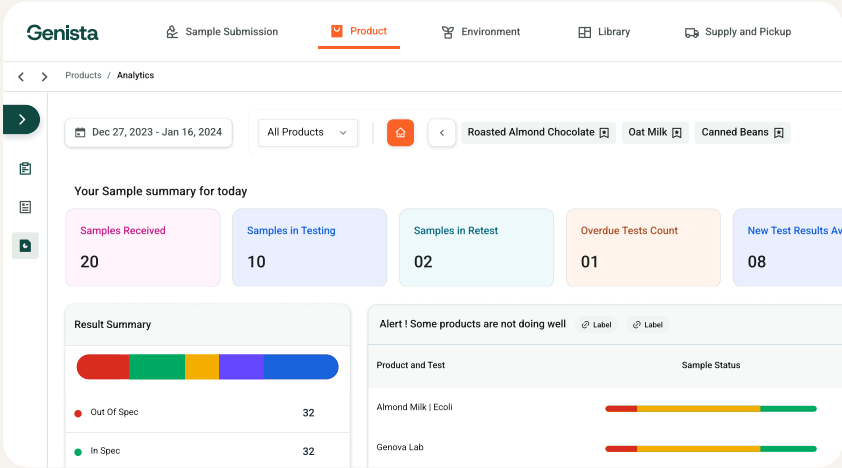

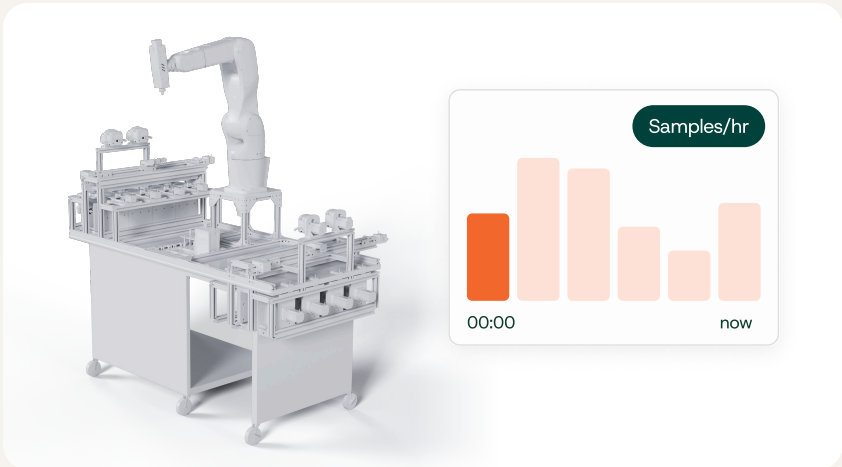

Intelligent Software

- Real-time results and alerts available 24/7.
- Filters and search to narrow down results.
- Spec manager to define or update specs.
- Intuitive color-coded summaries.
- Automated trends and analytics.

SIMPLER OPERATIONS

Managed Services

- Dedicated CSAM support.
- Scientific advisory on-demand.
- Proactive logistics and ops support.
- Onboarding and training from day one.
- Scale your program without adding headcount.

5 Things Included Free (based on volumes)

- Retests
- Daily sample pickup
- Same-day lab delivery
- EMP testing kits
- Shipping supplies

Scientific Advisory, On Demand

- Product development
- Shelf-life studies
- Validation studies
- Challenge studies
- Method development

The proof. Science you can trust.

Accredited, verified, and
benchmarked. Results that FDA,
retailers, and regulators accept.
