JUICE.ME

THE JUICY TASTE OF NATURE

The perfect concept for businesses who want to serve the growing demand of healthy food options. We offer to entrepreneurs, contractors, vending operators the opportunity to develop an independent and successful business opportunity with our state-of-the-art healthy vending machines that offer fresh and natural juices to satisfy the most demanding markets.

TRANSPARENT WINDOW

A wide, anti-vandalism glass window allows to watch the entire process; an eye catching process for your clients while waiting for the 30 seconds of serving.

SELF CLEANING

You don't need to worry about cleaning the machine as the automatic internal self-cleaning uses high power water jets to clean all parts in touch with the juice. It can be set by time or by number of cups used. For a more efficient hygiene it is possible to add a sanitizing solution with antibacterial action.

QUALITY OF JUICE

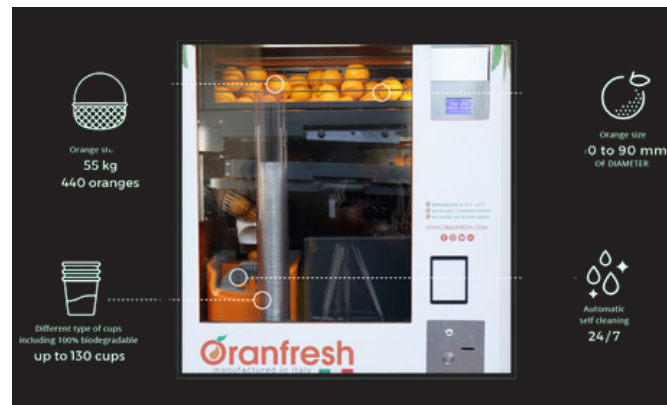

The patented cold process squeezes the juice in a delicate way. The orange juice never touch the bitter peel oil neither the external surface of the fruit. You'll have the fresh and product to offer as the juice keeps all its taste and benefits. Naturally good, the juice needs no water or sugar to be added.

DISPENSING CAPACITY

Hermetically insulated and fully refrigerated, with storage for 50 kg/121 lb of oranges for dispensing around 110 cups of freshly squeezed orange juice (3-4 oranges per cup).

LCD AUDIO/VISUAL DISPLAY

The vending machine boasts a new 7" LCD display with an interactive proximity sensor and audio/video functions, allowing you to customize your business activity.
