

Wayfinder WorkSpace: Full-Access, AI-Ready Healthcare Intelligence

Remastered data and modular tools delivered with flexibility, transparency, and complete analytic control.

Built for data and analytics teams within healthcare provider organizations, Wayfinder WorkSpace offers direct access to Kythera's full array of remastered healthcare data and processing modules—with quality and structure designed for advanced analytics, machine learning, and AI workflows. With deployment options in your own Databricks environment or Kythera's built-on instance, WorkSpace offers the flexibility, transparency, and control data teams need to accelerate confident analysis and support their strategic objectives.

What Sets Wayfinder WorkSpace Apart

Wayfinder WorkSpace isn't a generic analytics environment—it's a purpose-built offering that combines highly structured, de-identified, multi-source data with reusable transformation modules and models. WorkSpace customers can query, transform, and analyze data within a governed framework designed to reduce risk and accelerate time to value.

From ad hoc reporting to advanced forecasting, WorkSpace gives technical teams a trusted foundation to deliver faster insights and build scalable solutions—powered by high-quality data that's ready for AI.

Features & Benefits

Full Data Access	>	Explore Kythera's remastered claims, EHR, lab, and third-party datasets.
Processing Modules	>	Apply prebuilt transformations and models to accelerate analysis workflows.
Flexible Deployment Options	>	Deploy in your environment or access through Kythera's built-on instance.
AI-Ready Data Architecture	>	Structured and complete data ideal for advanced analytics and ML models.
Governed & Transparent	>	Designed for compliance and repeatability across teams and projects.

Wayfinder WorkSpace Use Cases

- Building Forecasting Models
- Custom Attribution Analysis
- Advanced Cohort Design
- Service Line Growth Reporting
- LLM and AI Pipeline Enablement

A Scalable Foundation for Data-Driven Innovation

Wayfinder WorkSpace is the foundation for scalable, organization-wide analytics. By combining access to high-fidelity healthcare data with configurable transformation modules and built-in governance, WorkSpace helps data teams move faster—with fewer obstacles between raw data and real answers.

Kythera Labs is a data and technology company that enables organizations to rapidly ingest, de-identify, standardize, and analyze healthcare data with scale and speed using the Wayfinder technology platform, pre-configured data pipelines, data science toolkits, and remastered data sets for competitive advantages across markets.
