WE ARE GXM

Since its founding, GXM has been involved in driving innovation in the federal government. Our team originally did this in Afghanistan through direct technology fielding with end users. As commercial sector solutions became a bigger focus, we helped new government organizations start-up, find these networks, identify promising technologies and programs, and modify and integrate them for government use. We still build leading-edge technology for government clients but more recently, our work increasingly includes leveraging our nation's capital markets to drive critical technologies into federal departments.

TWO ENGINES POWERING ONE MISSION

Critical Technology Development
From Concept to Operational Deployment

- Mission-Aligned Agile Delivery
- DevSecOps
- Mission-Driven Ai
- Systems Modernization
- Cybersecurity
- HCD
- Test Automation
- Data & Analytics

Technology Transition & Innovation Programs
From Prototype to Adoption at Scale

- Investment Diligence & Evaluation
- Financial Instrument Design & Implementation
- Innovation Program Design & Execution
- Embedded Program Operations
- Technology Transition & Scale

CERTS

CMMC
Level 2 C3PAO Certified
ID: L200001781

CMMI
Maturity Level 3 Dev
Unique ID: 79737

ISO 9001:2015
Certified
Certificate No: US4862

DCAA
Defense Contract Audit Agency Audited

SDVOSB
Service-Disabled Veteran-Owned Small Business SBA Certified

Virginia Values Veterans (V3)
Certified 1/23/2023

FEATURED CLIENTS

Governmentwide Acquisition Contracts (GWAC) & IDIQ

Direct contracting pathways for agencies to access GXM capabilities

GSA OASIS+
GSA One Acquisition Solution for Integrated Services Plus Small Business Domains:
M&A, R&D

GSA MAS
GSA Multiple Award Schedule

NASA SEWP VI
NASA Solutions for Enterprise-Wide Procurement Categories:
B: Enterprise-Wide IT Service Solutions
C: Mission-Based Services

SeaPort NxG
SeaPort Next Generation

SHIELD IDIQ
Scalable Homeland Innovative Enterprise Layered Defense

Other Transaction Authorities (OTAs)

OTA consortium pathways supporting prototyping and emerging technology

IWRP
Information Warfare Research Project

NSTIC
Naval Surface Technology & Innovation Consortium

NSTXL: SpEC
Space Enterprise Consortium

NSTXL: S2MARTS
Strategic & Spectrum Missions Advanced Resilient Trusted Systems

Teaming Options

Expanded access and capabilities through established prime contractor partnerships

AMP Army Modernization Priorities

J-NEEO Joint Network of Engineering and Emerging Operations

ICON Interagency Intelligence and Cyber Operations Network

DMATS Decisive Mission Actions and Technology Services

Prime Contracts

GXM-led contracts demonstrating proven federal and national-security delivery

DIANA
Defense Innovation Accelerator for the North Atlantic - NATO

OSC
Office of Strategic Capital

SBA
Small Business Administration

JEOD
Joint EOD - NAVSEA

ERDC CSO
Army Engineer Research & Development Center, Commercial Solutions Opening

NASA ESIP
Engineer Research and Development Center Contracting Solutions Office
