BOOK A DEMO

K9 documentation should not depend on scattered notes, spreadsheets, or memory

Training and deployments get entered late

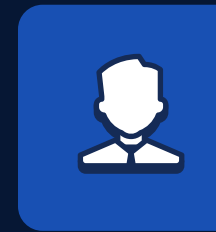

Short sessions never make it into the record

Reports get rebuilt from scattered files

Trainer feedback gets separated from the official record

Supervisors chase files instead of reviewing the unit

With PackTrack, you get one system for records, reporting, and review

Field logging

Structured records

Trainer feedback

Supervisor review

Reports

PackTrack connects the full K9 documentation workflow, so the same record can support every role in the unit.

One record. Multiple roles. Less re-entry.

Handlers

Log training and deployments from the field, as work happens

Trainers

Run group training without duplicate entry, and comment on each handler's record

Supervisors

Review records, mark them reviewed, track follow-ups, watch active deployments

Command

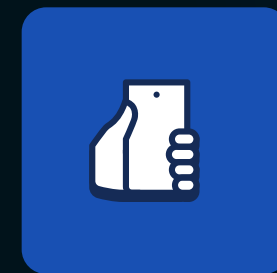

See documented activity across the program and pull reports on demand

Less paperwork after the fact

Handlers can log training, deployments, and short sessions from the field instead of rebuilding records later from notes or memory.

Quick Training

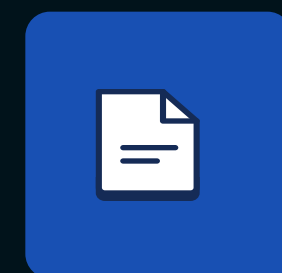

Mobile field logging

Automatic date, time,
and location capture

Voice-to-text notes

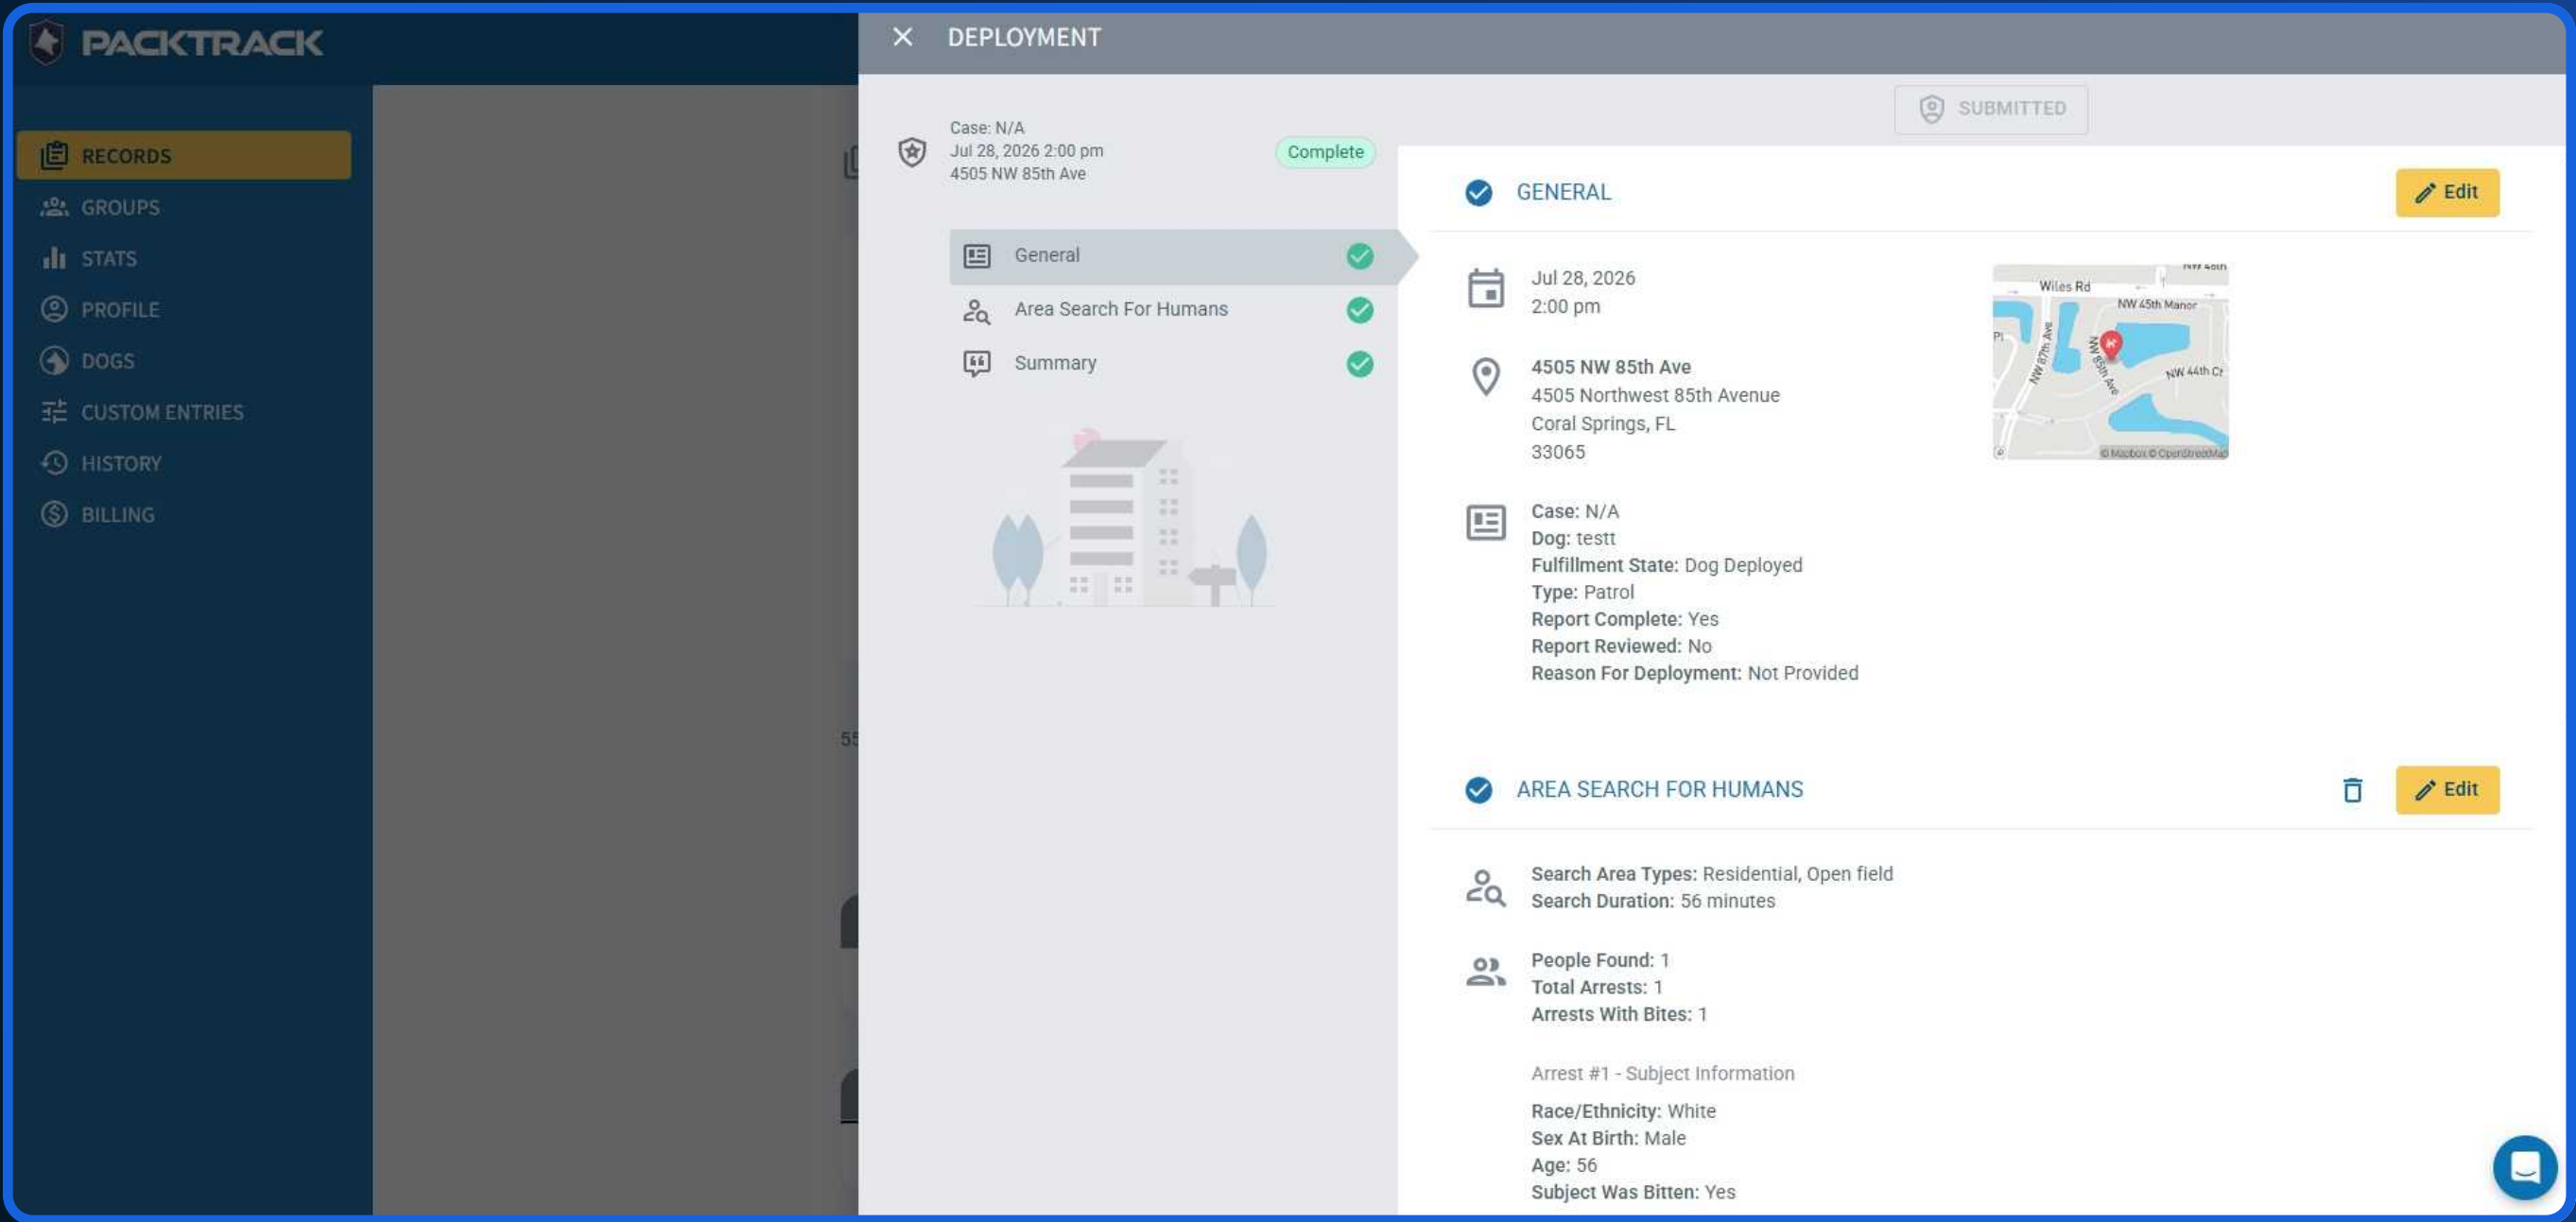

Reports from recorded activity

Less catch-up after the shift. More complete records when documentation is needed.

Clearer oversight without chasing records

Supervisors can review handler records, mark records as reviewed, generate summary reports, and monitor active tracking deployments in real time.

Reviewed

handlers

Live tracking
visibility

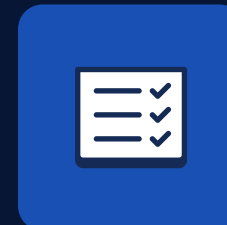

GPS handler movement
plotted on the dashboard

Consistent training records with feedback tied to the record

Trainers can reduce duplicate entry during group training and leave comments, corrections, and positive actions directly on each handler's training record.

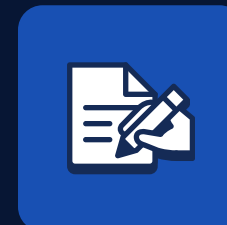

K9 Training Groups

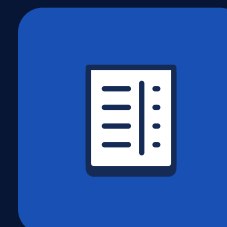

Shared exercise details entered once

Individual performance records preserved

Trainer comments on each record

Corrections and positive actions documented in one place

Cleaner training history. Less duplicate entry. Feedback that stays with the record.

Simple pricing for handlers and departments

✓ Trainer access included ✓ Supervisor access included ✓ Billing manager access included

30 day free trial

BOOK A DEPARTMENT DEMO

Does PackTrack work on web and mobile?

Yes — PackTrack supports web access plus dedicated iPhone and Android apps.

Can supervisors review records?

Yes — supervisors can access records, mark them as reviewed, and generate summary reports.

Can trainers add feedback?

Yes — trainers can comment on individual training records and document corrections or positive actions.

What happens if we cancel?

Records remain available unless removal is requested, including viewing and creating reports from old records.

What should command or IT review?

User roles, access needs, mobile access, record retention, and department security requirements.

Built by people who understand K9 work

Andrew Weiman

Retired law enforcement / K9 professional

Jeff Barrett

Retired law enforcement / K9 professional

30+ years each in law enforcement and K9 work

Co-authors of Canines in the Courtroom

Developed and tested with K9 training experts connected to HITS K9

I've learned more about training police dogs from Jeff Barrett and Andy Weiman [PACKTRACK's creators] than from all of my other classes combined. These guys know what they're talking about and it works. They know it works because they're on the streets catching bad guys and finding drugs like no one else.

Deputy Morgan Case, Ada County Sheriff's Office, Idaho
