designed by bangdesign

Founded in 1989 by Bryan Marshall and David Granger, bangdesign is an award-winning Sydney-based design studio with an international reach. For over three decades, the studio has partnered with forward-thinking furniture brands to create inventive, enduring products.

Driven by a commitment to diversity, bangdesign actively seeks a broad spectrum of projects, fostering creative cross-pollination between ideas, industries, and cultures. Collaboration lies at the heart of the studio's philosophy—an "outward thinking" approach that recognises great design as a collective endeavour rather than an isolated act. At its core, every solution is grounded in a simple principle: design is about people. Understanding real needs, behaviours, and experiences remains central to every outcome.

This philosophy is embodied in the Chromia seating collection. Defined by a refined sense of simplicity and usability, Chromia reflects an appreciation for timeless elegance—where design is reduced to its essential elements without compromising comfort or function. The collection was conceived as a chair that feels effortless in every sense: visually light, ergonomically considered, and inherently versatile. The result is a seating solution that integrates seamlessly into a wide range of environments while maintaining a distinct and enduring design identity.

Chromia is a study in color, where structure meets saturation.

Chromia features twelve curated poly shell hues paired with matching and complementary powder coat finishes, offering a refined spectrum of possibilities. Designed as a collection of seating, it allows designers to layer, contrast, and compose with color across a range of environments.

With options including guest, swivel, counter, and bar stool models, Chromia adapts seamlessly to diverse applications. Upholstered seat pads and fully upholstered options add another layer of comfort and customization, while sled and 4-leg guest and stool models offer high-density stacking capabilities. A transport dolly is also available, supporting ease of movement and efficient storage.

Rooted in Italian form and modern performance, Chromia pairs precision-molded poly shells with durable powder coat bases in a system that invites contrast or cohesion. Designed to adapt. Designed to endure. Designed to express.

Chromia is derived from the Italian word cromia, meaning color palette and tonal range, implying a spectrum, a gradation, or a study of color variation. It doesn't just mean "color." It suggests intentional color, curated, layered, expressive color.

Designed for designers, Chromia is suited for contemporary workplace, education, healthcare, and hospitality environments.
