

Premium Audit

If you could audit more policies without adding auditors, what would you find?

Most carriers audit only 30–40% of eligible policies because the process is manual and expensive, leaving millions in premium uncollected.

Insurity Premium Audit changes the math by automating payroll validation, audit data collection, and policy screening—so audit teams can cover far more of their book, uncover more premium, and spend less time on manual review.

2X Increase in audits completed

50%+ Reduction in audit costs

130+ Connected payroll providers

What our customers have to say:

"[Insurity's] ability to evaluate our book of business and automatically order audits allowed us to find and visit a \$500 policy which resulted in a \$100,00 premium due. Think of all the years without [Sure Premium Audit] and the premium missed!"

ASSISTANT VICE PRESIDENT
TIER 4 CARRIER

What this improves for your business:

Capture 3X more premium

- Automatically screen your book daily for exposure changes and misclassifications to uncover more premium while significantly reducing audit costs

Complete 2X more audits without adding staff

- Digital workflows and policyholder self-service tools shorten audit turnaround from weeks to days

Expand audit coverage across your book

- Automated policy screening, payroll validation, and data collection remove the manual work that limits how many policies audit teams can realistically review

Reduce audit bottlenecks with automation

- Automated payroll validation and data ingestion reduce manual review so auditors can focus on true exceptions instead of paperwork
- Automate policy and claim feeds, audit creation, assignment, submission, and tracking across all audit types & methods
