

SOLUTION BRIEF

## Sekoia Intelligence for OpenCTI

The natural, high-efficiency data feed for your OpenCTI ecosystem.

### Sekoia delivers intelligence for leading security teams

Sekoia CTI is recognized globally as a top-tier premium CTI vendor, trusted by organizations with the highest intelligence requirements.

#### SETTING THE STANDARD FOR HIGH-FIDELITY INTELLIGENCE

- Strategic, operational, and technical CTI (from reports to IoCs)
- Exclusive investigations combined with continuous OSINT capitalization and enrichment
- 60% additional detections when using IoCs, with a 0.016% false-positive rate
- Unmatched contextualization, as each IoC is linked to its specific related threat
- Unlimited use-cases, including detection, contextualization, hunting, response, and more

#### SUPPORTING MISSION-CRITICAL ORGANIZATIONS WORLDWIDE

- Sekoia provides intelligence to: National Cybersecurity Agencies - Fortune 500 companies - National CERTs - Global MSSPs - Governments - And beyond

### Enabling OpenCTI to operate at its full potential

Sekoia Intelligence is engineered for frictionless, lossless compatibility with OpenCTI:

- ▶ Easy configuration and deployment into OpenCTI via a native connector ([documented here](#))
- ▶ Full STIX 2.1 compliance, with clean, consistent, relationship-rich objects
- ▶ Intelligence appears in OpenCTI exactly as intended, without transformation errors
- ▶ No need for schema fixes, filtering, or additional engineering work

This leaves you with an instantly operational OpenCTI instance for more efficient security workflows.

# Sekoia Intelligence brings out the best of your OpenCTI

## STRATEGIC INTELLIGENCE

- Geopolitical insights
- Sekoia's exclusive Intelligence Reports
- State-sponsored & cybercriminality coverage
- Sector-specific insights

## OPERATIONAL & TECHNICAL INTELLIGENCE

- Threat actor profiles
- Malware and associated TTPs
- Attack campaigns tracking
- IoCs and infrastructure tracking
- Full MITRE ATT&CK mapping

All content is delivered as relationship-rich objects, providing immediate analytical and operational value within OpenCTI.

## Maximizing the return on your OpenCTI investment

Sekoia's pricing model is built to support organizations that operate a TIP such as OpenCTI.

- Preferential pricing for TIP users (no need to pay for Sekoia SaaS platform since you will leverage OpenCTI front-end capabilities)
- All intelligence included for one single price
- No modules, hidden costs, or feature-based add-ons

This makes Sekoia one of the most economically rational premium CTI choices.

Thanks to Sekoia Intelligence natively integrated into OpenCTI Enterprise, our analysts benefit from a contextualized and immediately actionable view of each threat. The extremely low false-positive rate and the richness of STIX relationships have significantly reduced our analysis time and strengthened the efficiency of our hunting and response activities (as an example, we have beautiful use cases associated with the C2 tracker).”

CTI Product & CERT Manager at Sopra Steria

## Why choose Sekoia for your OpenCTI ecosystem

Premium intelligence quality with industry-leading contextualization

Zero-noise, high-confidence data ready for operational use

Effortless, high-fidelity integration that preserves intelligence richness

Immediate operational value across detection, hunting, and incident response

Trusted by the world's most demanding organizations

Superior price-to-value ratio for any OpenCTI deployment

### ABOUT FILIGRAN

Filigran, a cybertech company founded in 2022, offers open-source cybersecurity solutions covering end-to-end threat intelligence management, attack simulations, and security posture validation for organizations.

### ABOUT SEKOIA

Sekoia is a European cybertech company specialized in intelligence-driven security technologies. Our mission is to enable security platforms, SOCs and service providers to detect, understand and respond to cyberthreats with confidence and scale.
