EnMS (Energy Management System for Businesses)

Energy Management Systems (EnMS) enable end users to monitor and optimise their energy consumption, enabling sustainable management approaches and cost savings. Inavitas EnMS allows the entire portfolio to be monitored from a single point, helps to increase energy efficiency and make it permanent thanks to its advanced visualisation, analysis, forecasting capabilities as well as automated control mechanisms. Our innovative technology empowers consumers to make informed decisions that optimise energy use, providing a sustainable and cost-effective energy management opportunity.

EnMS (Energy Management System for Businesses)

Energy Analytic Panel

Summary and instant information of all units: Instant power, total consumption, invoice tracking, etc.

Analytic Module

Detailed data analysis with selected units and parameters

Tariff Module

Bill comparison by viewing used and alternative tariffs

Alarm Module

Retrospective alarm analysis and reporting

Map Module

Tracking loads on the map

Report Module

Reporting according to need in a dynamic structure

Increase Energy Efficiency of Your Business

Compliance with standards through reactive rate/demand monitoring and consumption optimization

Correct tariff selection and bill optimization

Maximum savings in energy costs

Easy data analysis and reporting

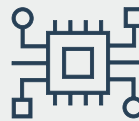

What Our Solution Offers?

Real-time monitoring of consumption and production of all facilities on a single platform

Easy scaling for changing energy needs thanks to its modular and flexible structure

Brand-model-independent structure that works on all devices at all levels

Meaningful inferences and effective future predictions with specially developed artificial intelligence tools

User-friendly dashboard for holistic asset management

Real-time consumption and reactive penalty notifications

Customizable and periodic report formats

Visualized tracking of data with single line drawings and symbols

Explore integratable solutions to perfectly fit your needs

5000+
Operating Devices

10.000+
Measurement Points

300+
Businesses
