Leather 101

Caprone

Caprone is a superbly priced Italian leather with a soft hand and a classic grain, prized for its long color line, durability and versatility. An Italian beauty in fashionable and bright colors, Caprone doesn't distress or patina and is also incredibly durable. Caprone remains a top seller because it is regularly upgraded, made ever softer and cleaner in updated colorways. Still made in Italy on quality European hides, Cortina's Caprone is soft and yielding to the touch, yet is highly resistant to stains, wear, and color fading due to its strong protective topcoat. IMO approved, Caprone is a beautiful, practical, and well-priced mainstay leather ready for every interior application.

Technical Specifications

Origin	Italy
Raw Material	Top grain, European bovine
Leather Type	Pigmented
Average Hide Size	50 – 55 sq.ft.
Thickness	1.0 – 1.2 mm
Abrasion Resistance	ASTM D7255: CS10 Wheel Taber 1000 cycles/ 1000 gram weight
Light Fastness	ISO 105-B02: Blue Wool Scale ≥ 5
Wet Crocking	ASTM D5053: Class 5
Flame Resistance	NFPA 260: Class 1; CAL TB117–2013; IMO 2010 FTP Part 8 (A.652(16))
Environmental Note	Caprone is finished without the use of solvents or lead, emits low VOCs, and has achieved an Indoor Gold Advantage certificate from SCS.

Always order samples before choosing as screen and printed colors may not be exactly representative of leather color.

Hand-crafted leather is a natural product and may exhibit natural markings and variations in grain, texture and color—hallmarks of quality and authenticity.

Chesapeake

Chesapeake is a beautiful, pearled pigmented leather that shimmers and glows, bringing life to any space. Made in the U.S. and protected by Crypton®, Chesapeake offers exceptional stain resistance and cleanability, making it suitable for high-traffic applications. The top-grain pigmented finish offers a more consistent color and grain pattern with reduced natural markings for excellent yield. Stocked in a wide range of design-inspired colors and unique neutrals Chesapeake will add shimmer and shine to any interior.

Florence CRYPTON

In the heart of Italy lies the inspiration for one of Cortina's best-selling performance leathers — Florence. The warm and familiar colors and gentle distressing evoke the rich tapestry that defines a magical city: cobbled streets, historic facades, and enduring craftsmanship. Made in the U.S. with meticulous attention to detail, Cortina's Florence collection is a symbol of this craftsmanship. In addition to its timeless beauty, it's the practicality of Florence that makes it stand out. Unlike similar aniline distressed leathers, Florence is offered at an attainable price-point and protected with a Crypton® finish built in for cleanability and sustainability with confidence in all interiors. With a waxy, firmer hand, Florence was designed to highlight the natural markings of truly authentic genuine leather and will develop a time-tested story of luxury with a slowly evolving patina.

Technical Specifications

Origin	USA
Raw Material	Top grain, aniline drum dyed
Leather Type	Aniline, protected by Crypton®

Raw materials

Top-grain leather

- The topmost layers of the hide are buffed or sanded to allow for a desired appearance, improve finish adhesion, and reduce or remove the appearance of natural markings such as bug bites and wrinkles.
- A consistent or corrected grain is added back to the hide by embossing.
- Top-grain crust starts out like a blank canvas, perfect for consistency, yield, advanced finishes, and custom orders.

Full grain leather

- Full grain leather is not buffed or sanded and is designed to purposely maintain the naturally variable grain patterns and highlight the unique markings of each hide, such as wrinkles, scratches, stretch marks, brands, and bug bites.
- Some are mezza fiore: only buffed very slightly to allow for better adhesion of finishes.
- Generally, full grain leather is made from a higher grade crust with fewer markings and can be more expensive.

Where it gets confusing

Sometimes the surface of full grain leather is also lightly embossed to add grain consistency and increase yield, but the other natural markings such as stretchmarks and brands are purposely maintained to celebrate the unique beauty and luxury of full grain's distinctive characteristics.

Environmental Stewardship & Social Responsibility

In every decision we make, Cortina Leathers considers the earth we all share. We continually evaluate and adjust our business approaches to ensure we are operating in a way that protects our environment and each other.

- Cortina's genuine leather is friendly to our environment: As a natural, bio-based product, leather is more sustainable than currently available alternative fabrics. All Cortina leathers comply with strict European REACH standards, and Cortina's leather is fully biodegradable.
- Our leather is 100% a by-product of the food industry. No cow is raised for its hide. Currently 30%+ of hides are not upcycled and are disposed of through landfill or incineration, negatively impacting our environment. By investing in bio-based genuine leather, you are positively participating in a circular economy.
- We upcycle the material to produce one of mankind's oldest and most beautiful, versatile, and durable textiles ever known.

Leather types

PROTECTION	Pigmented Caprone Chesapeake Davenport	• Strongest performance with consistent color & grain pattern • Fewest natural markings—high cutting yield • Maintains appearance with age • Ideal for high-traffic areas	• Easily cleaned and highly stain resistant • Many of the fun specialty leathers are pigmented: exotic animal prints, bright colors, metallics, pearlized • Very easy to customize
	Semi-aniline	• Known for luxurious hand and consistent color • Finished with aniline dyes and/or a very light, sophisticated application of pigments for color consistency	• All have protective treatments • Full grain or mezza fiore maintain all or some of the natural characteristics of genuine leather • Easy to customize
	Aniline Florence	• Natural leather with increased stain protection • No pigments are used—transparent aniline dyes applied to even the color, add dimension and depth • Exhibit the broadest variety of looks—two tones, pull-up, distressing, etc.	• Most will patina and age gracefully • Cortina offers four with Crypton protection built-in for industry's best stain resistance and cleanability • All celebrate the authentic and organic markings of genuine leather
	Pure Aniline (naked aniline)	• Most natural and least protected • No color (aniline dyes or pigments) added during finishing. May include clear wax, oil or water repellents • Designed to embrace and reveal each hide's unique markings	• Age gracefully, picking up the patina of their surroundings • Only the top 1-3% selection of hides are clean enough which is why they are typically more expensive • Celebrated by leather aficionados
