## CONSERVATORY **TOO HOT** IN SUMMER OR **TOO COLD** IN WINTER?

Make your conservatory usable 365 days a year. Stay Cool in Summer. Stay Warm in Winter. **Guaranteed.**

Our simple and cost-effective solutions help UK conservatory owners transform unusable rooms into home extensions they can enjoy all year round, in just one day with a 10 year guarantee for peace of mind.

# Your Conservatory, Re-imagined.

At Usable365, we help homeowners reclaim their conservatories. Using premium insulation technology and expert installation, we turn rooms that were once too hot, too cold or too noisy into comfortable, usable spaces - every day of the year.

Our team are specialists in conservatory ceiling insulation, not general builders. Every ceiling is fitted with precision, care and the UK's most advanced insulation material.

## PROBLEMS WE SOLVE

When you look at your conservatory do any of these questions sound familiar to you?

- Too hot to sit in during summer
- Freezing cold in winter
- Blinding glare from the sun
- Deafening rain or wind noise
- Rising energy bills due to heat loss

You're not alone - thousands of conservatories across the UK are uncomfortable for half the year.

## BENEFITS OF AN INSULATED CEILING

Comfort, Efficiency & Style — All in One Day.

- Year-round comfort - consistent temperatures, whatever the weather.
- Lower energy bills - retain heat in winter, reflect it away in summer.
- No glare or condensation - a soft, natural light replaces harsh sun.
- Quieter living - insulation absorbs the outside noise, no more deafening wind or rain.
- Adds home value - turns wasted space into a real room you can finally use all year round.

That's why homeowners are choosing Usable365 to make theirs truly usable.

# No matter what type of conservatory you have, we can transform it into an amazing living space

We understand how frustrating it can be not having a usable conservatory all year round

Because of this, we have the solution that not only insulates and regulates the temperature, making your conservatory a liveable space, but also turns it into a truly stunning extension of your property, creating a truly relaxing room to enjoy 365 days a year.

## WE USE THE BEST MATERIALS

Premium Insulation. Proven Performance.

At the heart of every Usable365 installation is YBS SuperQuilt® - the UK's leading multifoil insulation, made by YBS Insulation and approved by LABC and BBA.

- ✓ 19 layers of reflective foil and wadding for maximum thermal performance.
- ✓ Works by reflecting radiant heat back into your home while blocking solar gain.
- ✓ Equivalent to 100 mm of rigid board insulation, but far thinner and lighter.
- ✓ Acts as a vapour control layer, reducing condensation build up.
- ✓ Fire rated and fully compliant with UK Building Regulations.

YBS SuperQuilt is the World's Highest Performing EN certificated Reflective Multifoil Insulation on the market. If you are going through building regulations, SuperQuilt is BDA Certified for Building Control. You can also use SuperQuilt to boost your EPC rating due to it being fully accredited.

Enjoy your conservatory every day of the year – without extreme temperatures.

# No matter the size or shape we can do it!

VICTORIAN

The lads have transformed an old large storage space

into a beautiful office space, with their ceiling, first class service, friendly team and would highly recommend and would use again. Thank you so much

P-SHAPE

HIPPED LEAN-TO

Great job on my lean to ceiling and PVC cladding to cupboard

Did a great job on my lean to ceiling, making the sun room, which was Pretty much unable, into to a usable space (with lights). Also did the cladding on my porch area cupboard too which looks great. Really lovely people / company to work with. I am very happy with the result and would definitely recommend. Thank you so much.

DOUBLE EDWARDIAN

EDWARDIAN

Excellent and Professional

Received fair and honest appraisal of work needed to replace my 15+year polycarbonate roof. Work executed smoothly and tidily. Was a pleasure to have Gary, Callum and Cain in my home. Would highly recommend.

### Very happy customer

All I can say is fantastic from start to finish. Completed the job to a lovely fresh new finish now the room looks and feels so much more cosy and comfortable and Gary even carried out a box gutter repair for me. I guess the colder months to come will see the real benefits of the installation. It was a great pleasure having them carry out the job I cannot fault them.

Thanks again guys.

### Conservatory roof insulation

We used this company to get our glass conservatory insulation done and they did an absolutely fantastic job! We can now use the room year round without it completely heating up or getting freezing cold. Everyone was super helpful and transparent throughout the installation, and answered all our questions. They were very professional throughout the entire process from providing information and giving a quote to completing the job.

Would definitely recommend them for their work and will use again for other services too!

### Fantastic service & product

From the moment we got in contact with Gary we had a great experience, no pushy sales, lovely phone call that put us both at ease as this was a big thing for us, fab communication with both Gary and Callum, they came the time they said, very friendly chaps, the conservatory now looks amazing a room we can finally use after 3 years of being our dumping ground, no mess was left, everything was cleaned away. The kettle is always on for you all if in area.

Thank you so much, definitely recommend usable365.

# OUR SIMPLE PROCESS

Quick, Clean and Hassle-Free.

No pressure, no hard sell, just top quality work that will transform the way you think about your conservatory - at an affordable price.

Transforming your conservatory is easier than you think:

# Still Have Questions?

Let us answer the common questions we get from customers before they buy

I'm absolutely delighted

I'm absolutely delighted with my new conservatory ceiling. The finish is modern, neat and really brightens up the whole space. The installation was done to a very high standard with great attention to detail, and the ceiling lights look fantastic. The team were professional, efficient, and left everything clean and tidy. I'm very happy with the result and would definitely recommend their work.

## FREQUENTLY ASKED QUESTIONS

When you look at your conservatory do any of these questions sound familiar to you?

### Will it really make a difference?

Our Insulated Ceiling makes a huge difference once installed. Through the cold winter months your conservatory will no longer need to be provided with constant heat to keep you comfortable. In those warm summer months our high performance insulation will block the heat out reducing the temperature from boiling, to something far more comfortable.

### Does it need planning permission?

There is no need for planning permission with the insulated ceiling as this product is installed to the inside of your existing roof and there is no change in the physical appearance from the outside.

### Is there any light loss?

The light loss with the Insulated ceiling is very minimal due to the immaculate white UPVC finish, white is the best colour for natural reflection of light giving your conservatory the ability to utilise all of the light flooding in through the window frames.

### What happens with the existing roof windows?

We offer two options in regards to existing roof windows, we can either secure and seal them closed and insulate over the top of them or if you would prefer we offer the option of leaving them exposed to allow natural light in through the roof.

### How do I place my order?

If you'd like to go ahead with your order, you can simply email us to confirm or give us a call - whichever is easiest for you. Once we've received your deposit, we'll get your installation date booked into our calendar. From there, you're just a few days away from enjoying a conservatory that's comfortable and usable 365 days a year!

### How do I pay for my Insulated ceiling?

We ask for a 25% deposit. This deposit makes a small contribution towards the materials for your job and also locks your installation date in place. The final balance is due immediately after the installation is complete. You can pay by bank transfer or card payment via a payment link provided.
