

ELEVATE YOUR SECURITY WITH THE CARDLAB ACCESS CARD

In today's fast-paced digital landscape, secure access has never been more critical. CardLab Access is a smart authentication card designed to simplify and strengthen security for enterprises. With its robust fingerprint sensor, wireless connectivity, and multi-functional capabilities, it provides seamless access across physical and digital platforms.

KEY FEATURES

- **Fingerprint Authentication:** High-performance fingerprint sensor for secure, password-free access
- **NFC & BLE Connectivity:** Allows flexible communication with a wide range of devices.
- **FIDO2 Certified:** Provides advanced web-based authentication, reducing reliance on passwords.
- **Rechargeable:** Contact and wireless charging capability ensures the card is always ready for use.
- **Cost-Optimized:** High security at a competitive price, designed for enterprise needs.

HOW CARDLAB ACCESS WORKS

Access is more than just a smart card. It's a comprehensive IT solution for enterprises looking to secure their access systems, both logical (digital) and physical (entry to buildings & assets).

The card enables:

- **Convenient Desktop Logins:** Secure login with the employees fingerprint.
- **Secure VPN Access:** Seamless integration with remote access tools, ensuring data security on the go.
- **Physical Door Access:** Key card capability to unlock electronic doors, enhancing security in office spaces.
- **Closed-Loop Payment Systems:** Integrates with company IT and payment systems for closed-loop, on-site transactions.

By eliminating the need for passwords, CardLab Access with three factor authentication, helps enterprises reduce risks related to credential theft while making everyday operations smoother and more secure.

BENEFITS TO YOUR BUSINESS

- **Increased Productivity:** Employees and the IT department spend less time dealing with passwords and more time being productive.
- **Enhanced Security:** Fingerprint authentication significantly reduces unauthorized access risks.
- **Streamlined Operations:** One card for multiple purposes – from desktop logins to opening doors and processing payments.
- **GDPR, AML, KYC, and eIDAS Compliant:** Meet regulatory standards with confidence.

ELEVATE YOUR SECURITY WITH THE CARDLAB ACCESS CARD

USE CASES

CardLab Access Card is a versatile solution for secure authentication across a range of environments, combining physical and logical access capabilities into a single tool. Key use cases include:

- **Corporate Offices:** Use the card as an employee ID, secure door and infrastructure access for secure door access and workstation logins
- **Government Facilities:** Enable controlled access to sensitive areas and systems while ensuring compliance with security protocols.
- **Educational Institutions:** Simplify building access for staff and students while providing secure logins for e-learning platforms.
- **Healthcare:** Secure access to restricted zones (e.g., patient records or labs) and ensure privacy compliance.
- **Critical Infrastructure:** Control access to high-security zones, such as power plants or data centers, with an integrated authentication solution.
- **Remote Work Environments:** Use the card for secure system logins, ensuring data protection when employees work from home or off-site.

The Access Card seamlessly integrates with existing systems, reducing complexity while enhancing security and operational efficiency.

WHY CHOOSE CARDLAB ACCESS?

CardLab Access Card delivers the perfect balance of security, reliability, and ease of use. Built on high-performance microelectronics, it ensures fast and secure communication while maintaining a lightweight, compact design that employees will carry effortlessly. The rechargeable battery and robust construction guarantee long-term usability, minimizing maintenance efforts. Additionally, its multi-platform functionality combines physical access (e.g., door locks) with logical access (e.g., system logins), enhancing operational efficiency without requiring costly infrastructure changes. Certified to FIDO2 standards, the Access Card represents the future of authentication—offering peace of mind for organizations looking to modernize their security, reduce IT cost while keeping integration simple and cost-effective.

CUSTOMIZATION AND SUPPORT

Every enterprise has unique security needs, which CardLab Access can be tailored to meet. We offer customizable options for branding, card artwork, and enhanced security features. In addition, the card comes with a 12-month global warranty and is backed by CardLab's Technical experts support team.
