Fabian Performance Finish

Fabian is a full grain leather produced in the Verde valley region of Italy. This aniline dyed leather features a random hand applied two tone tipped grain effect and luxurious soft hand. Only the finest European hides are hand selected for Fabian, assuring clean surfaces and high-quality cutting yields. With its' durable protective finish, this leather is suitable for hospitality, workplace, aviation and luxury residential environments.

REACH (EC 1907/2006) compliant production prioritizes the protection of human and environmental health by using low-emission mineral tanning formulas that are environmentally responsible. The hides are re-tanned in aged oak drums with vegetable agents, natural fat liquors, oils, and dyes, ensuring deep and uniform dye penetration. Natural variations in color may occur within the same dye lot.
