World Mobile

The AirNode guide

AirNodes explained.

What an AirNode is, how it works, and how you earn rewards when people use the network.

The short version

You own the hardware. We run it. You earn when it's used.

Every mobile network runs on equipment: the boxes and antennas that carry calls, texts, and data. Normally, phone companies own all of it.

World Mobile works differently. Here, everyday people can own that equipment. Each unit is called an AirNode.

No setup

Nothing is shipped to your home. We place your AirNode where the network needs it and switch it on.

No experience needed

You don't need to know anything about telecom. We handle the technical side.

Track it from anywhere

Follow your AirNode and your rewards in an online dashboard, wherever you live.

Over 3 million
subscribers on the World Mobile network

150,000+
AirNodes deployed

01
You buy an AirNode
You own it from day one.

→ 02
We deploy it
In the US, Africa, or Asia.

→ 03
People connect
Calls, texts, and data.

→ 04
You earn rewards
When your AirNode is used.

How it works

From purchase to earning in three steps

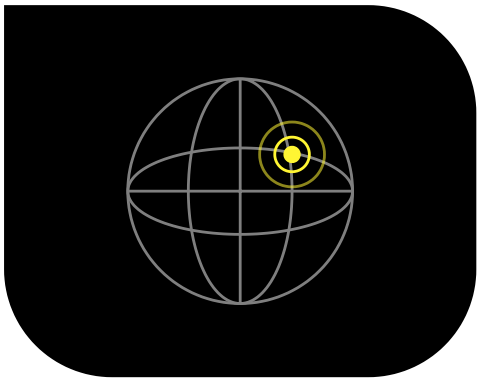

Buy your AirNode today and we take it from there.

01

Buy your AirNode

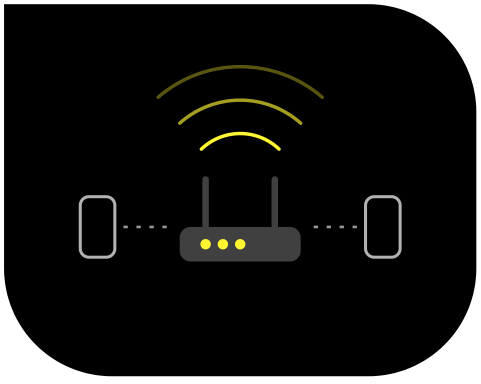

Pick the AirNode you want and pay in full at checkout. You get an estimated deployment timeline right away.

02

We deploy and activate it

Your AirNode is installed in its designated country, where connectivity is needed most. You don't have to install or maintain anything.

03

You start earning

People connect through AirNodes like yours for calls, texts, and data. When your AirNode provides connectivity, you earn rewards.

Good to know: after you buy, your AirNode can take up to 48 hours to show up under "My AirNodes" in your dashboard.

Rewards

Where your rewards come from

Subscribers pay to use the network. A share of that goes to the people who own the equipment carrying their calls, texts, and data. With an AirNode, that includes you.

01
Subscribers use the network
Calls, texts, and data.

→ 02
Your AirNode carries it
It provides the connection.

→ 03
You earn rewards
Tracked in your dashboard.

What affects how much you earn

01 **The type of AirNode you own**
Different AirNodes do different jobs on the network.

02 **How many people use the network nearby**
More local subscribers means more activity.

03 **How much they use it**
Rewards follow real network usage.

04 **How reliably your AirNode stays online**
This is called uptime.

The honest part

Rewards vary and are not guaranteed. They depend on real network activity, so they can be higher or lower from one month to the next.

Choose your AirNode

Two ways to start

Start with a bundle, or buy a single AirNode. Both are real hardware on a live network.

Bundle

Edge Starter

$229 | Pakistan

Two AirNodes in one purchase: one Spark AirNode and one EmberNode, both deployed in Pakistan. It is designed as your first step into the network.

Good to know

Limited to one Edge Starter bundle per account.

airnode.worldmobile.net/reservations/bundles

Single AirNode

Frontier

From $585 | Philippines

A Wi-Fi AirNode that brings internet to homes and businesses on the island of Siargao. World Mobile installs and connects it for you.

Good to know

Frontier comes in four tiers, starting with Core at $585. Deliveries are expected from January 2027.

airnode.worldmobile.net/reservations/frontier

Want to go bigger? Larger bundles with more AirNodes are also available at airnode.worldmobile.net/reservations/bundles.

Prices and dates shown are correct at the time of writing. See airnode.worldmobile.io for current prices and availability.

Getting paid

Rewards are paid every month

Here is what happens to the rewards your AirNode earns in any given month.

The month ends

Your rewards for that month are added up.

30 days later

Those rewards become claimable.

You claim

Log in, open Rewards, and click Claim.

You get paid

Within 10 working days of your claim.

For example: rewards earned in March become claimable 30 days after March ends, at the end of April.

Paid in USD or stablecoins

Stablecoins are digital dollars. You see your rewards in USD in your dashboard.

$10 minimum withdrawal

Once you have at least $10 in claimable rewards, you can withdraw.

One place for everything

Your dashboard shows each AirNode you own, its status, and your rewards.

Common questions

Quick answers

What exactly is an AirNode?	A physical device that creates mobile or Wi-Fi coverage. It carries subscriber traffic on the World Mobile network, and you earn rewards for that.
Do I need to install it myself?	No. Your AirNode is deployed for you. For Frontier, local partners assign and install it.
Do I need telecom experience?	No. Entry-level AirNodes are pre-installed and managed through the platform.
Can I own an AirNode in another country?	Yes. You manage everything remotely through your dashboard.
When does my AirNode start earning?	Once it is active. You get an estimated deployment timeline when you buy.
Are rewards guaranteed?	No. Rewards depend on activity, network usage, uptime, and other factors.
Where are AirNodes deployed?	AirNodes are already live in the USA, Pakistan, and Africa. The Frontier rollout in the Philippines starts on Siargao.

Ready when you are

Get your first AirNode in four steps

01 Go to airnode.worldmobile.net/reservations and choose your AirNode.

02 Log in or create your account.

03 Check out and sign your agreement.

04 Pay in full. Then follow your AirNode from deployment to rewards.
