# Chromia

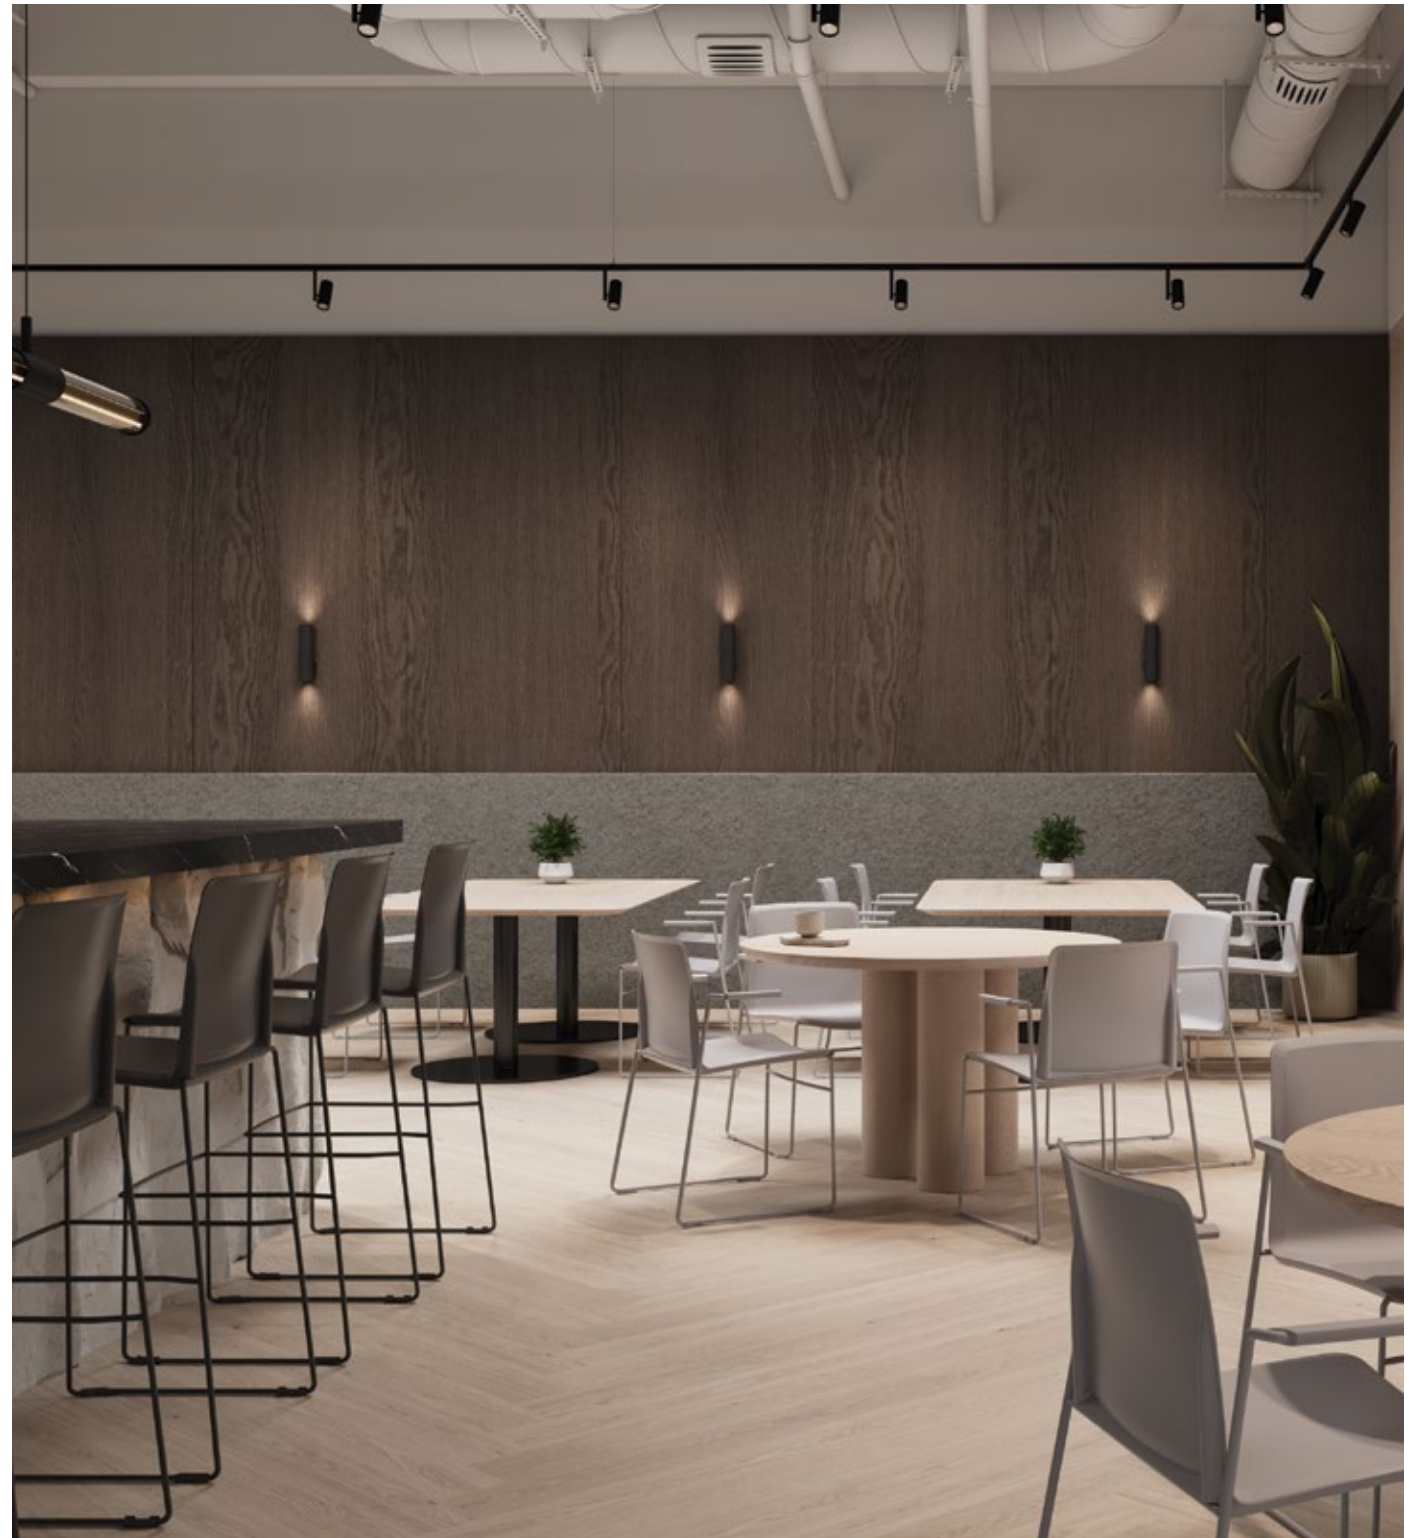

# Chromia

by Bang Design

Chromia is a study in color, where structure meets saturation. Designed by Bang Design, Chromia features twelve curated poly shell hues paired with matching and complementary powder coat finishes, offering a refined spectrum of possibilities. Designed as a collection of seating, it allows designers to layer, contrast, and compose with color across a range of environments.

Chromia

With options including guest, swivel, counter, and bar stool models, Chromia adapts seamlessly to diverse applications. Upholstered seat pads and fully upholstered options add another layer of comfort and customization, while sled and 4-leg guest and stool models offer high-density stacking capabilities. A transport dolly is also available, supporting ease of movement and efficient storage.

Rooted in Italian form and modern performance, Chromia pairs precision-molded poly shells with durable powder coat bases in a system that invites contrast or cohesion. Designed to adapt. Designed to endure. Designed to express. Chromia is derived from the Italian word cromia, meaning color palette and tonal range, implying a spectrum, a gradation, or a study of color variation. It doesn't just mean "color." It suggests intentional color, curated, layered, expressive color. Designed for designers, Chromia is suited for contemporary workplace, education, healthcare, and hospitality environments.

# Featured Products

# Charm

Designed by Gemma Bernal

Designed with intention, Charm is a compact, welcoming seat that radiates comfort—offering a sense of ease that gently embraces you. Soft, curved lines eliminate sharp edges, ensuring that every point of contact—especially where you rest your arms—feels smooth and natural. This thoughtful design delivers both aesthetic harmony and practical comfort.

Charm

# Meets

Designed by Thijs Smeets

# Paisans

By Berg & Hindenes

With its Scandinavian-inspired aesthetic, lightweight scale, and sustainable design principles, Paisans is more than just a seating solution—it's a statement of style, comfort, and responsibility.

# Zenith

Designed by SF&M and  
Emanuele Bertolini

Zenith is the ideal solution for meeting rooms, learning environments, auditoriums, corporate spaces, and multipurpose rooms, all spaces where adaptability and efficiency are key.

# Martini Family

Designed by Gemma Bernal

With its soft curves, the Martini family embraces the user for an enhanced seating experience. A graceful shell envelops to create an aesthetically pleasing form that is not compromising in comfort. The added seat cushion amplifies the experience.

Height-Adjustable Swivels

# Martini

Lounge

# Celebrate

Designed by Pensi Design Studio

Celebrate is timeless with a gently flexing polypropylene shell and a myriad of frame options that gives it versatility for an extensive range of applications.

# Bliss

Bliss “a state of extreme happiness” - perfectly captures what this collection brings to the market. The gentle contours of the seat and back deliver exceptional comfort, giving Bliss true meaning behind its name.

# Nordic

Designed by Berg & Hindenes

With its unique character and durable structure, Nordic is ideal for collaborative corporate spaces, lively hospitality spaces, or high traffic lobbies. This modern take on a classic lounge is the ultimate in style and comfort.

# Font

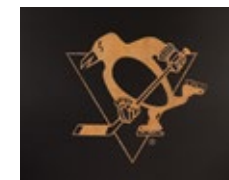

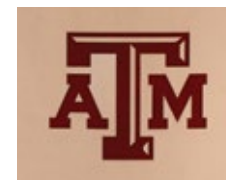

Designed by Mike Shields

Font is timeless with a gently flexing polypropylene shell and a myriad of frame options that gives it versatility for an extensive range of applications.

# Laser Engraving

We offer the ability to laser engrave almost any logo onto our wood back chairs, creating a distinctive and customized look for your space. Let us bring your brand or design to life with precision and craftsmanship.

# Cache

Cache is dedicated to simplicity, durability, and practicality. Cache chairs are available in three back shapes, three seat widths, and a multitude of frame and upholstery options. In addition the Cache family offers stools and occasional tables.

# Jump

By Claus Breinholt

A modern, playful, and versatile design with multiple base and shell options places this seating family in meeting rooms, learning environments, corporate spaces, and multipurpose rooms.

# Fjord

By Joachim Jensen

The organic shape, light weight scale, and free-flowing curves of Fjord's shell are made possible with 3D veneer technology. The infinite loop wire frame creates a dramatic back detail. The four leg frame offers stunning wood arm caps to match the wood shell.

# Axis

**By Just Meyer**

Timeless in design and limitless in application, Axis is a classic multipurpose chair with a very high seating comfort. Axis has a contoured laminated wood shell with upholstery options providing optimum comfort for seamless integration across contract markets.

# Scape Lounge LT Tables

Designed by Mitch Bakker  
IDA Design

Scape lounge offers twenty-three components in multiple heights and shapes to perform in any work, education, or hospitality setting. Power capabilities are an option, as well as secondary worksurfaces for the high back.

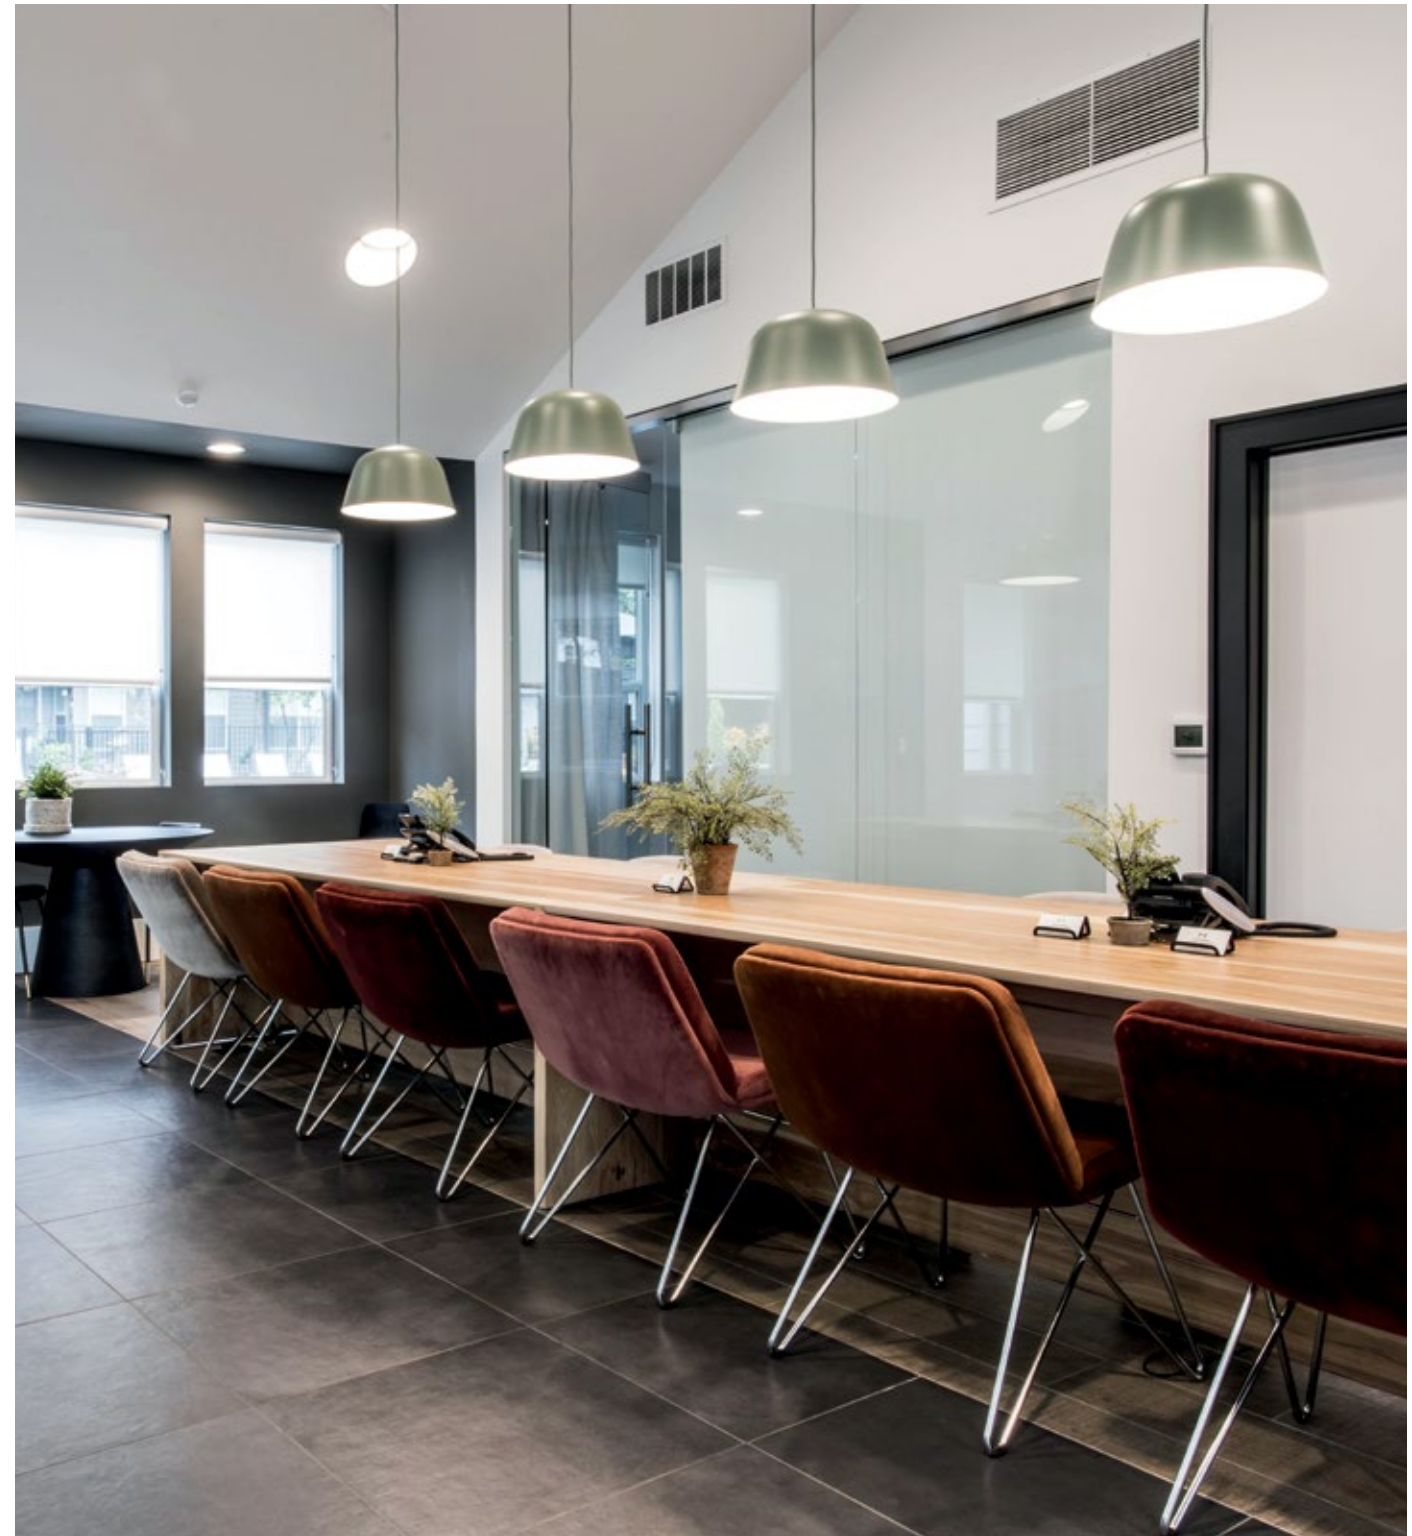

LT table offers a wide range of sophisticated finish options. The one-piece metal support structure is not only extremely durable, but it also allows for the addition of a magnetic device holder and magnetic cup holder, adding convenience for the user.

# CrissCross

By Joachim Jensen

CrissCross is a family of product that works within contemporary lounge applications, as well as executive and conference settings. Distinguishing features include a graphic wire base on the lounge series, a thin profile on all models, and an elegant wire arm option with a sophisticated padded arm cap.

# Defign

By Mike Shields

Within the slim and defined lines of Defign exists an internal spring construction and contour molded cushioning that provide long term comfort for any user. Defign is available in low, medium, and high back models with swivel and lounge base options.

# Everwood

By Andreas Ostwald

# Lore

By Joachim Jensen

# Everwood

Everwood is a modern take on a classical wooden chair. Its curved, clean lines highlight the marriage of organic and man-made materials. The recyclability of its plastic seat and back makes it a sustainable choice.

# Say O

By KnudsenBergHinden

The Say O Poly Chair is suitable for chic meeting rooms and restaurants as the stacking sled base allows the chair to be easily stacked and moved. The Say O Poly Stool makes a statement in cafes and workspaces with wood legs or a metal sled frame.

# Beyond

By Gemma Bernal

Beyond is an informal lounge chair for hospitality, contract, and higher education markets. Four stunning wood veneer options create a dramatic back detail. Upholstery choices include a tight cushion – with or without channel stitching, or a tufted cushion.

# Botte

By Joachim Jensen

With its Scandinavian inspired aesthetic, Botte is a statement of style and comfort. Offered with four-leg and swivel bases, two upholstery options, and four premium wood veneers, it's a standout in contemporary contract environments.

Purl By Mike Shields

# Mojo

By Samuli Naamanka

Mojo is a small scale multipurpose chair with a modern look that fits every space — office, home, or hospitality. The simplicity of its form brings a precise aesthetic to working, meeting, or dining areas.
