

WE ARE GXM

Since its founding, GXM has been involved in driving innovation in the federal government. Our team originally did this in Afghanistan through direct technology fielding with end users. As commercial sector solutions became a bigger focus, we helped new government organizations start-up, find these networks, identify promising technologies and programs, and modify and integrate them for government use. We still build leading-edge technology for government clients but more recently, our work increasingly includes leveraging our nation's capital markets to drive critical technologies into federal departments.

TWO ENGINES POWERING ONE MISSION

Critical Technology Development

From Concept to Operational Deployment

- Agile Program Design & Product Delivery
- Embedded Engineering & Delivery Operations
- Data, Analytics & Decision Support
- Cybersecurity & Operational Validation
- Systems Modernization & Platform Integration
- UX / Human-Centered Engineering

Technology Transition & Innovation Programs

From Prototype to Adoption at Scale

- Investment Diligence & Evaluation
- Financial Instrument Design & Implementation
- Innovation Program Design & Execution
- Embedded Program Operations
- Technology Transition & Scale
- Adoption, Integration & Organizational Change

FEATURED CLIENTS

Governmentwide Acquisition Contracts (GWAC) & IDIQ

Direct contracting pathways for agencies to access GXM capabilities

Other Transaction Authorities (OTAs)

OTA consortium pathways supporting prototyping and emerging technology

Teaming Options

Expanded access and capabilities through established prime contractor partnerships

Prime Contracts

GXM-led contracts demonstrating proven federal and national-security delivery

GSA OASIS+
GSA One Acquisition Solution for Integrated Services Plus Small Business Domains: M&A, R&D

GSA MAS
GSA Multiple Award Schedule

NASA SEWP VI
NASA Solutions for Enterprise-Wide Procurement Categories:
B: Enterprise-Wide IT Service Solutions
C: Mission-Based Services

SeaPort NxG
SeaPort Next Generation

SHIELD IDIQ
Scalable Homeland Innovative Enterprise Layered Defense

IWRP
Information Warfare Research Project

NSTIC
Naval Surface Technology & Innovation Consortium

NSTXL: SpEC
Space Enterprise Consortium

NSTXL: S2MARTS
Strategic & Spectrum Missions Advanced Resilient Trusted Systems

AMP
Army Modernization Priorities

J-NEEO
Joint Network of Engineering and Emerging Operations

ICON
Interagency Intelligence and Cyber Operations Network
