

PRISMARA

Precision by Design.

PRISMARA

LOUPE SYSTEM

Clinical vision is more than magnification.

It shapes posture, movement, endurance, and the
quality of your work, repeated thousands of times over
a career.

Prismara was created to bring those elements into
alignment through precision optics,
ergonomic intent, and refined industrial design.

Lightweight titanium construction.
Personalised fitting.
Ergonomic loupe geometry.
Integrated lighting systems.

A loupe system designed not only to help you see
better, but to help you work better.

OUR PHILOSOPHY

Precision should never feel added on.

It should feel inherent.

That belief shapes every
Prismara system from the
beginning, from optical
alignment and frame balance
to the way each component
feels in daily use.

For us, refinement is not
decoration.

It is discipline.

Nothing excessive.
Nothing arbitrary.
Nothing included without
reason.

What remains is a loupe
system resolved to what
matters most: clarity, balance,
comfort, and control.

TITANIUM, ERGONOMICS, FIT

Performance begins with structure.

Prismara frames are built around lightweight titanium architecture selected for strength, stability, and long-term comfort. The result is a frame that feels secure in use while remaining light enough for extended wear.

Each system is also shaped by three core design principles:

Prismara ErgoAlign™

Supports a more natural working angle and a more sustainable head and neck position.

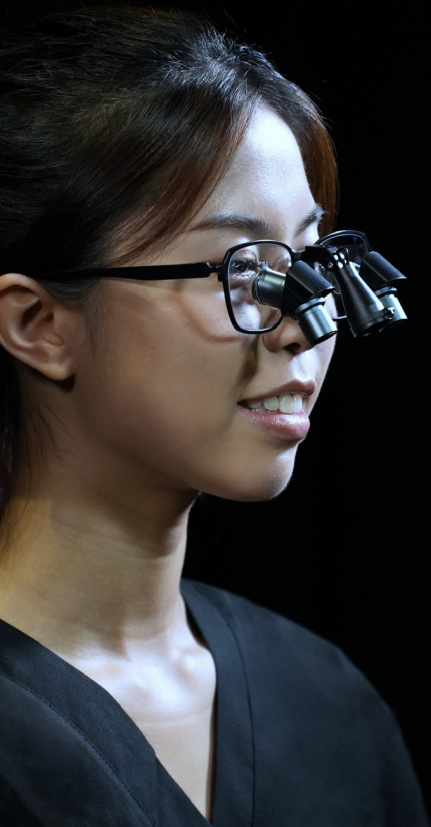

BalanceFit Geometry™

Refines weight distribution across the system to improve long-wear comfort and stability.

PrecisionFit™

Supports personalised optical setup for greater day-to-day confidence and visual accuracy.

The purpose of design is not to feel complex.
It is to make precision feel *effortless*.

PRISMATIC CLARITY

*What defines a loupe is not magnification alone,
but the purity of the view.*

Prismara Prismatic Crystals™ are engineered to deliver crisp, high-contrast definition with true colour fidelity and controlled glare, creating a view that feels immediate, stable, and naturally resolved.

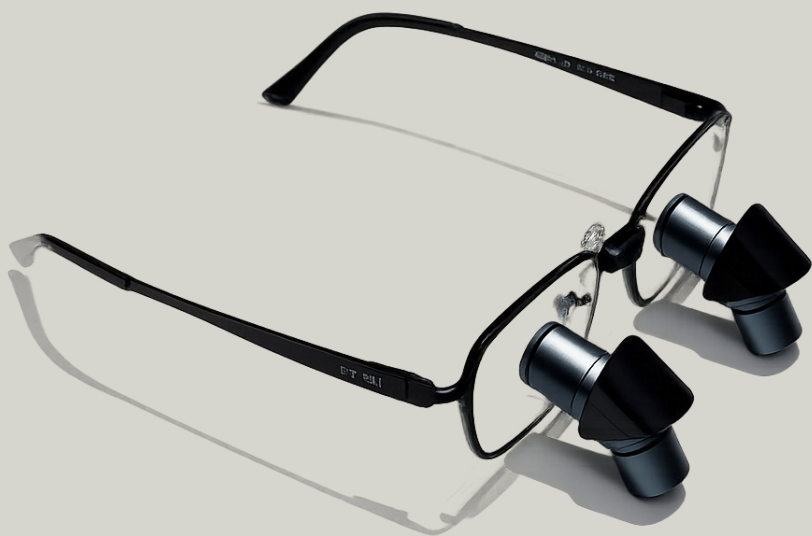

So precise, the optics recede and the work comes forward.

THE PRISMARA COLLECTION

Four frames.

One design standard.

Each Prismara frame belongs to the same system of precision, but offers a different wearing experience and visual character.

What connects them all is the same commitment to proportion, balance, ergonomic performance, and everyday clinical wearability.

FRAME I

BALANCE

*Distinctive in form.
Refined in use.*

The most architectural frame in the collection.

Frame I is designed for those who want a stronger visual identity without compromising balance, comfort, or clinical practicality.

Its silhouette is more pronounced, but carefully controlled. Deliberate, composed, and confidently resolved.

Available colours:

- Space Black ●
- Natural Titanium ●
- Deep Red ●
- Copper ●

*Titanium Frame Structure
Starting from \$2,099 AUD student pricing*

FRAME II CLASSIC

*More defined in appearance.
Still refined in feel.*

Available colours:

- *Space Black*
- *Graphite*
- *Burgundy*
- *Midnight Blue*

Frame II introduces a firmer profile while preserving the lightness and composure of the Prismara system.

It is designed for clinicians who want a frame with a slightly more grounded presence. Stable, assured, and confident across long sessions.

*Titanium Frame Structure
Starting from \$2,099 AUD student pricing*

Titanium Frame Structure
Starting from \$2,099 AUD student pricing

FRAME III LITE

*Technical in spirit.
Light in wear.*

Frame III brings a sharper, more contemporary silhouette to the collection. It is designed for clinicians drawn to a lighter, more dynamic frame language.

It feels agile on the face, precise in posture, and modern in character.

For those who want the collection at its most streamlined and progressive.

Available colours:

Space Black ●
Midnight Blue ●
Desert Sand ●
White ○

FRAME IV

BASE

*Balanced in proportion.
Understated in appearance.*

Available colours:

- Space Black
- Natural Titanium
- Alpine Green
- Deep Purple
- Midnight Blue

The most minimal expression of the collection.

Frame IV is designed for clinicians who prefer the lightest visual presence. Clean, understated, and easy to wear in any setting.

Its character is quiet, versatile, and immediately natural.

Starting from \$1,799 AUD student pricing

INTEGRATED ILLUMINATION

Light should extend vision, not interrupt it.

PRISMARA NOVA

Wired precision for stable, continuous illumination throughout the day.

Reliable, lightweight, and straightforward in use.

PRISMARA SOLIS

Touchless control for a cleaner, more seamless workflow.

Designed for practices where efficiency and reduced unnecessary contact matter.

ERGONOMICS

An Investment in Longevity

The way you position your body each day becomes the way you practice over time.

That is why ergonomics matters.

Ergonomic loupe design supports a more natural working posture, helping reduce unnecessary strain on the neck, shoulders, and upper back during extended clinical sessions.

This is not simply a matter of comfort.
It is an investment in sustainability.

The right loupe system supports not only how you work today, but how well you can continue working years from now.

When you invest in ergonomics, you invest in yourself.

THE FITTING PROCESS

Precision begins with the right measurements.

To configure your Prismara loupe system, there are two fitting pathways available:

OPTION 1

Prismara Fitting

Every Prismara fitting is performed using PrecisionFit™, designed specifically for dental loupes, using advanced PD measurement to deliver a level of accuracy beyond standard optical fitting.*

*Available through our team or during selected university visits.
Contact sales@prismaramedical.com

OPTION 2

Optometrist Reading

You may also visit your optometrist and have your readings taken independently. Prismara will reimburse the cost of the appointment. Please remember to keep your receipt for reimbursement.*

*Reimbursement is subject to terms and conditions. Please contact sales@prismaramedical.com prior to booking your appointment before commencing.

WHAT'S INCLUDED

Every Prismara system is presented with the essentials required for protection, care, and daily use.

Inside the box, you will find:

Each item is included with purpose to support a complete ownership experience from fitting to everyday practice.

Contents may vary depending on selected configuration.

CARE AND MAINTENANCE

A precision instrument should be treated as one.

To preserve the clarity, finish, and longevity of your Prismara system:

- Clean lenses only with a clean microfiber cloth or approved lens-safe materials.
- Avoid abrasive wipes, harsh chemicals, or rough surfaces.
- Store your loupe system in its protective case when not in use.
- Avoid prolonged exposure to excessive heat, direct sunlight, or high humidity.
- Handle optical components with care during cleaning and transport.

Proper care protects performance.
And performance is what matters.

WARRANTY, SUPPORT & AFTERCARE

*A premium product experience should
extend beyond delivery.*

Every Prismara product is backed by a 2-year warranty on all parts. If you require assistance with your loupe system, lighting system, or any product-related matter, our team is here to help.

For support, service, warranty enquiries, or aftercare assistance, please contact:
support@prismaramedical.com

Whether you need advice, replacement support, or help resolving an issue, we encourage you to reach out.

Support is part of the product.
So is care.

Refined Vision. Defined Precision.
