

AIRTITE PIPE

A Stainless Steel Piping System from Industrial Gold

Fast and Easy Installation with Press Fittings

Secure, leak-free joints that last. Airtite Pipe and fittings connect in 15 seconds or less, with no special training required

Durable & Dynamic

Maximum working pressure of 16Bar/235PSI
Working temperature range of -4 °F/-20°C to 176 °F/80 °C
ASME B31.1 & ASME B31.3 certified
Fluid Group: 2

Pipe and Fittings from ½" to 6"

With a complete range of fitting types and sizes, we have everything you need to get the job done

Corrosion Free

Airtite Pipe and fittings are stainless steel, made to stand up to the toughest jobs while keeping its clean appearance

Cost Effective

Save on material costs compared to copper and aluminum

- Connections can be made wet or dry for quick repairs on existing systems
- Make secure press connections in fifteen seconds or less
- Press technology eliminates the need for soldering
- More than 300 different fitting configurations
- Configurations include couplings, elbows, reducers, tees, adapters, unions, caps, flanges, and valves
- ASME B31.1 & ASME B31.3 certified
- Maximum working pressure of 16Bar/235PSI
- Working temperature range of -4°F/-20°C to 176°F/80°C
- Rated for Fluid Group 2
- PED/ASME rated working temperature range -4°F to 180°F
- Designed to convey a variety of fluids, including compressed air, natural gas, inert gases, chilled water, hot water, process water, waste water, chemicals, acid solutions, caustic solutions, low-pressure steam (15 PSI max), and hydraulic oils

Industrial Gold

Quality Air Compressors at a Great Price.

About Us

Industrial Gold has been in continuous operation since 1996 under the ownership of the Ratterree family. Industrial Gold is based in Mansfield, Texas, and is the largest family-owned privately held air compressor manufacturer in the US. We manufacture rotary screw and reciprocating air compressors driven by gas, diesel, electric, lithium batteries, natural gas, and hydraulic motors. We also own the controlling interest in our air compressor pump manufacturing facility in the Jiangsu Region of China.

We're Within Reach

Industrial Gold is centrally located in the United States and able to reach most of the country with 2-day shipping.

Service Anytime, Anywhere

Our service network extends to over 950 service partners across the US and Canada.

Stock on Hand

We are not a JIT manufacturing company and believe in having stock on hand.

Our Commitment to Quality and Consistency

We prioritize quality and durability in every air compressor we manufacture. We fully test every compressor from 0 psi to max pressure.

What More Could You Ask?

Quality and affordability is designed into every air compressor we make. We manufacture many of our own parts, use only the best components, and assemble every unit by hand to ensure you get the best product on the market. No question about it, these are the most reliable, easiest to use, and simplest to maintain compressors available. And with over 45 years of experience, you can rest assured that quality and affordability will continue to be our goal.
