Insurity

Marine Suite

Compete for any opportunity in the market with the world-leading cargo solution.

100+	3M+	25+	100K
Countries where system is used	Certificates issued annually	Years of cargo expertise	Active users across thousands of policies

Case Study:

A global broker and insurer identified a large untapped market of small and mid-sized freight forwarders but couldn't serve it profitably due to the administrative cost of manual servicing.

Using Insurity Marine Suite, they unlocked a scalable digital distribution model by:

- Launching a self-service e-commerce portal for real-time cargo coverage and certificate issuance
- Enabling a team of just 2 brokers to efficiently manage thousands of accounts
- Automating rating, payments, claims, and policy servicing to reduce manual overhead and control loss exposure

Result:

Over **$500K** in recurring annual revenue with continuous double-digit growth while reaching a market segment that was previously uneconomical to serve.

What Insurity Marine Suite changes for you:

Streamline policyholder self-service and capture more business

- Enable policyholders to declare shipments and issue certificates in seconds
- Leverage shipment data inside POS/logistics workflows with no rekeying necessary

Launch new clients faster and start writing sooner

- Get new policies and partners live in minutes, not weeks
- Brokers and cargo insurers can collaborate directly in the system
- Enable embedded insurance or integrate with third parties using Insurity's toolkit, cutting integration time from months to days

See your cargo exposure as it changes

- Portfolio tracking of exposures across shipments, red zones, and locations
- Monitor receivables, deposits, and billing activity
- Enable FNOL by any party and track your claims activity

Be the easiest to place business with

- Instant certificates = better customer experience
- Eliminate duplicate data entry and errors while accelerating service
- Real-time sanctions and regulatory compliance
