

Billing-as-a-Service

Run billing at a lower cost than in-house without building or managing it

Insurity runs billing for you at a lower total cost than doing it in-house, while making it faster, simpler, more compliant, and easier for your customers to pay.

50%+

Lower billing costs

1M+

Installments processed annually

\$2B+

Premiums processed annually

100%

Compliance across states + PCI

What Billing-as-a-Service changes for you:

Modernize billing without a system project:

- No core billing replacement
- No multi-year implementation
- No internal lift
- Modern portals for customers and staff

Billing stops being a cost center that grows with your premium

- Cut total billing costs by up to 50%+
- No more hiring, scaling teams, or managing vendors
- Predictable cost model so growth no longer increases your base

Scale premium without scaling operations

- Handle more policies, payments, and complexity without adding people
- No need to build internal billing expertise
- Growth becomes operationally easy

Remove premium finance from the equation

- Shift to direct bill without operational burden
- Eliminate 12–14% financing costs for insureds
- Win more business with a simpler, cleaner buying experience

Your team stops doing billing work

- No more reconciliation, exception handling, or manual processing
- Finance focuses on visibility, strategy, and growth
- Operations stop being buried in transactions
