BRIMHALL

2025
Branding
Design
Development

A custom image first digital experience for photographer Aaron Brimhall. This case study explores art direction, interaction design, responsive behavior, and motion used to create an immersive browsing experience.

WEB DESIGN

02PX

2026
Branding
Design
Development

02PX is a creative studio system designed to launch brands, build original IP, and create worlds people want to follow.

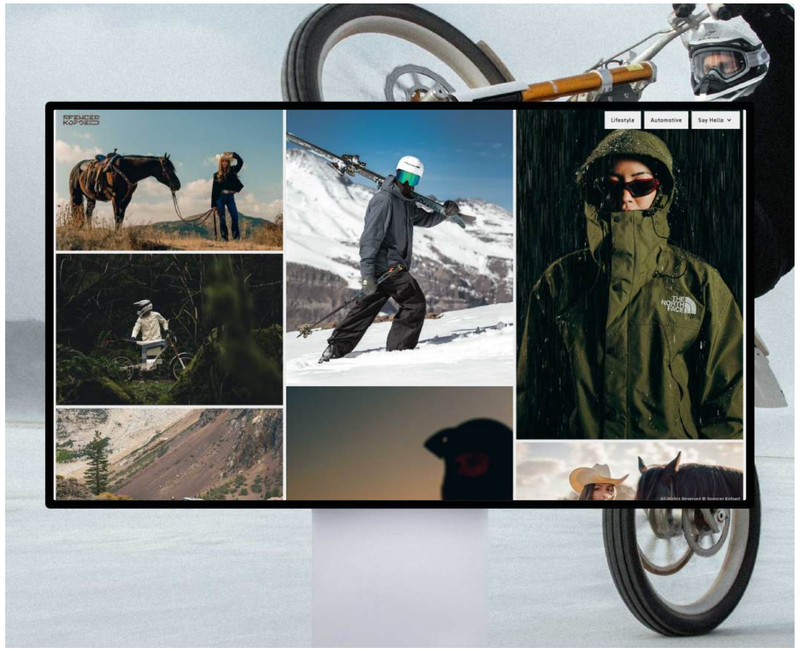

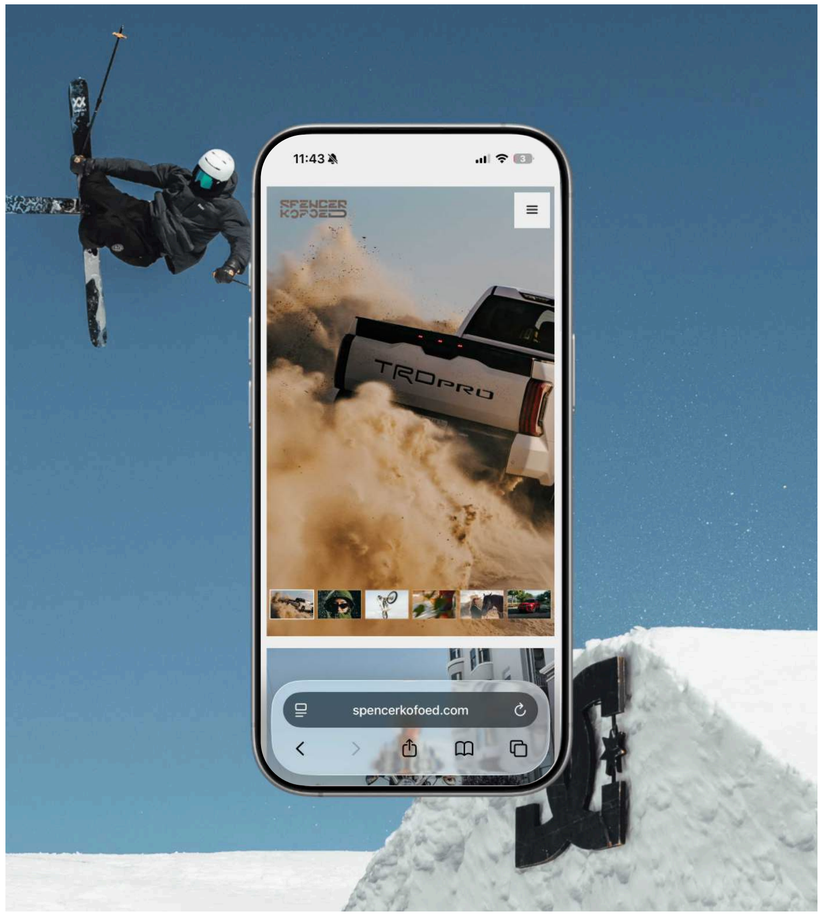

WEB DESIGN

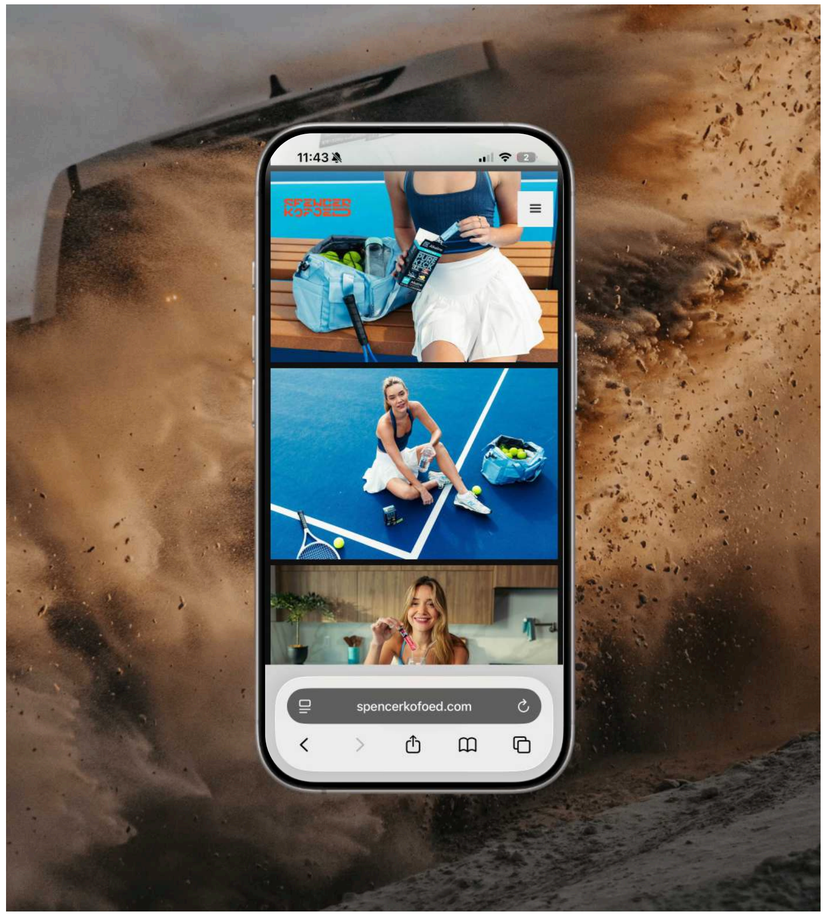

SPENCER KOFOED

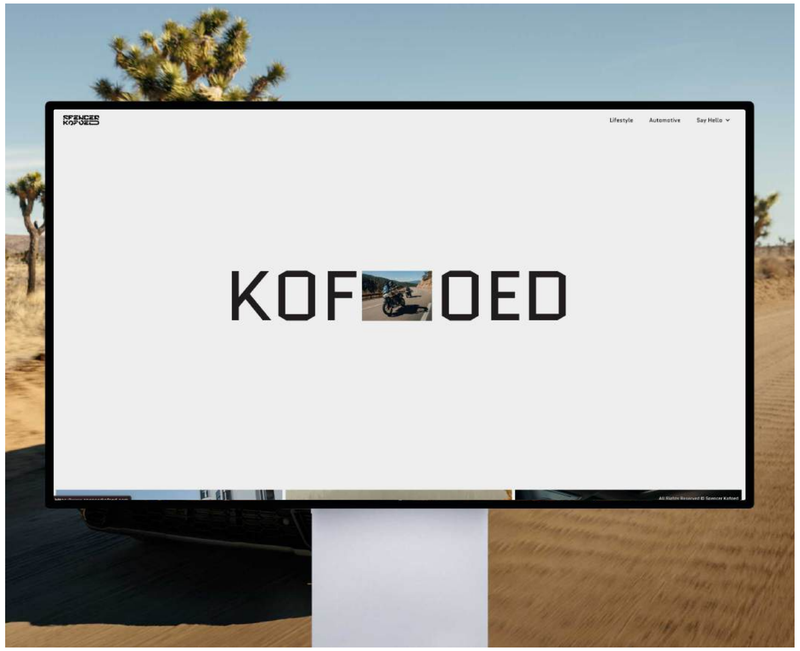

2025
Branding
Design
Development

Portfolio website and brand refresh for photographer Spencer Kofoed. A curated digital showcase of automotive and lifestyle imagery. Designed to capture moments of motion through a refined UI that seamlessly translates vision from lens to layout.

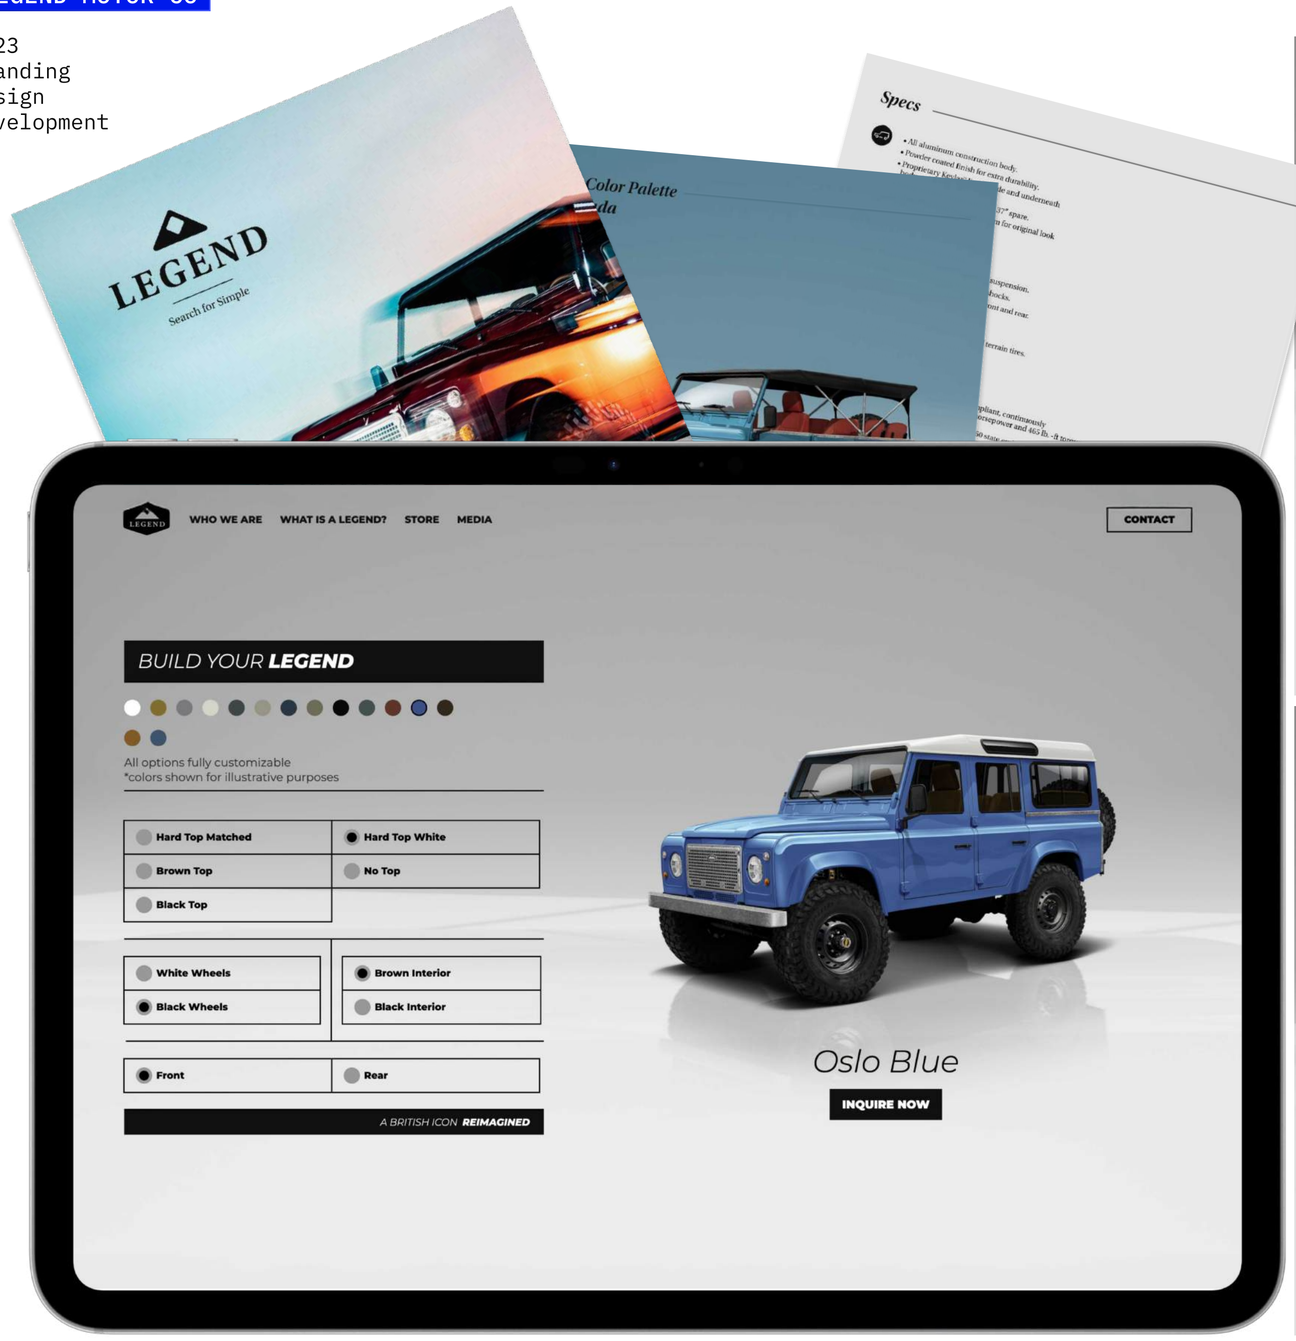

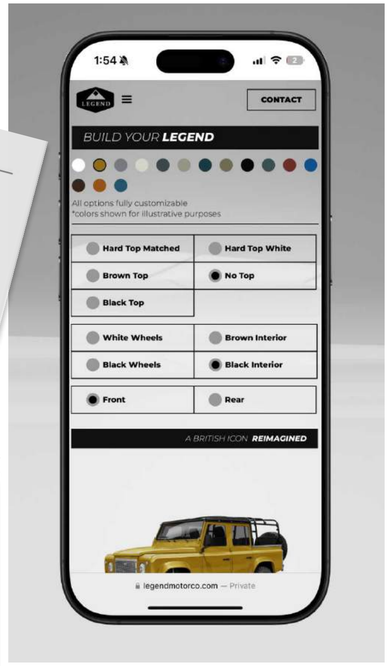

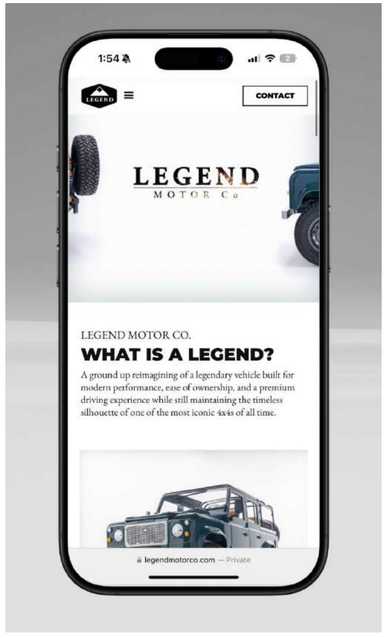

WEB DESIGN

LEGEND MOTOR CO

2023
Branding
Design
Development

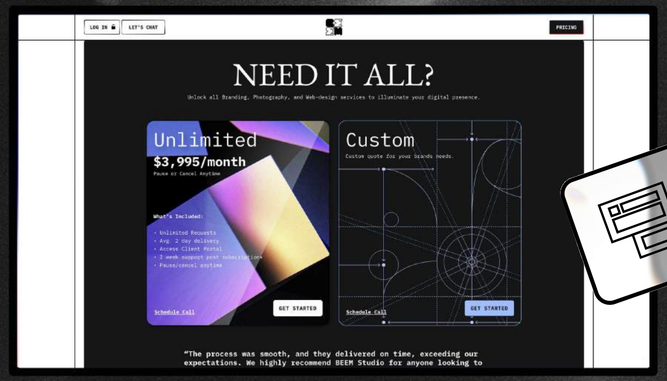

Legend Motor Co. is a bespoke automotive brand specializing in custom-built Land Rover Defenders. This website project merges high-end visuals with seamless user flows, creating an online experience that captures the company's commitment to craftsmanship and exclusivity.

WEB DESIGN

BEEM STUDIOS

2025
Branding
Design
Development

A digital home for a studio that shapes them. The BEEM Studio website blends clarity, multidisciplinary design, and craft into one cohesive experience. Creating a space where structure meets story, and design speaks without shouting.

WEB DESIGN

ODR

2023
Branding
Design
UX / UI

ODR is a new type of skiing. Our goal was to create a brand with a seamless e-commerce experience. I led their Shopify store's UX/UI overhaul—enhancing product discovery, checkout flows, and brand storytelling. The result is a cohesive online presence that elevates both product awareness and conversions.

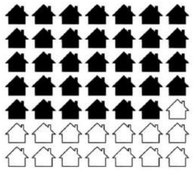

WEB DESIGN

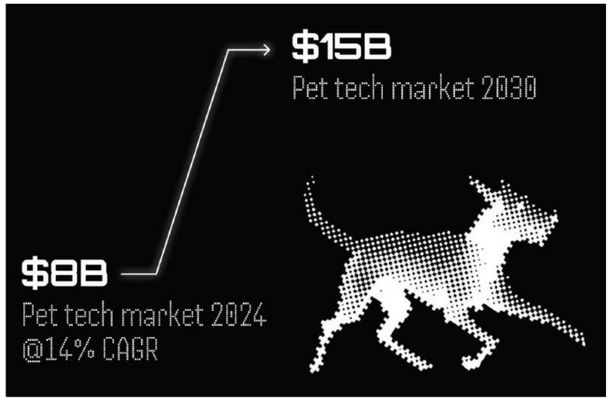

HΩME

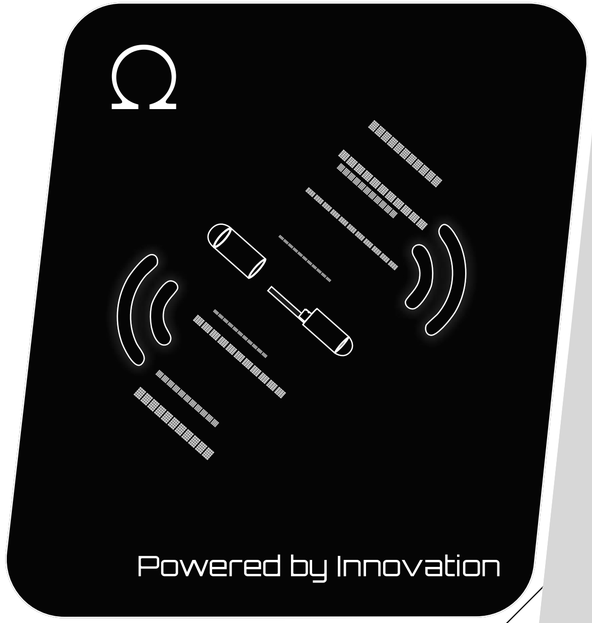

2025
Branding
Design
Graphic

Creative branding and deck materials for Home, a first-of-its-kind injectable pet tracker. Combining microchip innovation with a seamless mobile app, establishing a new standard for embedded pet technology.

70% (94 Million)
of U.S. households own a pet (APPA, 2025).

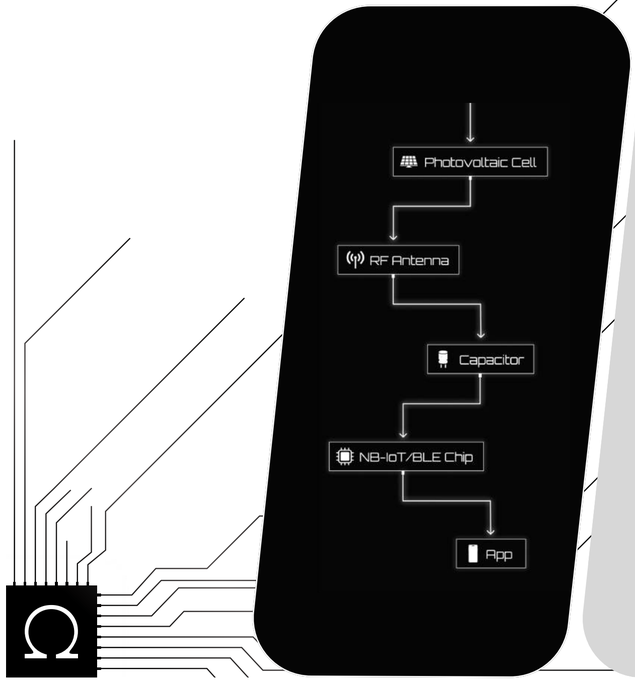

Device prototype and app by 2025.

10,000 users via 500 vet clinics by 2030.

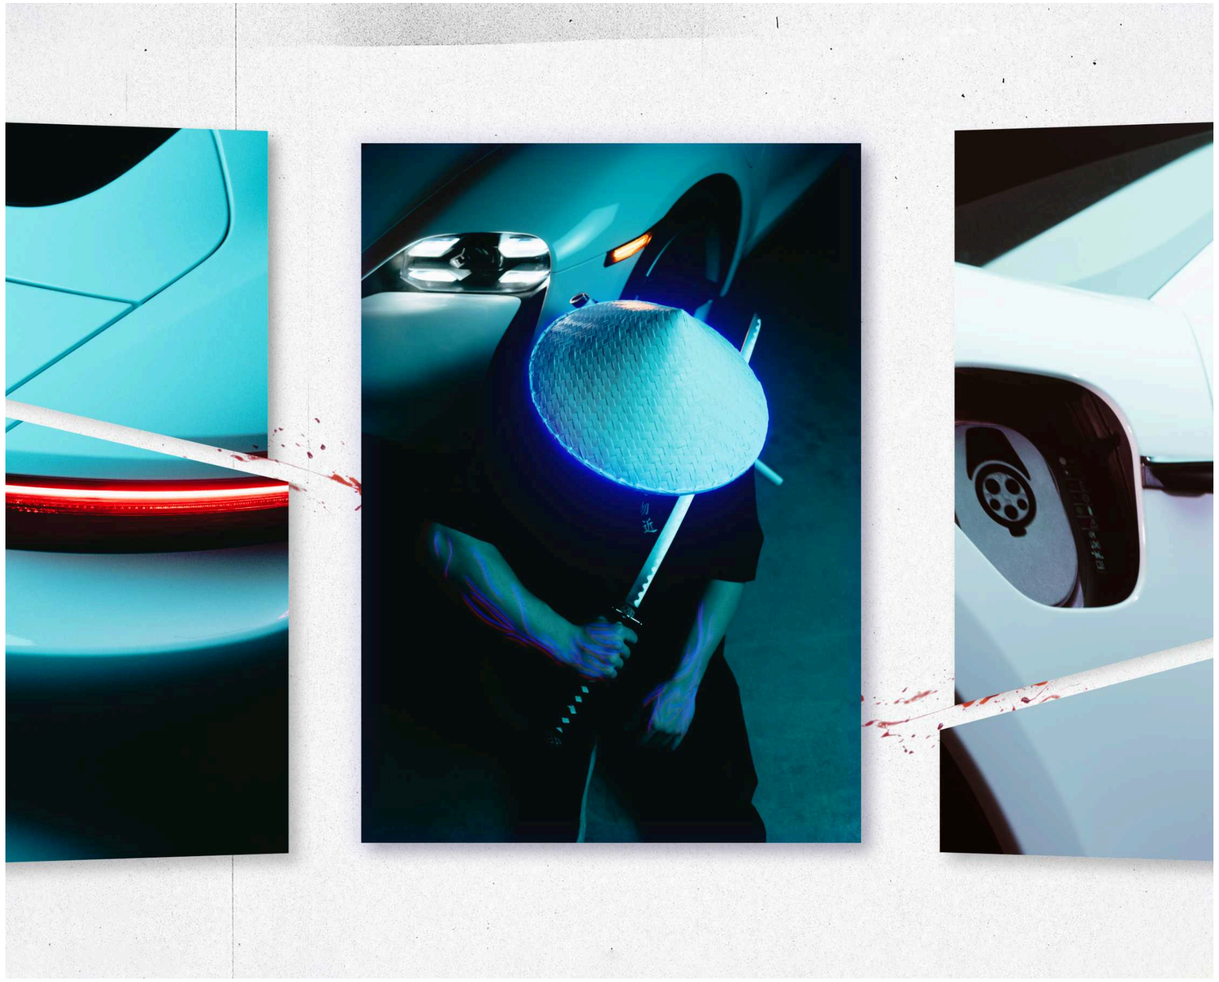

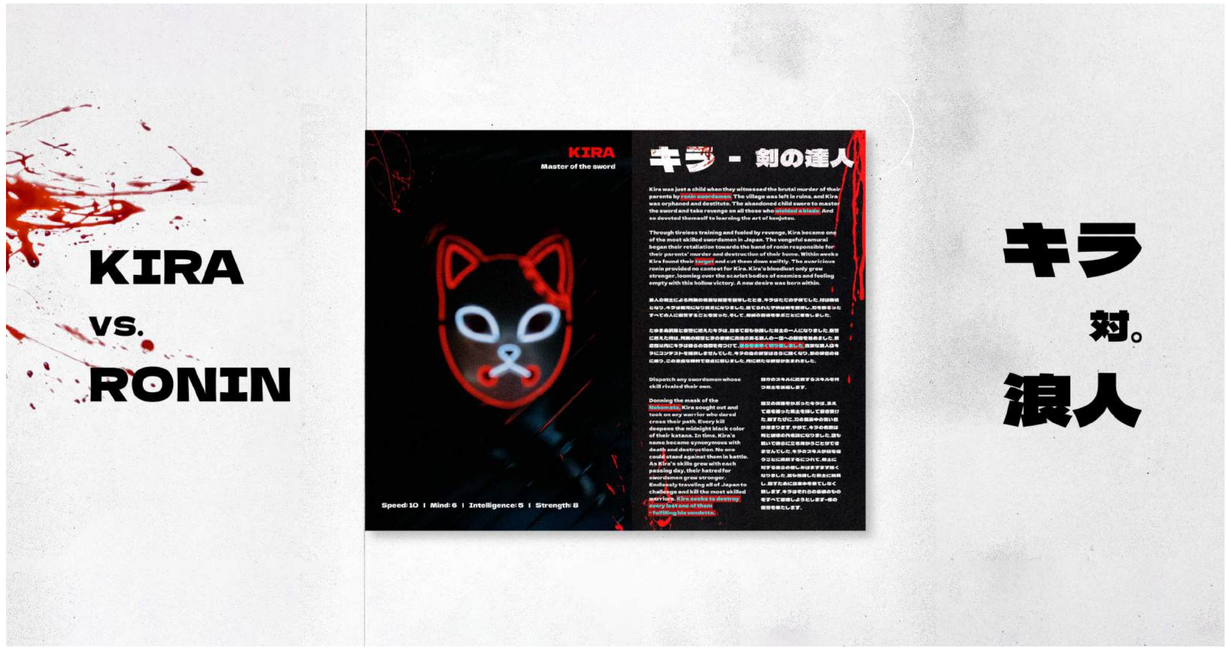

NEKOMATA

2022
Branding
Design
Graphic

Through the lens of photography and visual design, this project creates an interactive experience. Isolated characters are put within a unique storyline allowing participants to dive deeper into the artwork.

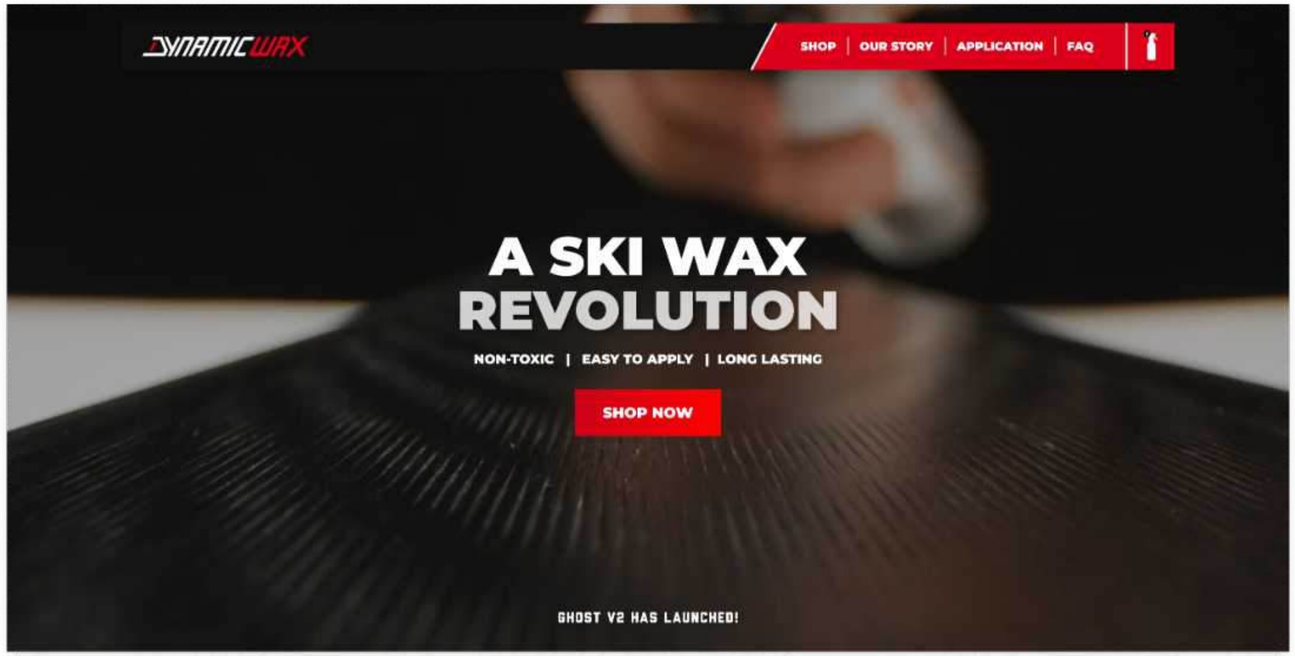

DYNAMIC WAX

DYNAMICWAX

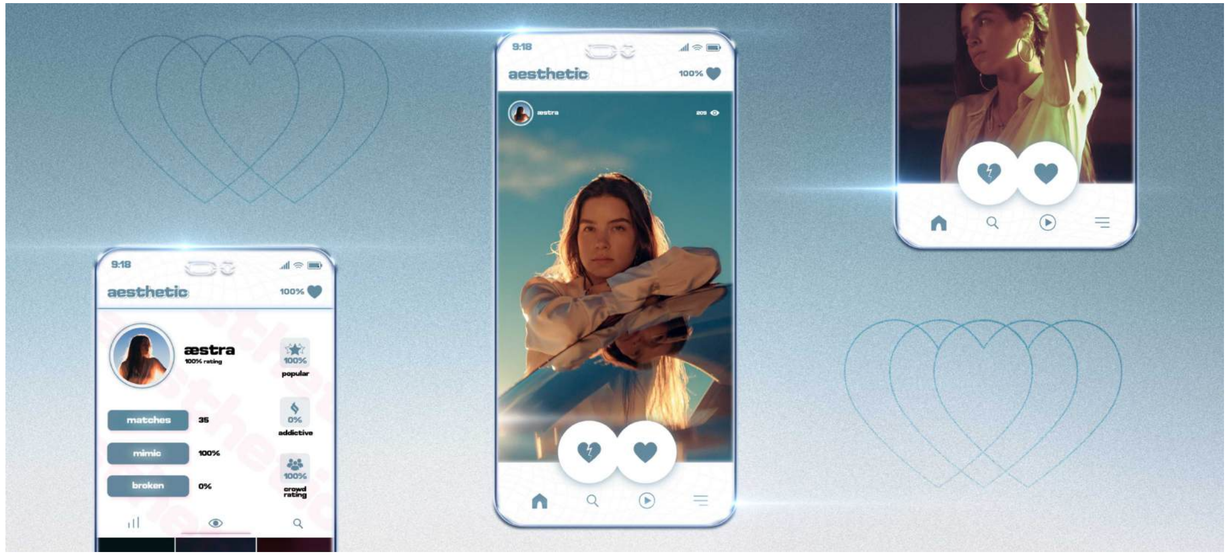

GRAPHIC DESIGN

AESTHETI©

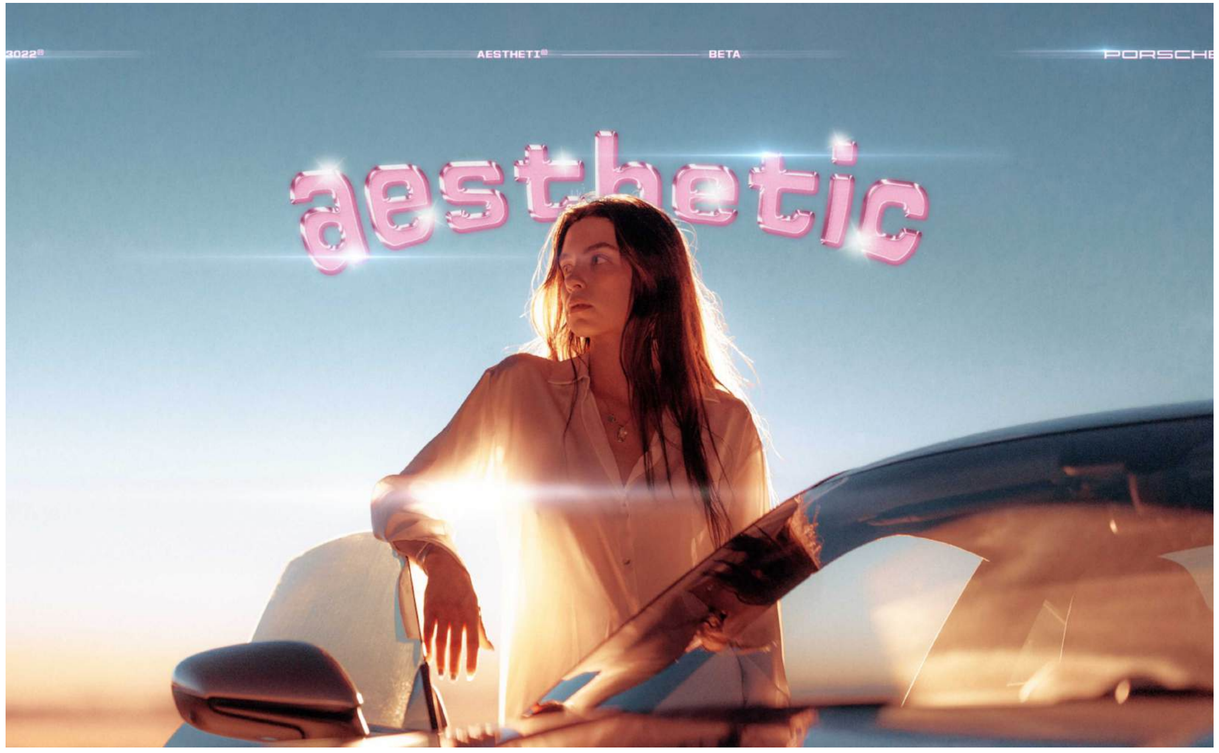

2022
Branding
Design
Graphic

Speculative application exploring how alternate brand personalities translate into distinct UI systems. Developed for Porsche, with supporting marketing materials.

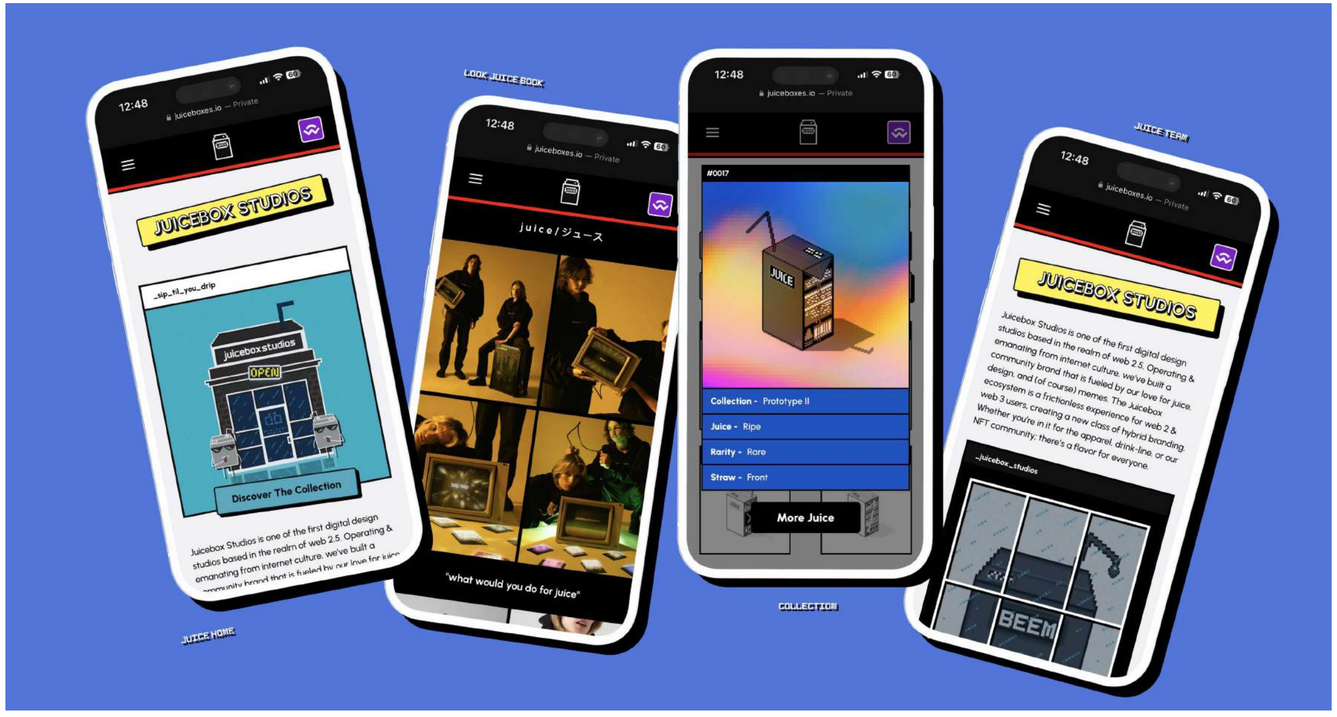

JUICEBOXES

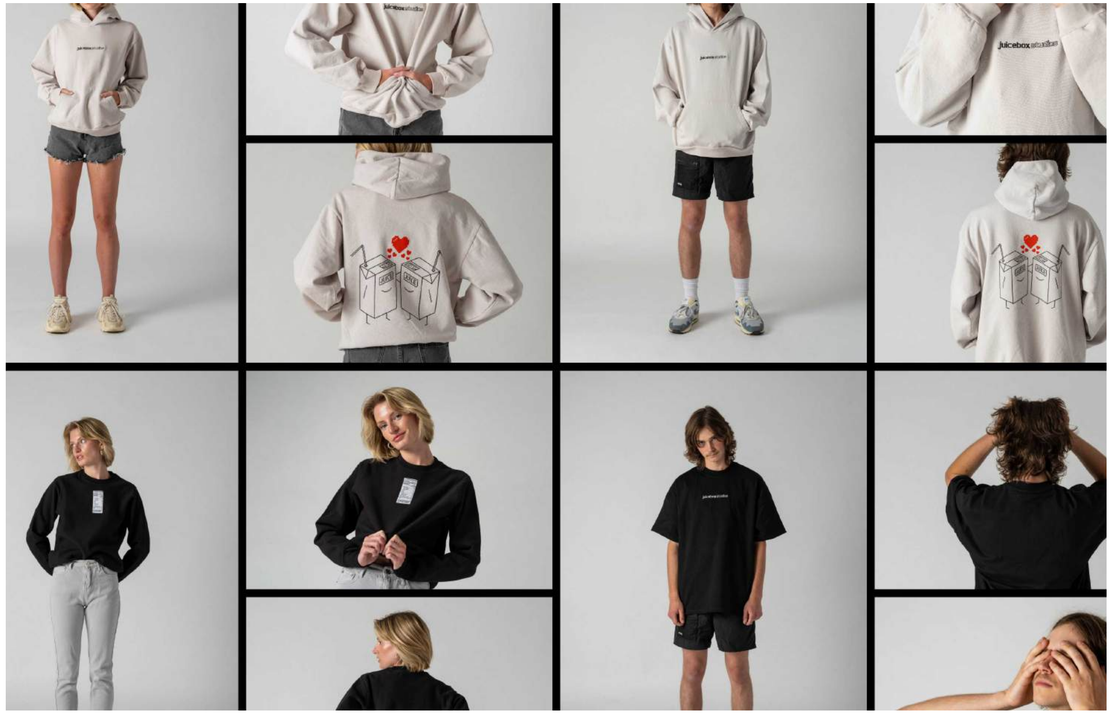

2021
Branding
Design
Development
Graphic

Juicebox Studios is one of the first digital design studios based in the realm of web 2.5. Operating & emanating from internet culture, we've built a community brand that is fueled by our love for juice, design, and (of course) memes.

PUFFERFISH

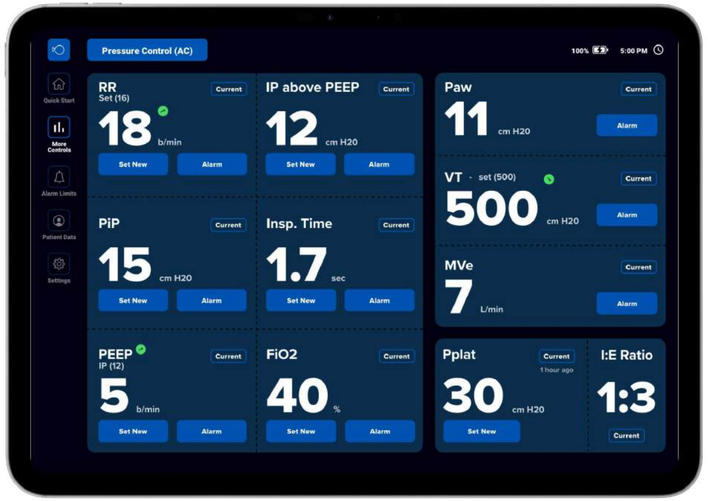

2021
Branding
Design
UX / UI

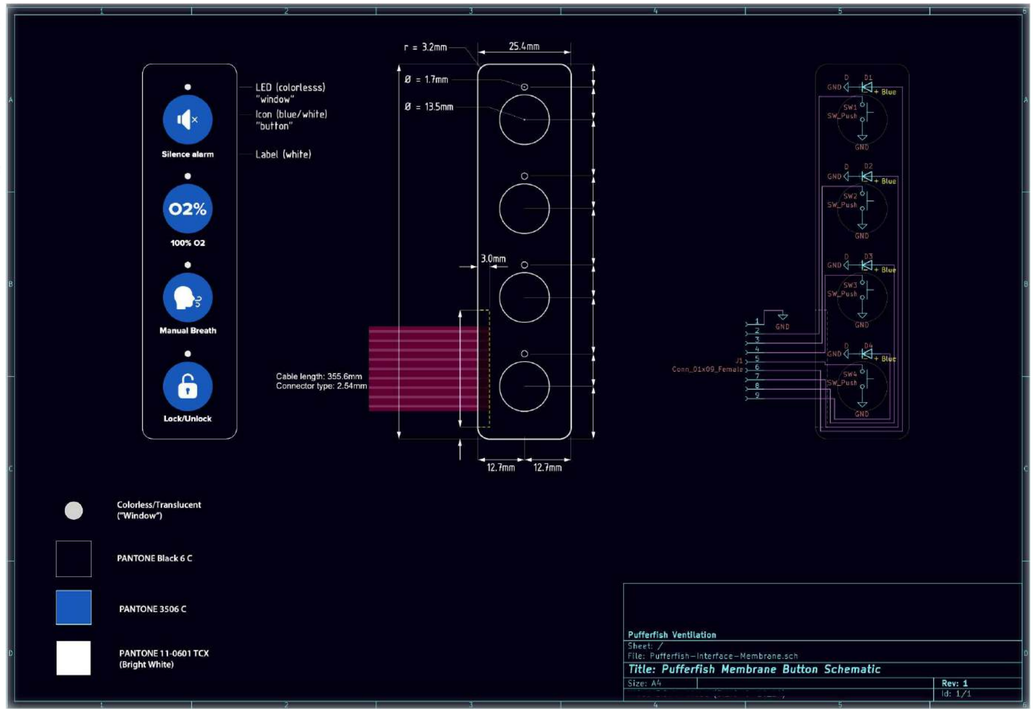

Pufferfish is a new user interface for a next-generation open-source ventilator. This solution prioritizes clarity and real-time responsiveness, enabling healthcare providers to monitor and adjust critical settings swiftly. Through an intuitive design system, we streamlined workflows, reduced training time, and ultimately enhanced patient care in high-stress medical environments.

Pufferfish

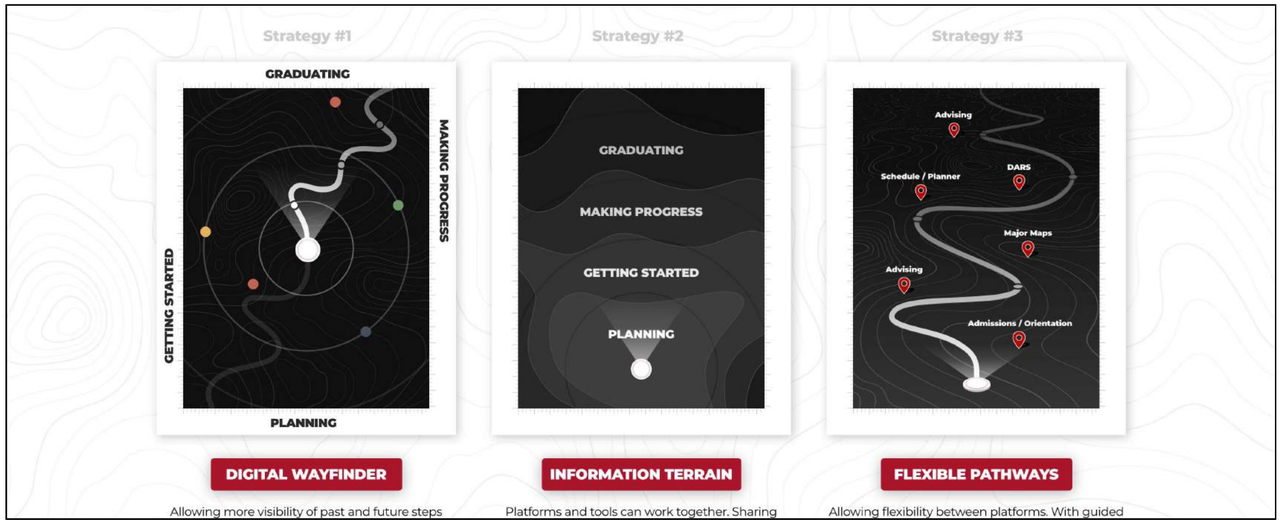

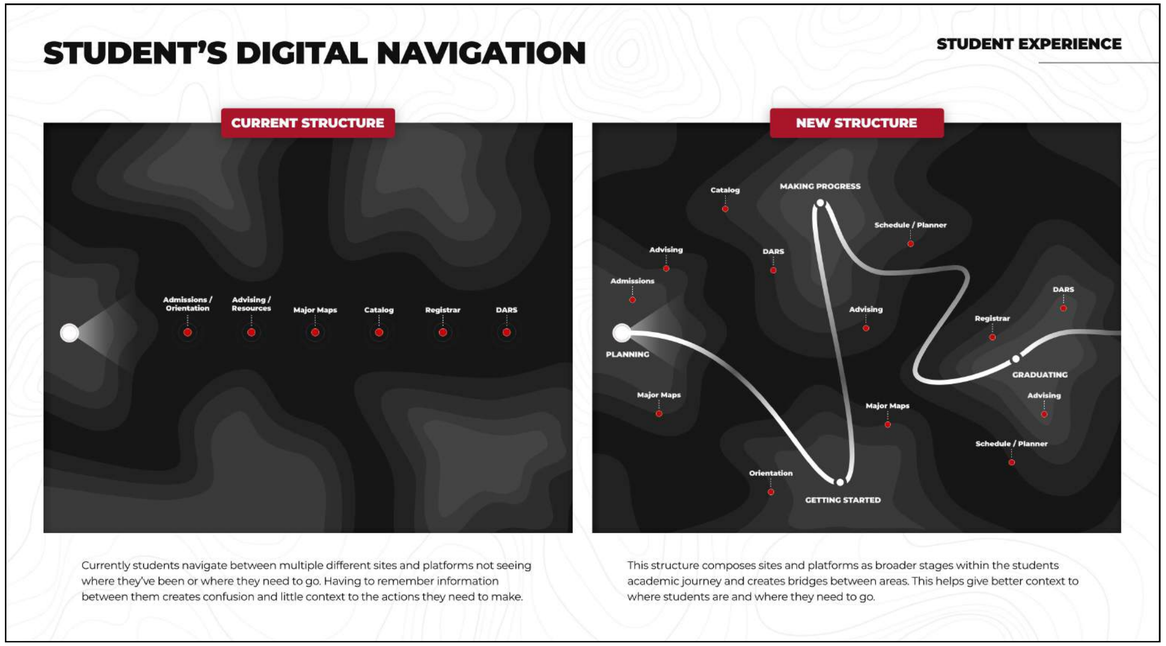

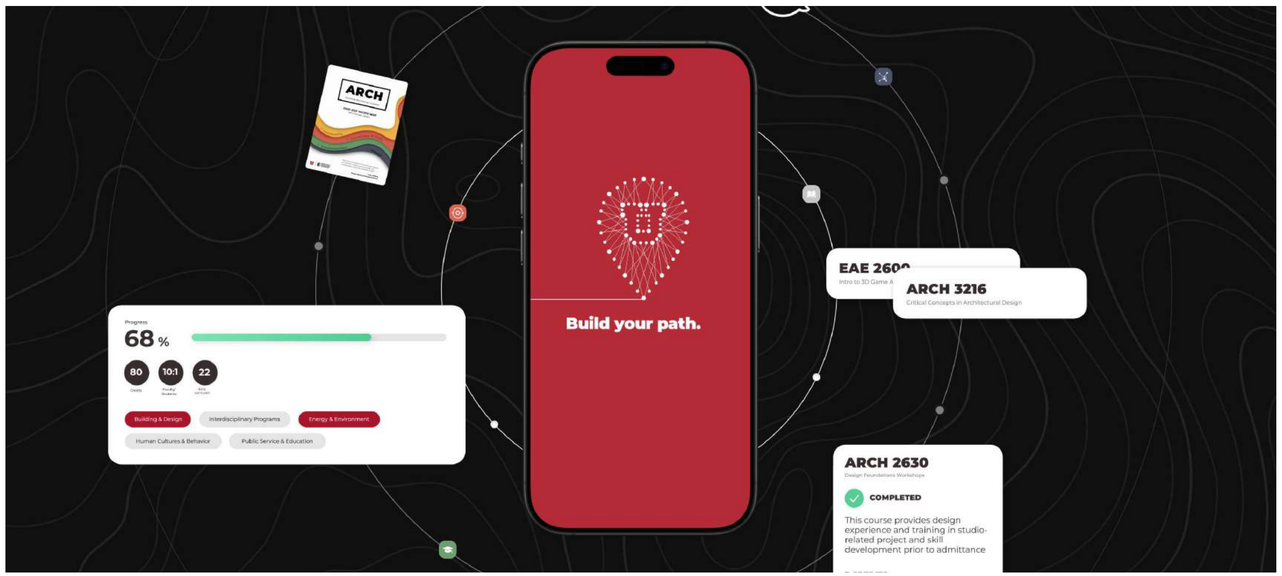

UNIVERSITY OF UTAH

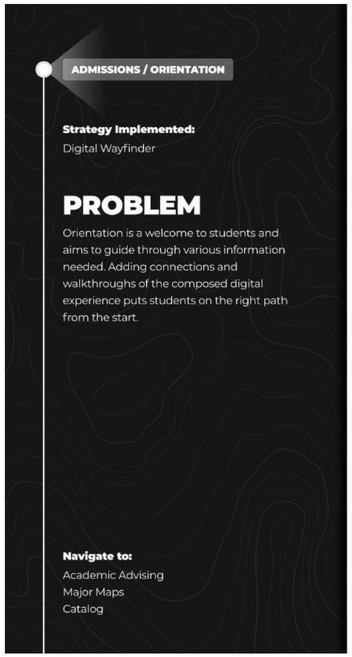

2022
Branding
Design
UX / UI

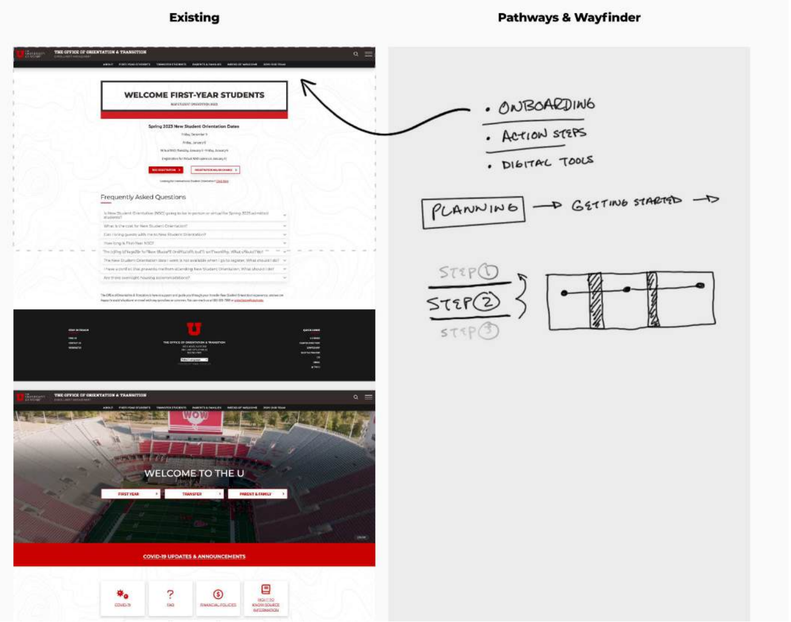

Partnered with the University of Utah to unify and elevate its digital ecosystem—redesigning multiple web and mobile applications for a seamless, student-centered experience. By creating a cohesive design system, we helped students navigate resources, track progress, and ultimately graduate with greater confidence and efficiency.

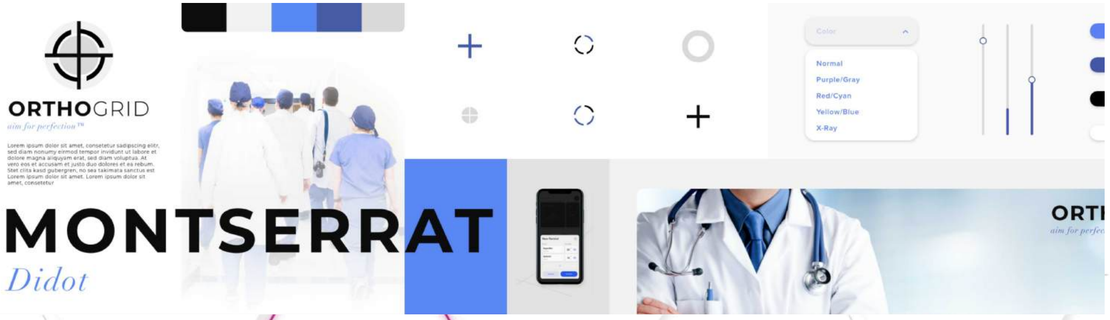

ORTHOGRID

2020
Branding
Design
UX / UI

Orthogrid is a UI/UX tool designed to support orthopedic surgeons by enabling precise annotation and measurement on X-rays during surgery. It streamlines intraoperative workflows and enhances team communication, helping surgeons make confident, data-informed decisions in real time.

ORTHOGRID
TRAUMA

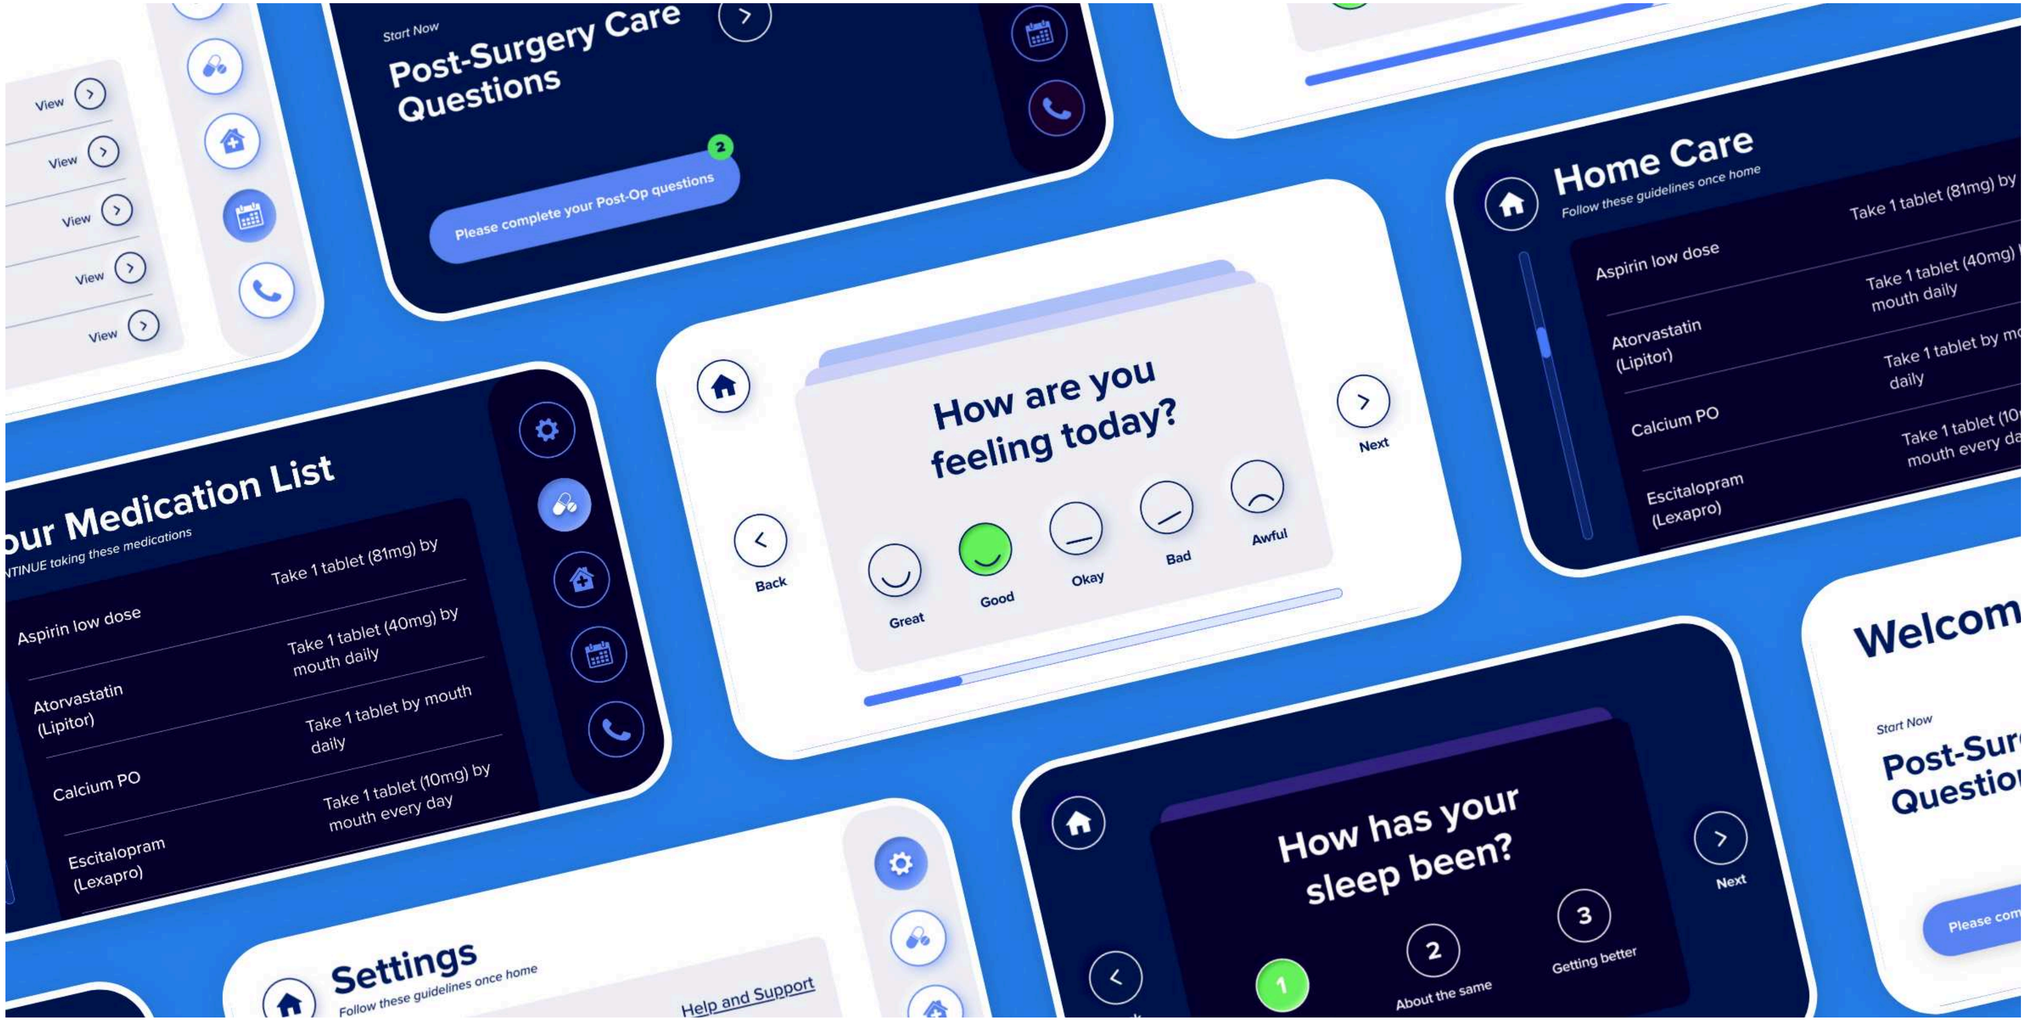

DIGITAL PRODUCT

CAREBOT

2021
Branding
Design
UX / UI

CareBot uses the advancements in technology to help with the problem of hospital readmittance. Moving beyond the static and linear CareBot creates a relationship between patient and nurse post-op. We created an interface that sparks interaction without adding additional stress points for the patient. In sync with this interface we created a desktop view for nurses to manage each device and patient remotely.
