

HIPAA violations carry personal liability. Is your *infrastructure ready?*

Patient data protection isn't a technology problem — it's a governance discipline. HIPAA requires documented controls, breach notification readiness, and continuous risk assessment. The question is whether your IT provider can prove it.

Zero

Data Breaches

100%

Audit-Ready, Every Quarter

Zero

HIPAA Violations

Real outcomes. Built specific to *you*.

HIPAA Compliance

Access controls, encryption standards, audit trail maintenance, breach notification procedures, and Business Associate Agreement management — structural, not superficial.

Patient Data Protection

End-to-end encryption, role-based access, EHR system governance, and secure communication channels protecting PHI across every touchpoint.

Continuous Risk Management

Named vCIO. Monthly executive reporting. Quarterly strategic reviews. Annual HIPAA risk assessments, policy development, and staff training coordination.

— Patient trust starts with infrastructure you can defend to any auditor. —

Three steps. One disciplined *framework*.

1

Executive Strategy Session

A complimentary 30-minute conversation about your HIPAA posture, risk exposure, and infrastructure gaps.

Free · No obligation

2

Technology Governance Assessment

A deep-dive into your operations: HIPAA gap analysis, risk scoring, and a prioritized 12-month compliance roadmap.

Fee credits toward engagement

3

Governed Operations + SBR

Continuous HIPAA compliance, quarterly strategic reviews, and a posture that strengthens every 90 days.

Ongoing · Strategic partnership

One conversation could change how your practice *operates*.
