WHO WE ARE

Specialist cyber security and digital consultancy.

Digital systems are too complex and the stakes too high for security and delivery to sit apart. Soteria brings cyber security and digital consultancy together as one team, building systems secure by design and delivered with confidence.

OUR SERVICES AT A GLANCE

01	Secure by Design	Security embedded across the full lifecycle, from concept to operation.	Page 3
02	CISO as a Service	On-demand cyber leadership aligned to risk, governance and regulation.	Page 3
03	Risk & Compliance	Contextualised risk management and certification across leading frameworks.	Page 4
04	Security Training & Awareness	Targeted training to strengthen awareness and resilience.	Page 4
05	AI Security	Adopt AI securely whilst managing emerging risks.	Page 5
06	Security Architecture	Security designed into your systems from the ground up.	Page 5
07	Digital Delivery	Expert end-to-end delivery of secure, compliant digital systems.	Page 6
08	Digital Transformation	Secure modernisation across cloud, automation and emerging tech.	Page 6
09	Cryptography	Robust cryptography and post-quantum readiness.	Page 7

We provide security-cleared consultants with hands-on experience delivering cyber security and digital outcomes, with the certifications to prove it.

01 Secure by Design

Security designed in, not bolted on.

We embed security across your capability lifecycle, from strategy and design through development, deployment, operation and disposal. We align your work to the frameworks that apply to your sector, from JSP 440 and Def Stan 05-138 to NCSC CAF, IEC 62443 and ISO 27001.

WHAT WE DELIVER

- | | |
|--|---|
| ■ Security strategy and requirements | ■ Secure design and architecture |
| ■ Threat modelling and risk assessment | ■ Vendor and supply chain security |
| ■ Independent security assurance | ■ Compliance and regulatory support |
| ■ Security testing coordination | ■ Control selection using national and international standards and policies |

✓ Understood cyber risk

✓ Regulatory compliance

✓ No costly retrofits

02 CISO as a Service

Senior security leadership, without the full-time overhead.

Experienced security leaders who integrate into your organisation to set strategy, engage the board and govern risk. Ideal if you are growing without dedicated security leadership, between CISOs, or need specialist support alongside an existing team.

WHAT WE DELIVER

- | | |
|--|--|
| ■ Security strategy and roadmap | ■ Board and executive engagement |
| ■ Security governance and oversight | ■ Risk management and appetite setting |
| ■ Regulatory and compliance oversight | ■ Security programme management |
| ■ Incident escalation and crisis support | ■ Stakeholder and supplier management |

✓ Board confidence

✓ Faster security maturity

✓ Risk direction when you need it

03 Risk & Compliance

Turn compliance into confidence.

We translate complex regulation into practical, defensible controls and help you demonstrate them to regulators, auditors and customers. Whether you are pursuing certification, preparing for audit or building risk capability, we keep the effort proportionate.

WHAT WE DELIVER

- | | |
|--------------------------------------|--|
| ■ Compliance programme design | ■ Contextualised risk assessment |
| ■ ISO 27001 certification support | ■ Cyber Essentials and Cyber Essentials Plus support |
| ■ NIS and sector-specific compliance | ■ Audit and assurance support |
| ■ Governance and policy development | ■ Ongoing compliance management |

✓ Audit-ready compliance

✓ Certification achieved

✓ Reduced compliance burden

04 Security Training & Awareness

Turn your workforce into your strongest defence.

Most security incidents involve human error. We deliver practical, scenario-based programmes tailored to your organisation and roles, designed to change behaviour rather than tick a compliance box.

WHAT WE DELIVER

- | | |
|---------------------------------|---------------------------------|
| ■ Security awareness programmes | ■ Role-based training |
| ■ Simulated phishing campaigns | ■ Compliance training delivery |
| ■ Security champion programmes | ■ Executive and board briefings |
| ■ Incident response awareness | ■ Ongoing awareness campaigns |

✓ Reduced human error

✓ Faster threat reporting

✓ Measurable improvement

05 AI Security

Adopt AI as an advantage, not a new attack surface.

AI brings new risks, including data poisoning, prompt injection, model theft, privacy exposure and bias. We help you deploy, build and govern AI securely from the outset, aligned to the EU AI Act, emerging UK standards and GDPR.

WHAT WE DELIVER

- | | |
|---|--|
| ■ AI risk assessment and threat modelling | ■ AI governance, strategy and policy |
| ■ Secure AI architecture and design | ■ AI supply chain and third-party risk |
| ■ Prompt injection and LLM security | ■ Data privacy and AI compliance |
| ■ AI security testing coordination | ■ Shadow AI detection and management |

✓ Secure AI adoption

✓ Protected intellectual property

✓ Risk-based AI governance

06 Security Architecture

Build security into your architecture, not around it.

Systems designed with security from the outset are more resilient, easier to defend and cheaper to run. We design and review architectures across cloud, on-premises, hybrid and OT environments, applying zero trust, defence in depth and least privilege.

WHAT WE DELIVER

- | | |
|------------------------------------|---|
| ■ Security architecture design | ■ Architecture review and assessment |
| ■ Zero trust architecture | ■ Cloud security architecture |
| ■ Network security architecture | ■ Application security architecture |
| ■ OT and ICS security architecture | ■ Architecture documentation and patterns |

✓ Reduced attack surface

✓ Scalable security

✓ Faster, confident deployment

07 Digital Delivery

Senior delivery expertise for programmes that can't afford to slip.

Most digital programmes fail because delivery is under-led, not because the technology is wrong. Our senior practitioners bring structure, governance and accountability from day one, with security and assurance moving alongside delivery rather than after it.

WHAT WE DELIVER

- | | |
|------------------------------------|-------------------------------------|
| ■ Programme and project management | ■ Delivery governance and assurance |
| ■ Secure delivery integration | ■ Stakeholder management |
| ■ Supplier and contract management | ■ Business change and adoption |
| ■ Risk and issue management | ■ Benefits realisation |

✓ On time and on budget

✓ No late-stage surprises

✓ Clear accountability

08 Digital Transformation

Change that lands. Outcomes that last.

Transformation is a series of decisions: what to modernise, retire or build, in what order and at what pace. We help senior leaders make those decisions properly, then deliver the change with security, risk and architecture expertise built in.

WHAT WE DELIVER

- | | |
|---|-------------------------------------|
| ■ Transformation strategy and planning | ■ Cloud migration and modernisation |
| ■ Legacy system assessment and transition | ■ Security and risk integration |
| ■ Operating model design | ■ Data strategy and migration |
| ■ Vendor and technology selection | ■ Business case development |

✓ Transformation with purpose

✓ Compliance built in

✓ One team, start to finish

09 Cryptography

Cryptography that holds up under scrutiny.

Cryptography is the control everything else depends on. We establish what you are actually running, define the standard you need to meet, and put strategy, key management and assurance in place, aligned to NCSC post-quantum timelines, JSP 490, IEC 62443, ISO 27001 and FIPS 140-3.

WHAT WE DELIVER

- | | |
|-------------------------------------|---|
| ■ Cryptographic strategy and policy | ■ Cryptographic discovery and inventory |
| ■ Key management and PKI | ■ Cryptographic architecture and design |
| ■ Post-quantum readiness | ■ Approvals, custodianship and key material |
| ■ Independent assurance and review | ■ Vendor and supply chain cryptography |

✓ Cryptography you can evidence

✓ Quantum readiness

✓ Fewer cryptographic failures

WHY SOTERIA

Cyber. Digital. Done as one.

Most consultancies are one or the other. Soteria brings cyber security and digital together, delivered by a single integrated team.

A decade of expertise

Hands-on cyber and digital experience in demanding environments.

Security built in

Embedded from concept to operation, cutting rework and delay.

Risk in context

Technical detail turned into clear, decision-ready insight.

Framework-led

MoD JSPs, ISO 27001, Cyber Essentials, IEC 62443 and NCSC CAF.

Independent advice

Vendor-neutral guidance based on your needs, not product sales.

Senior leadership

Senior direction from CISO as a Service to programme oversight.
