PERFORMANCE FIT SYSTEM
SPRING 2026 CATALOG

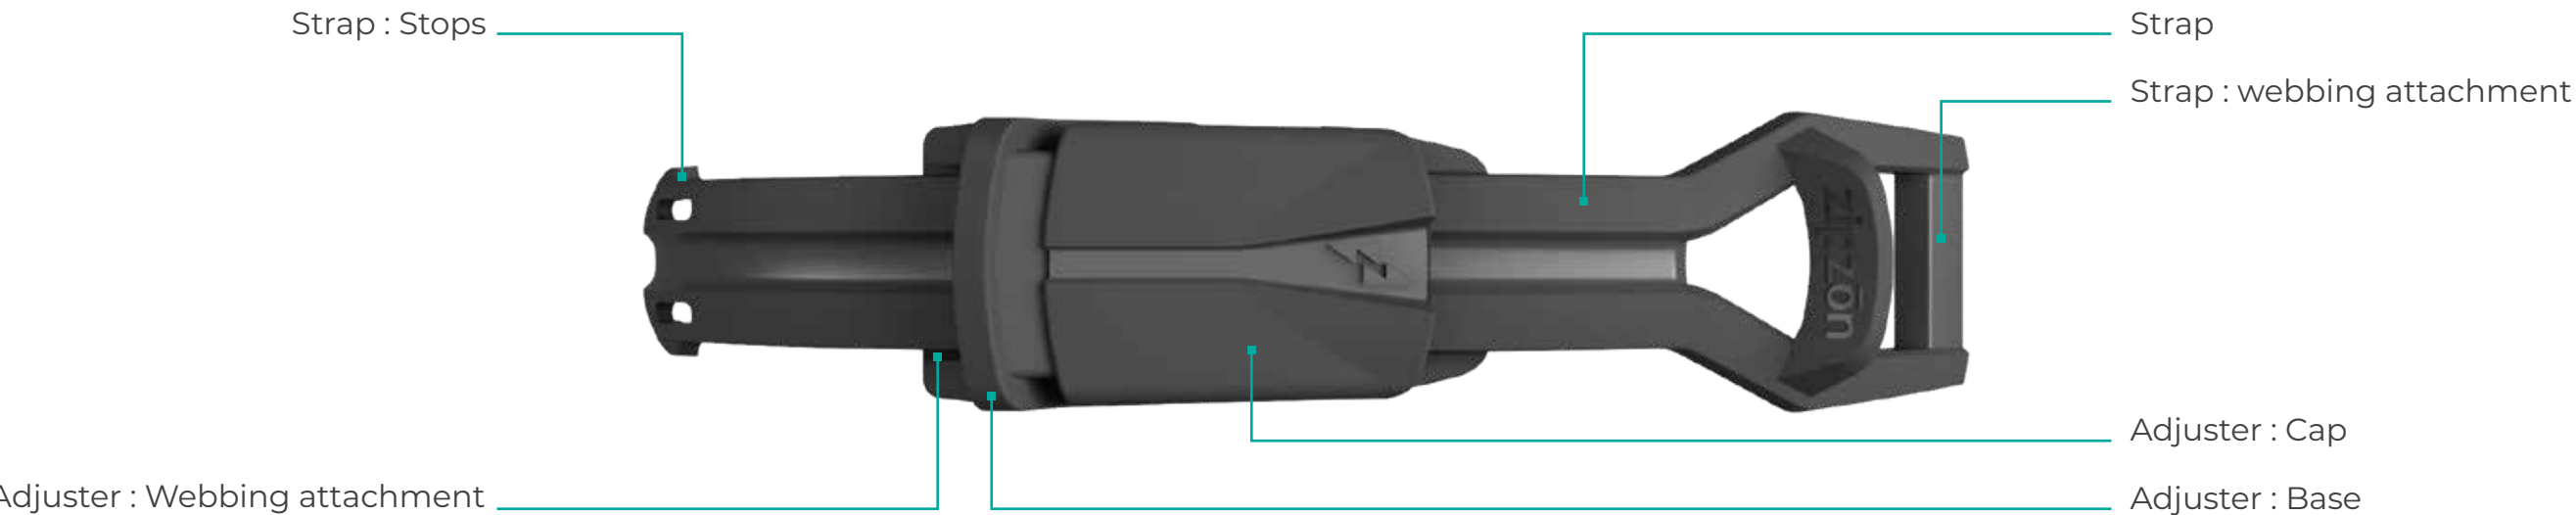

SIMPLICITY. ADAPTABILITY. PERFORMANCE.

zipzōn partners with best-in-class footwear manufacturers to elevate fit, form, and function. Our patented quick-adjust fit system replaces laces, hook & loop closures, and other outdated methods with a faster, more adaptable, tested and proven solution. The result: a user-friendly system that unlocks new possibilities across the board, brings premium fit technology to more people, and redefines performance.

Z20-Engineered for Performance

The zipzōn® Z20 Fit System is built to endure. Crafted with advanced materials and state-of-the-art manufacturing, it delivers precision, strength, and lasting durability—even in demanding conditions.

Z20 offers on-the-go adjustability for comfort, support, and control—tailored to your fit and your movement. Designed for performance footwear as well as casual and light-duty work shoes, the system adapts seamlessly across low- and mid-cut styles, optimizing for quick entry, stability, heel hold, or efficiency depending on configuration.

Z20 System:

Depending on the selected configuration, the system can be optimized for simplicity, quick entry, comfort, or specific performance needs such as stability, heel hold, efficiency, or injury prevention.

All components are made from advanced materials that offer high mechanical strength and rigidity, excellent wear resistance, and reliable toughness—even in low-temperature environments. The system also provides strong chemical resistance, ensuring long-term durability in demanding conditions.

The zipzōn Z20 Fit System is an ideal solution for:

- Performance Footwear
- Running/Trail Running
- Cycling
- Court Sports
- Golf
- Casual
- Work

zipzōn Z20 System weights:

Adjuster + Medium Strap:	3.5g
Adjuster + Large Strap:	3.7g
Adjuster + Extra Large Strap:	4.0g

Z20 Adjuster

Low Profile. High Performance.

The Z20 Adjuster is compact—less than an inch long—but engineered for strength, reliability, and ease of use. Designed for operational loads up to twenty pounds, its patented construction ensures consistent performance, while the low-profile design prevents snagging. Quick, intuitive, single-handed adjustments make it as user-friendly as it is durable, adaptable across a wide range of footwear applications.

Technical Details:

Operation: 20lbf/90N
Safety slip: 35lbf/155N
Break: 50lbf/245N

Spring: Stainless Steel

Weight: 0.07oz/2g
Indexing: 0.005inches/1.5mm

Attachment: 10mm Webbing or upper material loop

PART# Z20-001 Standard Adjuster

Z20 Straps

Built to Hold. Made to Move.

zipzōn® Z20 Straps are engineered with limited stretch for reliable performance and precision adjustability in all conditions—without sacrificing comfort. They deliver a snug yet dynamic fit, balancing stability with flexibility. Designed to prevent hot spots and pressure points, while the low-profile ladder design keeps the system adaptable across a range of footwear applications—and beyond. Offered in three sizes, Z20 Straps allow for multiple configurations and perfect grading.

Versions:

Z20-StopStrap – Designed to stay fully engaged within the buckle, ensuring a secure fit and intuitive use. Recommended as the standard for low-cut footwear, while also enhancing shelf appeal.

Z20-OpenStrap – Built to fully disengage for easier entry and exit, ideal for mid- and high-cut boots or challenging instep installations on low-cut shoes.

Technical Details:

- Operation: 20lbf/90N
- Safety slip: 35lbf/155N
- Break: 50lbf/245N

- Medium: 75mm
- Large: 95mm
- Extra Large: 125mm (Webbing to tip)

- Attachment: 10mm Webbing or upper material loop

- PART# Z20-006 StopStrap Medium

PART# Z20-007 StopStrap Large

PART# Z20-008 StopStrap Extra Large
- PART# Z20-026 OpenStrap Medium

PART# Z20-027 OpenStrap Large

PART# Z20-028 OpenStrap Extra Large

Z20 TunnelStraps

Engineered to Disappear.

zipzōn Z20 TunnelStraps are designed to conceal strap ends within tunnels or garages—improving aesthetics, aerodynamics, and durability by protecting against wear and snagging.

Available in M, L, and XL lengths, each strap features a 15mm extension beyond the stops, ensuring a secure bridge between the adjuster and tunnel entrance.

This added gap not only supports ergonomics but also simplifies factory installation and replacement when needed.

For optimal use, refer to Best Practices for guidance on tunnel or garage construction and integration.

Technical Details:

Operation: 20lbf/90N
Safety slip: 35lbf/155N
Break: 50lbf/245N

Medium: 75mm +15mm
Large: 95mm +15mm
Extra Large: 125mm +15mm (Webbing to tip)

Attachment: 10mm Webbing or upper material loop

PART# Z20-036 TunnelStrap Large
PART# Z20-037 TunnelStrap Extra Large

Z20 Components:

Guided by Design.

Webbing extends the reach of the Z20 Fit System, creating simple, natural, and comfortable configurations.

All zipzōn® components are engineered to keep webbing running smoothly, avoiding unnecessary friction or jam-ups, while delivering reliable, repeatable performance.

PART# Z20-020 10mm Slot Guide

PART# Z20-023 10mm Ring Guide

Guides

zipzōn® guides ensure smooth routing and secure placement across a variety of footwear styles.

Z20 Slot Guide

Low-profile and low-friction, sew-in Slot Guides are ideal for placement within the eye-stay, beneath an upper flap, or under a canopy. Made from an easy-to-install material.

Also ideal as a trim to terminate 10mm webbing on any upper.

Z20 Ring Guide

Ring Guides provide a cost-efficient solution for redirecting webbing, particularly in Speed-Fit configurations. Attached with a short piece of webbing, they deliver adaptable routing at minimal weight and cost.

Z20 Webbing

Performance Is in the Details

For best and consistent performance we require the use of our custom developed webbing.

Z20 Webbing

Developed in collaboration with footwear webbing leader Paiho Group, Z20 webbing is engineered for compatibility across all system components.

Z20 Webbing offers low friction for smooth operation and minimal stretch for consistent fit. The material along with a CO-DWR treatment ensures stability in wet and dry conditions and sheds dirt and debris for long-term reliability.

zipzōn can supply limited quantities for development purposes.

For production and custom colors, brand partners may order directly from Paiho Group at no upcharge. Article# TP01-295

PART# Z20-025-01 – 10mm Webbing, Pantone Black 6C
PART# Z20-025-02 – 10mm Webbing, Pantone White 000C
PART# Z20-025-03 – 10mm Webbing, Pantone Cool Gray 9C

Z20 Stock Colors

To accommodate development, testing and sampling needs all Z20 System componets are stocked in limited quantities for immediate shipping.

Components are available in three colors.

- Pantone Black 6C
- Pantone White 000C
- Pantone Cool Gray 9C

Z20 Fit Configurations

Fit Made Simple

The Z20 System is designed to give footwear brands flexibility without complexity. Two core configurations deliver the right balance of speed, comfort, and performance—whether the goal is all-day wearability or sport-level precision.

SPEED-FIT

Solo Zone Adjustment

The fastest path to better fit. A single adjuster controls the entire system, delivering quick entry, even tightening, and reliable hold across the foot. Ideal for casual, lifestyle, and light-performance footwear where simplicity and speed matter most.

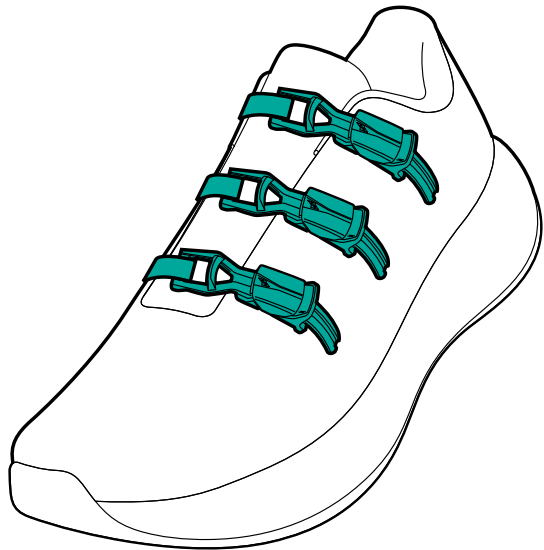

CUSTOM-FIT

Multi-Zone Adjustment

Adaptability for peak performance. Independent adjusters control separate zones—such as forefoot, midfoot, and heel—so the fit can adapt to movement, materials, and individual preference. This configuration maximizes precision, heel hold, and responsiveness for demanding applications.

Z20 Tested Configurations

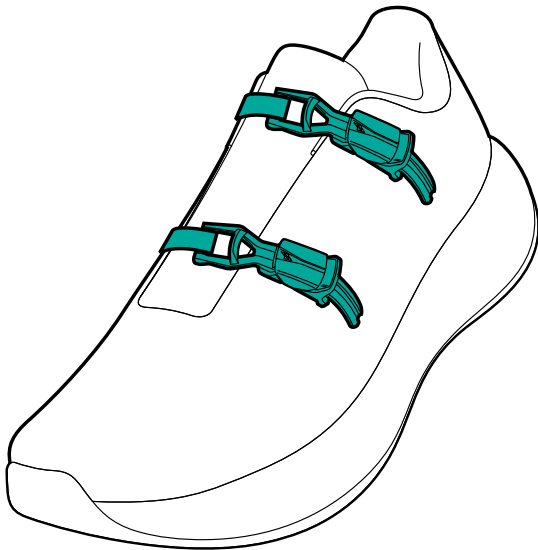

Z20-Custom-Fit-01
3 Zone 3 Strap

Recommended Components (per pair for size US9):

- Adjusters:**
6x Z20-001 Adjuster
- Straps:**
4x Z20-007 StopStrap L
2x Z20-006 StopStrap M

Components:
-

System Price: \$4.50 per pair

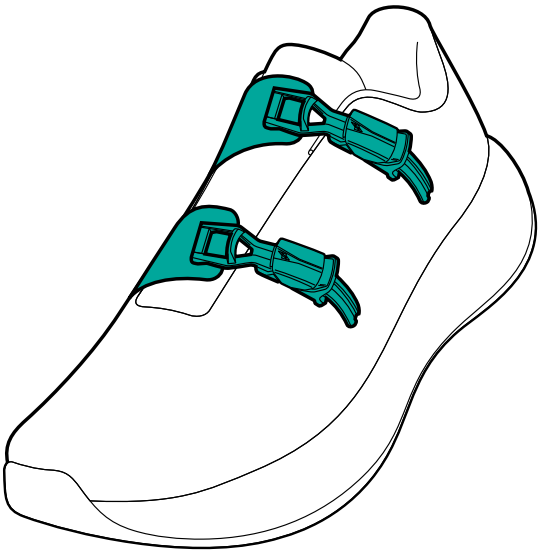

Z20-Custom-Fit-02
2 Zone 2 Strap

Recommended Components (per pair for size US9):

- Adjusters:**
4x Z20-001 Adjuster
- Straps:**
2x Z20-007 StopStrap L
2x Z20-006 StopStrap M

Components:
-

System Price: \$3.00 per pair

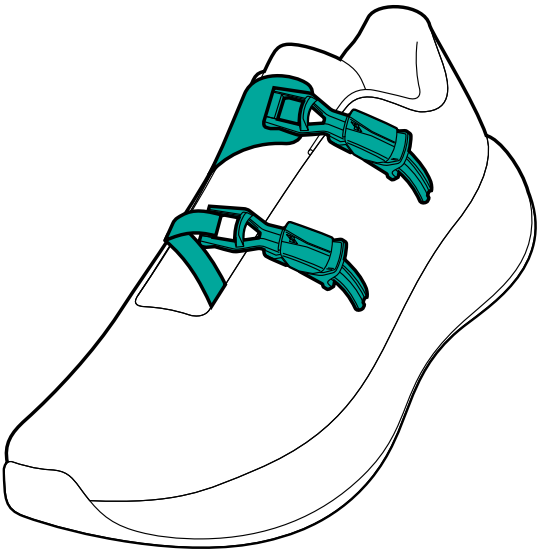

Z20-Custom-Fit-03
2 Zone 2 Canopy

Recommended Components (per pair for size US9):

- Adjusters:**
4x Z20-001 Adjuster
- Straps:**
2x Z20-007 StopStrap L
2x Z20-006 StopStrap M

Components:
-

System Price: \$3.00 per pair

Z20-Custom-Fit-04
2 Zone Upper Canopy Lower V

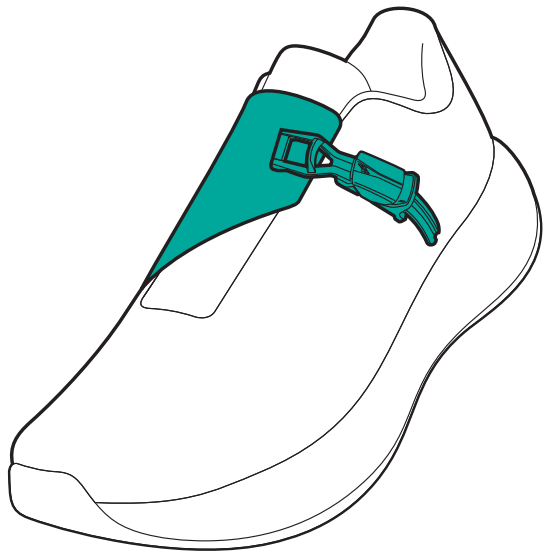

Recommended Components (per pair for size US9):

- Adjusters:**
4x Z20-001 Adjuster
- Straps:**
4x Z20-007 StopStrap L

Components:
2x Z20-020 Slot Guide Or Z20-023 Ring Guide

System Price: \$3.20 per pair

Z20 Tested Configurations

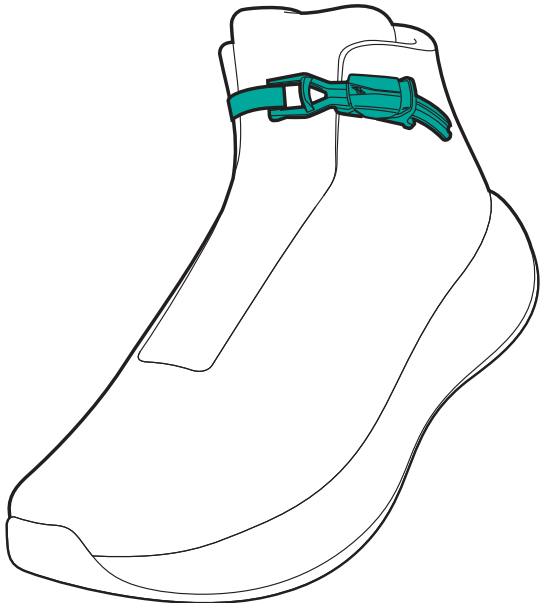

Z20-Speed-Fit-01
1 Zone Canopy

Recommended Components (per pair for size US9):

- Adjusters:**
2x Z20-001 Adjuster
- Straps:**
2x Z20-007 StopStrap L

Components:
-

System Price: \$1.50 per pair

Z20-Mid-Cut-01
1 Strap

Recommended Components (per pair for size US9):

- Adjusters:**
2x Z20-001 Adjuster
- Straps:**
2x Z20-027 OpenStrap L

Components:
-

System Price: \$1.50 per pair

Z20-Mid-Cut-02
1 Canopy

Recommended Components (per pair for size US9):

- Adjusters:**
2x Z20-001 Adjuster
- Straps:**
2x Z20-027 OpenStrap L

Components:
-

System Price: \$1.50 per pair
