What our customers have to say:

"SpatialKey helps us assess and present aggregate risk in a far more visually compelling way.

Its speed, interactivity, and ability to handle large data sets enable us to work faster with greater flexibility."

Top 4 reasons customers choose SpatialKey Exposure Analytics...

Access instant risk intelligence

- View your portfolio's risk concentrations through geospatial visualizations that highlight where your exposure is highest
- Evaluate data quality, explore correlations, and develop your view of risk quickly in a seamless environment

Gain catastrophe and peril insights

- Make portfolio decisions confidently by analyzing your exposure to both natural disasters and manmade risks
- Transform complex data into insights by correlating exposure, modeled loss, hazard, claims, and market data in one platform

Optimize your portfolio in real time

- Maintain the balance of risk across your book of business by identifying peak accumulations and monitoring capacity utilization
- Better understand your portfolio by evaluating key risk contributors and market share

Get up and running quickly

- Start driving market-leading ROI in a few hours with a turnkey implementation
- Use simple integration options to access your data wherever and whenever you need it
