Insurity

Predict

Forecast the future with the P&C industry's most respected predictive analytics and modeling solution

3-10%
Loss ratio improvement

3X
Industry average growth

13X
Increase in predictive power

"UBIC is a data-driven company, and we have fostered a culture around predictive modeling thanks to the ease of using Insurity Predict.

We brought the Insurity Predict model into play just a few years ago, transforming how we do business. We went from running loss control on every risk to deploying our resources across submissions more intelligently.

Instead of spending time servicing every account the same way, we now tailor these experiences for our policyholders based on the predictive risk scores."

TYLER NIELSEN
CHIEF OPERATING OFFICER

UBIC

Top 5 reasons insurers choose Insurity Predict

Increase profitability

- Deliver market-leading ROI with robust, credible, and anonymized datasets
- Drive long-term growth by accurately classifying and pricing risk with GLM and logistic models

Boost predictive power

- Extend your predictive power using $115B+ in premium across all standard P&C lines of business
- Enhance the predictive power of the models by utilizing third-party data sources such as BLS and NCCI

Modernize your underwriting processes

- Adjust your underwriting and pricing strategy by identifying the most profitable and risky segments
- Track model performance and underwriter adoption with configurable visualizations and dashboards

Gain actionable insights

- Generate ROI with model predictions, underwriting decisions, and claims data while leveraging insights from Insurity's team of experts
- Optimize profitable segments and resolve issues in real time with aggregated policy predictions

Deploy a solution quickly

- Get started quickly with a plug-and-play, web-based platform that allows production-ready models to be deployed in as little as 4 weeks
- Go live with a custom calibrated model in weeks instead of months by leveraging real time APIs, interfaces, and batch processing
